**To:** Haralson, Lora L (DNR)  
**Subject:** Mt. McKinley Processing Plant

The Mt. McKinley plant is a critical piece of Alaska's food infrastructure. The ability to service current livestock slaughter demand and encourage future expansion of livestock production, in line with abundant Alaskan resources, is highly dependent on this existing structure.

The plant is so critical to the public's need that it should not be sold to a private party, but rather leased with clear expectations of it serving the public good.
