

**STATE OF ALASKA
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF MINING, LAND, AND WATER
LAND SALES & CONTRACT ADMINISTRATION SECTION**

**FINAL FINDING AND DECISION
Proposed Change in the Method of Conveyance
for the Future Sale of 680 Parcels Statewide
AS 38.05.045**

This Final Finding and Decision is intended to complement and update the Preliminary Decision dated December 4, 2013. The proposed decision to change the method of conveyance for the future sale of the 691 parcels of State-owned land as detailed on Attachment A: List of Parcels and Attachment C: Map of Parcel Locations has had the required public review.

Attachment I: Amended List of Parcels

Attachment II: Preliminary Decision

I. Proposed Action

As detailed in Attachment II: Preliminary Decision, the State of Alaska, Department of Natural Resources, Division of Mining, Land, and Water proposed to change the method of conveyance for the future sale of the 691 parcels of State-owned land. This Final Finding and Decision serves as an amendment, update, and complement to prior Final Finding and Decisions for the project areas within which these parcels are located, so as to change the method of conveyance (where needed for uniformity and to conform to current statutes and regulations) and to provide notice to the public of the State's intention to dispose of these parcels in a future, public auction. If the parcels do not sell when offered at auction, they may be offered by another method under AS 38.05.045 Generally [Sale of Land].

The scope of this decision is limited to the following proposed actions:

1. to change the method of conveyance (where needed for uniformity and to conform to current statutes and regulations) and to provide notice to the public of the State's intention to dispose of these parcels in a future reoffering;
2. to identify three parcels (ADLs 201209, 228872, and 228873 in the Beaver Creek Subdivision near Kenai, Alaska) as commercial or industrial land for the purposes of exercising authority under *AS 38.05.055 Auction Sale or Sealed-Bid Procedures* to allow nonresidents and businesses to compete with Alaska residents to purchase the parcels, when next reoffered; and
3. to clarify existing authority under *AS 38.05.055* to exercise discretion to offer land "at not less than 70% of the appraised value".

The parcels are located throughout the State and vary in size up to 40 acres. Many of the parcels encompassed by this decision were offered and contracted for sale through previous State land disposal programs, but were subsequently returned to State ownership through relinquishment or by contract termination. The remaining parcels were identified and surveyed

Final Finding and Decision

Proposed Land Offering

Page 2 of 6

either administratively or after a relinquished or terminated lease period under another land disposal program. All of the parcels in this proposal have previously been through a complete decision process that included public notice and review. For more specific information on each parcel, refer to Attachment II. There are no associated actions with this proposal.

II. Authority

The State of Alaska, Department of Natural Resources has the authority under *AS 38.05.045 Generally [Sale of Land]* to sell State-owned land if, on preparation and issuance of a written finding, it is determined to be in the best interest of the State, as required by *AS 38.05.035(e) Powers and Duties of the Director*.

III. Agency Comments

An agency review to gain additional information, expertise, and comment was conducted concurrently with the public comment period. The agency review period began December 5, 2013 and ended January 6, 2014. The following Agency comments were received:

State of Alaska, Department of Natural Resources (DNR), Division of Forestry Comment (DOF):

DOF responded with their observations that access would likely influence wildfire response capabilities, and that various locations may have firewood collection demands. DOF also recommends that the State advise new parcel owners of fire risks, and provide them with information including the fire management plan, local wildland fire agency information, and information about their access and water availability.

“...Access is especially important for those parcels that are located within a municipality or a borough. Although the parcels are not located within structure fire department service areas, many of the landowners expect fire protection. Parcels without current road access, even if platted, are difficult to protect. Several of the proposed re-offered parcels are located in these subdivisions that have little or no access roads.”

“ all parcels are at risk from wildland fire, even those parcels that have previously burned, are located next to a lake, or parcels located in a community or borough. In general, the State handout [Firewise Alaska] advises all new parcel owners of their fire risks.”

“the main concern with re-offering the parcels is the increased number of private landowners needing natural resources. A main resource is timber that is utilized for building and for heating. I believe that many of the parcel landowners who harvest nearby trees do not know who own that lands or that they are required to obtain a permit. Forestry has been receiving an increasing number of wood theft/ trespass reports.”

