

Flowers, Fruit, & Vegetables: Profitable Opportunities in Alaska

~ Understanding your Risks ~
 ~ Calculating your Profits ~
 ~ Understanding your Income Taxes ~

You can put your flower, fruit, or vegetable business on a stronger economic foundation by understanding and implementing good financial management strategies.

You, as a current or prospective farm business owner, should plan to attend one of three, **FREE** educational workshops to be conducted by Jeff Tranel & John Hewlett of **RightRisk**. You will learn how to (1) better manage the financial risks faced by your business using crop insurance, good records, and other risk management tools; (2) calculate annual profits and long term returns to investments; and (3) understand farm income taxes. **RightRisk** workshops are always interesting, educational, and worth a person's time!
