

## **International Students**

We may hire US residents studying abroad and non-US resident students studying in the US under student visas, generally the F-1 or J-1 visas.

International students with student visas will need to provide documentation and will need to work with their school's International Programs office for Optional Practical Training (OPT) or Curricular Practical Training (CPT) authorization for off-campus employment.

Due to the restrictions and requirements of the visa system it is not possible to hire non-US resident students attending school in other countries.
