

## Alaska Plant Materials Center

### Release Notices

In accordance with the Alaska Plant Materials Center's release notices for the 2005 and 2006 groupings of accessions: If commercial production of the listed ecovars (in this case Pre-certified Selected Class Germplasm releases) is not initiated in Alaska during the six year period, from July 1, 2007 – July 1, 2013, the parent material of these releases will be offered to commercial producers in production regions outside of Alaska. The primary goal of the original releases was to have the various accessions in production and commercially available for use in revegetation activities in Alaska.

The following notice is given: Beginning on December 1, 2013, and continuing through the Alaska Plant Materials Center's 2014 spring seed sale period, the following releases are available to all commercial producers, regardless of residency:

Andrew Bay Germplasm large-glume bluegrass, *Poa macrocalyx*, Selected Class "Natural"

Attu Germplasm long awn sedge, *Carex machrochaeta*, Selected Cass "Natural"

Cantwell Germplasm downy wildrye, *Leymus innovates*, Selected Class "Natural"

Casco Cove Germplasm beach lovage, *Ligusticum scoticum*, Selected Class "Natural"

Clam Lagoon germplasm beach fleabane, *Senecio pseudo-arnica*, Selected Class "Natural"

Council Germplasm arctic bluegrass, *Poa arctica*, Selected Class "Natural"

Lowell Point Germplasm meadow barley, *Hordeum brachyantherum*, Selected Class "Natural"

Nelchina Germplasm spike trisetum, *Trisetum spicatum*, Selected Class "Natural"

Nome Germplasm glaucous bluegrass, *Poa glauca*, Selected Class "Natural"

Shemya Germplasm dusty miller, *Artemisia stellerianna*, Selected Class "Natural"

Solomon Germplasm thickspike wheatgrass, *Elymus macrourus*, Selected Class "Natural"

Teller Germplasm alpine bluegrass, *Poa alpine*, Selected Class "Natural"

Tok Germplasm Jakutsk snow parsley, *Cnidium cnidiifolium*, Selected Class "Natural"

During the 2014 spring sale, if a specific release is selected by an Alaska producer prior to being selected by a producer from elsewhere, further sales of that specific release will be restricted to only Alaska Producers. However, if a producer from outside of Alaska requests a specific release prior to an Alaskan producer, the release will no longer be limited to Alaskan producers and will remain available to producers outside of Alaska. Contact the Plant Materials Center at 745-4469.