LSCAS Response: Although these concerns are outside the scope of changing the method of sale, we have noted the comments. The land sales brochure has historically contained and will continue to contain:

- descriptions of the fire protection risk involved in land ownership, particularly in rural and remote areas with limited access;

Final Finding and Decision

Proposed Land Offering

Proposed Change in the Method of Conveyance for the Future Sale of 680 Parcels Statewide

Page 3 of 6

- statements stressing the importance for potential landowners to learn about surrounding land ownership and legal access; and
- statements stressing compliance with generally allowed and other uses, including firewood gathering with and without permit on State-owned land.

State of Alaska, DNR, Division of Agriculture Comment: The “discount” term should be clarified in the document to make sure that which discount, and who is eligible for it is clear. The parcel ADL 416420 in Fairbanks Odd Lots should have further investigation into its classification; it may be subject to agricultural covenants.

LSCAS Response: Clarification and explanation of the Veterans Discount, as well as parcels which are sold under AS 38.05.055 “at no less than 70% of the appraised value” will be contained in the Land Sales Brochures. Potential Bidders and applicants will be provided clear instructions regarding any discounts. Fairbanks Odd Lots ADL 416420 has been removed from this decision; this is documented in Attachment I: Amended List of Parcels for further information.

No other agencies responded with comments or responses.

IV. Summary of Public Notice and Comments

Pursuant to AS 38.05.945 Notice, we conducted a notice period soliciting public comment for at least 30 days between December 5, 2013 and January 6, 2014. To this end, a legal notice inviting public comment was posted on the State of Alaska, Department of Natural Resources and Land Sales website, and the Alaska Online Public Notice System website for at least 30 consecutive days during the public notice period. Notices were mailed to cities and affected Boroughs, as well as regional and village corporations. Additionally, notices and a request to post for 30 days were mailed to postmasters and librarians around the State. The public notice stated that written comments were to be received by 3:00PM, January 6, 2014 in order to ensure consideration and eligibility for appeal. For more information, refer to Attachment II: Preliminary Decision.

No comments were received during the public comment period.

V. Traditional Use Findings

For those parcels located within an organized borough, a traditional use finding is not necessary.

For those parcels located within the Unorganized Borough, a traditional use finding is required under AS 38.05.830 Land Disposal in the Unorganized Borough. The proposed disposal and use of these parcels is consistent with past land uses within and around the proposed parcels. Several parcels were already sold under prior offerings, but were subsequently returned to State ownership through relinquishment or by contract termination. The remaining parcels were identified and surveyed either administratively or after a relinquished or terminated lease period under another land disposal program. All of the land in this proposal has been through a previous, complete notice, review, and decision process. It is therefore anticipated that the sale

Final Finding and Decision

Proposed Land Offering

Proposed Change in the Method of Conveyance for the Future Sale of 680 Parcels Statewide

Page 4 of 6

of these parcels will not change the traditional uses evident in their respective areas. There were no conflicts identified through the public notice process for this action.

VI. Modifications to Decision and/or Additional Information

The following modifications have been made to the proposed action described in Attachment II: Preliminary Decision.

1. The parcel list has been updated to reflect correct legal and land status descriptions.
2. 11 parcels were withdrawn from the original proposal because they may require other actions prior to offering. These parcels were located in Goldstreak, Willow Creek, Fairbanks Odd Lots, Delta Homesites, Kokomo Creek II Remote, and Desperation subdivisions.

See Attachment I: Amended List of Parcels for updated list of parcels and their related classification information.

These changes are not considered a significant change to the Preliminary Decision and therefore new notice is not required.

Recommendation follows.

Final Finding and Decision

Proposed Land Offering

Proposed Change in the Method of Conveyance for the Future Sale of 680 Parcels Statewide

Page 5 of 6

VII. Final Finding and Decision

Changing the method of conveyance on these parcels to offer them for sale through a public auction will provide a method for DNR DMLW to help meet the obligations laid out in the Constitution and statute. The lands affected by this decision have been deemed appropriate for settlement through a previous public process and these parcels were previously identified as appropriate for sale through past decisions. Additionally, the findings presented above were reviewed and considered and an updated public notice was conducted accordance with AS 38.05.945 Notice. Only minor, non-significant modifications were presented in this Final Finding & Decision since the issuance of the Preliminary Decision, as described in the preceding Modifications to Decision and/or Additional Information section of this document.

