

Sec. 38.05.872. Disposition of state land and resources for flood control projects.

(a) The department may make conveyances of title or other interests in state land, provide for exchange of land, or make other arrangements with respect to state land, as necessary to meet federally established requirements of flood control projects authorized inside the state by the United States.

(b) The commissioner may convey materials at less than fair market value to municipalities, other state and federal agencies, or other entities, and make other arrangements for land and materials as mitigation of a flooding area where excess material deposition significantly contributes to the flooding, consistent with a site-specific flood mitigation plan approved by the commissioner and determined to be in the best interests of the public.
