PLAT APPROVAL

This plat is approved by the Commissioner of the Department of Natural Resources, or the commissioner's designee, in accordance with AS 40.15

Sandra Singer
Commissioner

6-23-05
Date

By approval of this plat, the Commissioner of the Department of Natural Resources hereby accepts for public uses and for public purposes the real property dedicated to the public by this plat including easements, rights-of-way, alleys, and roadways shown on this plat. The acceptance of lands for public use or public purposes does not obligate the public or any governing body to construct, operate, or maintain improvements.

NOTES

- This survey was accomplished in accordance with AS 38.05.600, GSC 684 and RRCS-SI 2003-45.
- All bearings shown are true bearings as oriented to the Basis of Bearing and distances shown are reduced to horizontal field distances.
- The accuracy of the survey is greater than 1:5000.
- All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
- The existing lessee's claim corners were recovered and used to control the location of the tract boundary.
- BASIS OF BEARING** The Basis of Bearing for this plat was determined by high precision GPS survey using Topcon GGD receivers, differentially corrected and processed using Trimble Total Control, Version 2.73 processing software.
- BASIS OF COORDINATES** The coordinates depicted on the plats are based on a tie to a monument of record using high precision GPS survey techniques. The bearing and distance obtained were applied to the record NAD27 position to compute the NAD27 positions of a corner of each tract.
- The 2004 mean magnetic declination was determined by calculation using the Magnetic Declination Calculator (MIRP) maintained by Natural Resources Canada at http://www.geolab.nrcan.gc.ca/geomag/mirp_e.shtml