The case file has been found to be complete and the requirements of all applicable statutes have been satisfied. The proposed actions are consistent with constitutional and statutory intent for State-owned land and this action is undertaken under relevant authorities. The recommended actions are consistent with the overall management intent for State-owned land; potential changes to public resources and the public interest as a result of the proposal are acceptable; and there were no objections to the proposal. It is therefore the finding of the Director of the Division of Mining, Land, and Water that it is in the best interest of the State of Alaska to proceed with the proposed action under AS 38.05 Alaska Land Act, as described herein, including any modifications and additional information noted.

Appeal Provision

A person affected by this decision who provided timely written comment or public hearing testimony on this decision may appeal it, in accordance with 11 AAC 02. Any appeal must be received within 20 calendar days after the date of "issuance" of this decision, as defined in 11 AAC 02.040(c) and (d) and may be mailed or delivered to the Commissioner, Department of Natural Resources, 550 W. 7th Avenue, Suite 1400, Anchorage, Alaska 99501; faxed to 1-907-269-8918, or sent by electronic mail to dnr.appeals@alaska.gov. If no appeal is filed by that date, this decision goes into effect as a final order and decision on the 31st calendar day after the date of issuance. An eligible person must first appeal this decision in accordance with 11 AAC 02 before appealing this decision to Superior Court. A copy of 11 AAC 02 may be obtained from any regional information office of the Department of Natural Resources.

PRELIMINARY DECISION

**Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
*AS 38.05.045***

COMMENT PERIOD ENDS 3PM JANUARY 6, 2014

I. Proposed Actions and Amendments and Scope of the Decision

The State of Alaska, Department of Natural Resources, Division of Mining, Land, and Water issues this Preliminary Decision as an amendment, update, and complement to prior Final Finding and Decisions that originally authorized the sale of various project areas statewide within which 691 parcels identified herein are located.

Attachment A: List of Parcels

Attachment B: Public Notice

Attachment C: Map of Parcel Locations

The scope of this decision is limited to the following proposed actions:

1. to change the method of conveyance (where needed for uniformity and to conform to current statutes and regulations) and to provide notice to the public of the State's intention to dispose of these parcels in a future reoffering;
2. to identify three parcels (ADLs 201209, 228872, and 228873 in the Beaver Creek Subdivision near Kenai, Alaska) as commercial or industrial land for the purposes of exercising authority under *AS 38.05.055 Auction Sale or Sealed-Bid Procedures* to allow nonresidents and businesses to compete with Alaska residents to purchase the parcels, when next reoffered; and
3. to clarify existing authority under *AS 38.05.055* to exercise discretion to offer land "at not less than 70% of the appraised value".

For the first proposed action, all of the parcels in this proposal have previously been through a complete decision process that included public notice and review. Many of the parcels encompassed by this decision were offered and contracted for sale through previous State land disposal programs, but were subsequently returned to State ownership through relinquishment or by contract termination. The remaining parcels were identified and surveyed either administratively or after a relinquished or terminated lease period under another land disposal program. As described in **Section IV. History** of this document, many of these programs are no longer in place or the statutes may have been repealed. DNR DMLW proposes to reoffer the parcels for sale under a uniform set of statutes governed by *AS 38.05.045 Generally [Sale of Land]*. DNR DMLW does not intend to impose deed restrictions to control post-patent land use. DNR DMLW will not be in charge of controlling or preventing such uses, which would be governed by local zoning, where it exists, and civil laws, regulations, and ordinances.

