**PROJECT NAME:** Plant Materials Center Pesticide Use Permit

**PROJECT SUMMARY AND LOCATION:** The Alaska Department of Natural Resources has applied to ADEC for a pesticide use permit to apply two herbicides to the Plant Materials Center in Palmer. Treatment is proposed for May through September, throughout the duration of the permit.

The proposed products include:

- Cornerstone 5 Plus Surfactant Herbicide, with EPA registration number 42750-59-1381, with active ingredient glyphosate; and
- 2,4-D Amine 4, with EPA registration number 1381-103, with active ingredient dimethylamine salt of 2,4-Dichlorophenoxyacetic acid.

These products require the use of nonionic surfactants and de-foaming agents. The Plant Materials Center proposes to use the products

- Agri-dex, a crop oil concentrate;
- Agrisolutions Alliance, a water conditioning agent;
- Cayuse Plus, an ammonium sulfate and surfactant combination; and
- R-11, a spreader activator nonionic surfactant.

**PROJECT NEED:** The use of pesticides is a standard agricultural practice. A pesticide use permit is required in this case because the Plant Materials Center is located on state owned land.

**PERMIT APPLICANT:** Alaska Department of Natural Resources, Plant Materials Center

**APPLICANT ADDRESS:** 5310 Bodenbug Spur Road, Palmer, Alaska, 99645.
