Subject: Re: Board Recommendations (Confidential Deliberative Process Privileged Communication)

Dave,

Below are topics for tomorrow's meeting that I would like to formally put in a resolution to the Commissioner's office, after discussion and approval of course with the full board.

- 1) Board Declaration that they will continue servicing and making loans, and they are not selling any current loans.
- 2) Board request that the Governor put the ARLF funding for staff back in the DNR budget in order to help facilitate the BAC/ARLF, not to be paid with general funds. (we need to make that part clear)
- 3) Board request that the DNR – Division of Agriculture provide / direct the Director and division staff to service existing loans.
- 4) Board request that the \$12 million* (or actual amount) available for loans be turned over to the Board (via DNR finance) for investing until the \$ are used for loans.
- 5) Board request that the Governor / Commissioner support an update to the loan statutes and regulations in order to make the ARLF more accessible (usable) by industry.
- 6) Board request public announcements by the DNR Commissioner and/or Governor's office that the ARLF will accept and process loans. "Alaska is open for business".

Thank you,

John Anderson