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 2 of 10

For the second proposed action, as one of the available methods of sale under *AS 38.05.045*, *AS 38.05.055 Auction Sale or Sealed-Bid Procedures* states that only qualified Alaska residents (defined as “a resident of the state for at least one year immediately preceding the date of the sale”) may purchase land that is “other than commercial, industrial, or agricultural” when reoffered under this statute. If the parcels are reoffered under this method of conveyance, all but three parcels in this decision would invoke this Alaska-resident preference. The remaining parcels are ADLs 201209, 228872, and 228873 in the Beaver Creek Subdivision near Kenai, Alaska. These parcels are located in an area zoned by the City of Kenai as “General Commercial”. Given the zoning, exposure, visibility, and proximity to the Kenai Spur Highway, these parcels have commercial or industrial potential and a corresponding highest and best use determined by recent appraisal. For this reason, if these parcels are reoffered at auction in a future offering, we propose to allow residents, businesses, and non residents alike to compete to purchase the parcels. By opening these parcels up to a larger competitive pool, it is more likely that the bidding will result in a price reflective of the sites’ commercial or industrial uses. Of note, however, these three parcels are also designated as School Trust and thus the proceeds from the sale of these lots would be subject to inclusion in the corresponding fund.

For the third proposed action, *AS 38.05.055* states that land shall not be sold at not less than 70% of the appraised value. Some of the prior Final Finding & Decisions may have specified that the parcels would be sold at market value, indicating no reduction in price could be given beyond *AS 38.05.940 Land Purchase Price Discount for Veterans*. DNR DMLW wishes to exercise discretion authorized under *AS 38.05.055* to reoffer parcels at less than full market value in an effort to increase marketability and liquidate some inventory to fund future developments and disposals for the continued availability of State-owned land for purchase under the existing programs. If this proposal is approved, the discount available to qualified Alaska veterans under *AS 38.05.940* may still be available depending on the costs to create the parcel relative to the purchase price and the eligibility of the winning bidder, as delineated in statute. As previously discussed, if reoffered for sale under *AS 38.05.055*, the sale of land “other than commercial, industrial, or agricultural” would be permitted only to qualified Alaska residents. Thus the discount would not be available to non residents or businesses for 688 of the parcels in this Preliminary Decision, but the three parcels identified in the second proposed action above could be discounted regardless of the winning bidder’s standing as an Alaska resident, non resident, or business, should DNR DMLW see fit to reoffer these parcels at a discount. It is possible parcels offered below market value could still be bid up to higher prices. Additionally, if the parcels are reoffered under another method under *AS 38.05.045*, the parcels would be reoffered at market value, regardless of the buyer’s standing as an Alaska resident, non resident, or business.

Pursuant to *AS 38.05.945 Notice*, the public is invited to comment on these proposed actions and amendments. See Section VIII Submittal of Public Comments and Attachment B: Public Notice for details on how to submit a comment for consideration. If, after consideration of timely written comments, this proposed action is approved, the Department will issue a Final Finding and Decision without further notice, except to those that provide timely, written comment. The failure to approve any one action in this decision shall not affect the other proposed actions. Likewise, the failure to approve a proposal specific to any specific parcel(s) shall not affect the approval of the actions for any other parcels in this decision. That is to say that a valid concern

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 3 of 10

regarding fewer than the entirety of the parcels listed in this decision will not preclude the Division from offering or selling the remaining parcels.

II. Authority

The State of Alaska, Department of Natural Resources has the authority under *AS 38.05.045 Generally [Sale of Land]* to sell State-owned land if, on preparation and issuance of a written finding, it is determined to be in the best interest of the State, as required by *AS 38.05.035(e) Powers and Duties of the Director*.

III. Administrative Record

The administrative record for the proposed actions consists of the individual project and case files for each parcel identified with a separate Alaska Division of Lands (ADL) number in Attachment A: List of Parcels, as well as relevant area plans, Preliminary Decisions, and Final Finding and Decisions for each their parent project areas.

