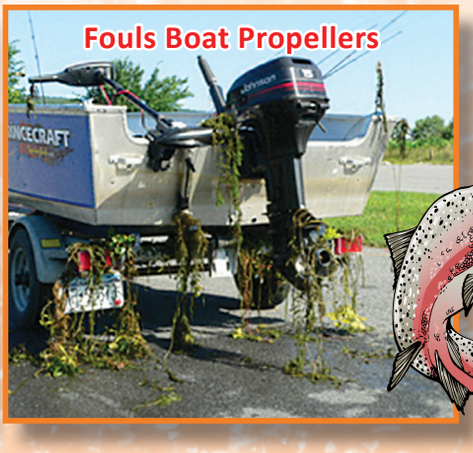
ANCHORAGE ELODEA ERADICATION PROJECT

COMMUNITY MEETING
WEDNESDAY, JUNE 17TH, 2015

6:00 PM • SAND LAKE ELEMENTARY, CAFETERIA

Please join us for a meeting open to the public to learn about interagency efforts to date, the Kenai project perspective, and more about fluridone.



Elodea, the first freshwater invasive submersed aquatic plant in Alaska, was first discovered in Anchorage in 2011. The use of fluridone to eradicate Elodea in Anchorage is tentatively schedule to begin in July 2015.
