### **GRANT PROCESS**

### **REIMBURSEMENT FORM**

Anything dated July 1	, 2012 – June	30, 2013
-----------------------	---------------	----------

Who did you purchase the item from\*?

What was the item you purchased and which category does it fall under?

How much did it cost?

\*The more specific you make this the better. For example, if you bought AK Grown carrots from DiTomaso we would want to know what Alaska producer they came from.

# What qualifies?

### DEC/FOOD SAFETY PROGRAM

### DEC definition of an approved source:

Permitted/certified by federal, state or local gov't agency (ex. FDA, USDA, State of Alaska, Municipality of Anchorage, or permitted outside of Alaska)

#### Is a farm a DEC approved source for food?

\*YES: If it is harvest cut/minimal trimming/school garden

Because raw agricultural products are not required to be purchased from a permitted facility

\*If agricultural products are processed then it must be done in a permitted facility.

### DEC/FOOD SAFETY PROGRAM

Food safety best practices for whole unprocessed products

- All prep (cutting/processing) is done separately from other food
- Clean and sanitize equipment and utensils after processing
- Food is labeled with name of food and stored separately

### RECEIPTS

Buy a receipt book in case you purchase from a smaller producer.

#### List the item, quantity, and producer.

- Salmon, berries, carrots.
- Record the quantity in a measurable way; weight or units (i.e. 3 carrot bunches or 10 salmon).
- Farm name, school or community garden name, fisherman, or something else.

Date the receipt for reimbursement!

If you aren't sure if the purchase is eligible get a receipt and contact us to find out later.

### SPEND IT OUT

#### **Explore** opportunities Purchase school or with local processing community garden food facilities Work with vendors to code eligible product Use other food programs Explore opportunities with to use the product in (i.e. local retailers FFV, snack program, dinner program, school activities)

## Resources: agriculture

### Resources: seafood

#### Seafood Industry

For those in the business of harvesting, processing or marketing Alaska Seafood, here is a wealth of information and resources: quality handling and technical resources that explain how to maintain seafood quality from harvest to market, and an entire catalog of marketing materials to boost sales. Find out about upcoming ASMI meetings and promotional events. Sign up for the industry e-newsletter *Newsbrief.* Consult ASMI's Seafood Market Information Service Bulletin for the latest analysis of market conditions and news on the performance of Alaska's seafood product portfolio. Check your company's listing in the on-line Directory of Alaska Seafood Suppliers, visited by thousands of people each month.

### EDUCATIONAL MARKETING

- Alaska is huge! It has 3 million lakes, 29 volcanoes and 34,000 miles of coastline. Plus it is the largest state in the countryit's twice the size of Texas, and the state of Rhode Island could fit into Alaska 425 times!
- Nature and the great outdoors are a big part of Alaska-there is 1 bear for every 21 people in the state. There are way more fish than people in Alaska.
- You can always feel good about eating Alaska Pollock because it is delicious, and comes from the largest sustainable fishery in the world and it is one of the most consumed fish in the United States!

- Alaska comes from the Aleut word "Alyeska," meaning The Great Land.
- Alaska is huge! It has 3 million lakes, 29 volcanoes and 34,000 miles of coastline. Plus it is the largest state in the country-it's twice the size of Texas, and the state of Rhode Island could fit into Alaska 425 times!
- Nature and the great outdoors are a big part of Alaska. There is 1 bear for every 21 people in the state.
- There are hundreds of millions of fish in the Alaska seas, compared to about 700,000 people living in the entire state.
- In 1959 it was written into the Alaska State Constitution that fish must be sustainable. It is the law that Alaskans must protect their fish to ensure there's enough for future generations.
- You can feel good about eating Alaska Pollock because not only is it healthy and delicious, the U.S. Alaska Pollock fishery is the largest sustainable fishery in the world and it is one of the most consumed fish in the United States.

### **QUESTIONS** BEFORE TAKING QUESTIONS WE WANT TO GO OVER SOME OF THE FAQ WE ALREADY HAVE

### Is there a list of local foods to pick from?

• This will depend on the school food authority and will need to be tailored by district.

#### How can we be better prepared in the event these funds become available again?

 We are looking into offering a 'buyer/producer planning meeting' early next year. If you would like to provide input about dates and content please go to: <u>https://www.surveymonkey.com/s/NAFS\_grant\_info</u>

#### Will we get this funding again so we can plan better for next year?

• We don't know. However, a report will be written about the grant program, so please pass along your recommendations and input.

Can someone help us fill out the forms and guide us about what we can and can't do?

• Yes, we have instructions and people here to help make this process as easy as possible.

### Is this a federal grant?

• No, these are state appropriated capital funds to be used in this pilot grant program.

#### Does moose or caribou need to come from a DEC processor?

• The money cannot be used to purchase processing for donated traditional foods at this time. If you are participating in a donation program follow the same guidelines as you did in the past:

Is any program that participates in the National School Lunch Program eligible for the grant funds?

• No, only the school districts and Mt. Edgecumbe High School are eligible for this money. Resident Care Child Institutes (RCCI's) are not eligible for the grant funds at this time.

#### Is this funding a part of the state farm to school program?

 No, the funding is housed in the Department of Commerce, Community and Economic Development. The Alaska Farm to School Program is a collaborator to help promote the success of the grant.

Can we use the money to purchase seeds , for example seed potatoes, to grow next summer?

• No, the original intent of this grant was to supplement each school district's school food program, by providing food grown in Alaska on the table at school mealtimes.

#### Do the foods have to be used in an associated USDA program?

• No, they are not limited to USDA food programs. Some districts don't currently participate in any USDA food programs and. Foods can be used in any school related event, if you aren't sure just contact us to check.

### Where can I view this slideshow after the webinar?

 We have the slides archived at: http://dnr.alaska.gov/ag/ag\_FTS.htm (scroll down to Presentation archives)

Can we be reimbursed for local foods before they are served as long as they will be used during this school year?

• As long as you are purchasing eligible foods you can get reimbursed, when it is used is up to you.

Can any of the funds and/or foods be carried over for use into the next school year?

 All food purchases must be done by 6/30/13, when the foods are served is up to you.

How do I plan my menu for these new local items? Do I have to change my whole menu plan?

• It may be easier to think of items you already purchase that could be substituted with a local source (i.e. ground beef). Don't worry about changing your menu too significantly, try adding a 'local lunch day' once or twice a month.