IV. History

The following descriptions summarize the programs under which the parcels may have been offered in the past:

- Public Outcry Auctions: In the 1960s and early 1970s, DNR leased or sold subdivided parcels of land, mostly by public outcry auction.
- Sales of Future Borough Land: From 1964 to 1975, DNR subdivided and sold parcels for land proposed to go to new boroughs to jump start the new boroughs' income streams.
- Open-to-Entry Staking Program: Between 1968 and 1973, the State's first "stake-it-yourself" program allowed people to stake, survey, and purchase their own parcel of land in designated staking areas.
- Homesite Program: Started in 1977, the State's first "prove-up" program allowed Alaskans to build a dwelling and occupy the land for a certain number of years. If they completed the requirements, they only paid the costs to survey and plat the parcel to complete the purchase of the parcel from the State.
- Lottery Sales: In the late 1970s, DNR was directed by the legislature to sell State-owned land by lottery.
- Remote Parcel Program: In the late 1970s, the Open-to-Entry Staking Program was restructured and became the Remote Parcel Program. This program has since been discontinued and the statutes that authorized this program were repealed. Therefore, the possibility of reoffering parcels as originally intended under the remote parcel program is no longer an option.
- Homestead Program: In 1984, this program replaced the Remote Parcel Program. The Homestead Program allowed participants to stake larger parcels and included an agricultural "prove-up" option.
- Long-Term Residential Lease/Preference Right Parcels: Some parcels were originally issued for long-term residential lease with a preference right to purchase. DNR no longer offers this type of residential lease.
- Remote Recreational Cabin Sites: In 2001, DNR began offering this current "stake-it-yourself" program. Under *AS 38.05.600 Remote Recreational Cabin Sites* authorizes

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 4 of 10

Alaskans to select and stake Remote Recreational Cabin Sites in designated areas at designated times. Authorizations are awarded through a drawing that gives all eligible participants an equal chance at acquiring a staking authorization for an area. Occasionally, parcels surveyed under this program return to State ownership through relinquishment or termination. Additionally, Administrative Parcels were created by DNR DMLW staff during Remote Recreational Cabin Sites offerings to:

1. reduce per-parcel survey costs by increasing the number of parcels included in a State-issued survey contract;
2. survey desirable parcels bounded by existing parcels and natural features where the additional parcel does not increase mobilization costs or costs associated with setting additional monuments;
3. complete survey of previously staked parcels when monuments have been set; and
4. maximize the number of parcels allowed under the decision to offer the staking area.

Sales of parcels under the related regulations, *11 AAC 67.815 (b) Offering Remote Recreational Cabin Sites* require purchasers to reimburse the Division for the cost of surveying, platting, and appraising the site within 30 days of being notified of a successful purchase, in addition to the usual minimum down payment. That is to say, that the State would not finance the reimbursable survey, platting, and appraisal costs. To maintain this requirement without allowing for the differing method of sale of subdivided parcels under *AS 38.05.045* would create an unrealistic burden upon purchasers and hinder the marketability of the property. This proposal seeks to eliminate this potentially cumbersome requirement and create uniformity across the reofferings.

V. Description

A summary of pertinent identifying information is included on Attachment A: List of Parcels. Due to the varied nature, broad geographic reach, and limited scope of this proposal as a complement to prior Decisions, we will not delineate detailed, parcel-specific data. For items such as USGS map coverage, coastal issues, topography, geologic hazards, seismic activity, soils, vegetation, fire hazards, flood zones, tides, anadromous waters, other constraints, detailed legal descriptions, etc., the individual, hard copy case files and the online Land Administration System (LAS) at <http://dnr.alaska.gov/projects/las/> and may be accessed by the parcels' ADL numbers provided. Where known, pertinent information will also be made part of the brochures in which the parcels will be advertised. DNR DMLW strongly encourages any persons interested in purchasing a reoffered parcel to first visit the site so that they have a good understanding of the unique features and characteristics of each parcel.

Legal Descriptions: See Attachment A: List of Parcels for parcel-specific information. While full legal descriptions are not listed, Attachment A does list identifying information for the parcels' lot, block, tract, location (Meridian, Township, Range, Section and Boroughs/Municipalities), plat, and recording district, where applicable.

Boroughs/Municipalities: See Attachment A: List of Parcels for parcel-specific information.

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 5 of 10

Native Regional and Village Corporations: Relevant Native Regional Corporations will be notified of this proposal during the public notice process.

Title: All parcels will have a current title report completed before they are reoffered for sale. This will ensure that all parcels are free and clear from any cloud on title at the time of reoffering.

Tentatively Approved Lands: The State of Alaska may not yet have received final patent from the Federal government for some of the land in these reofferings. Title for parcels on tentatively approved lands will be conditioned upon the State of Alaska receiving patent from the Federal government. In accordance with *11 AAC 67.015 Land Available*, in addition to selling, leasing, or granting patented land, DNR DMLW may conditionally sell, lease, or grant land that has been tentatively approved by the Federal government for patent to the State, but that is not yet patented. DNR regulations provide that if for any reason the State of Alaska is denied patent to the land, a sale, lease, or grant on this conditional basis will be canceled and the money paid to purchase the land will be refunded. The State of Alaska has no further liability to the purchaser, lessee, or any third party for termination of the contract. Money paid to the State to purchase such land will be refunded, or may be applied to the purchase of another parcel. Additionally, the State is in no way liable for any damage that may be done to the land by the purchaser, lessee, or grantee, or liable for any claim of any third party or for any claim that may arise from ownership. If the State does receive title to the land, as anticipated, the conditional sale, lease, or grant then has the same effect as other sales, leases, or grants.

Title to tentatively approved lands will be conveyed via quitclaim deed. Ordinarily, there is little risk of loss of title associated with tentatively approved lands, however, there may be practical problems including:

1. title insurance companies might not provide title insurance unless this contingency is "excepted" from coverage; and
2. banks might not loan money for construction on, or the purchase of tentatively-approved lands.

DNR DMLW strongly encourages any persons interested in purchasing a reoffered parcel to fully investigate these matters prior to purchase.

Retention of and Access to Mineral Estate: In accordance with *Section 6 (i) of the Alaska Statehood Act* and *AS 38.05.125 Reservation [of Rights to the State]*, the State retains ownership of the mineral estate that may be in or upon the land that it sells. This retention is for all minerals, including both locatable minerals (such as gold, copper, and silver) and leasable minerals (such as oil, gas, coal, ore, minerals, fissionable material, geothermal resources, and fossils).

The State and its successors reserve the right to enter onto the land for the purposes of exploring for, developing, and producing these reserved mineral resources. Access reserved to these retained interests is superior to any and all surface uses. The State may also lease these retained interests to mineral developers or allow mining locations to be

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 6 of 10

staked. However, *AS 38.05.130 Damages and Posting of Bond* also provides that the owner of the land estate will be compensated for damages resulting from mineral exploration and development.

Planning and Classification: The parcels are spread throughout the State and are classified by, and subject to, a variety of area plans, management units within those plans, and classification orders. The parcels have been classified as Settlement lands or an equivalent classification according to *11 AAC 55.277 Existing Classifications*. See Attachment A: List of Parcels for parcel-specific area plan information. The proposed reoffering of these parcels is consistent with area-wide land management policies and general management intent of the area plans and their specific management units.

Mineral Orders: All parcels have been closed to mineral entry via mineral orders. Mineral orders that close an area to mineral entry, where they have been established, close that area to new exploration and development of locatable minerals such as gold, copper, platinum, etc. Such mineral orders do not apply to non-locatable minerals, including oil and gas leasing, coal leasing, shallow gas leasing, or exploration licensing for such, nor do they preclude reasonable land estate access to these resources. However, *AS 38.05.130 Damages and Posting of Bond* stipulates that the land estate owner will be compensated for damages resulting from exploration and development. See Attachment A: List of Parcels for specific mineral order information.

Mining activity would be incompatible with the proposed land disposal. To allow new mineral location within the boundaries of the parcels encompassed by this decision could create serious conflicts between land estate and mineral estate users. Area plan mineral estate management policy states that, in general, areas scheduled for disposal will be closed to mineral entry prior to sale to minimize potential conflict between land and mineral estate users. When appropriate, land sales brochures generally note mineral activity identified in the vicinity of an offering.

Reservation of Mineral Estate: In accordance with *Section 6(i) of the Alaska Statehood Act* and *AS 38.05.125 Reservation [of Rights to Alaska]*, the State, in this decision, reserves unto itself the mineral estate, including oil and gas, and the rights expressed in the reservation clause of the statute, that being the right to reasonable access to the surface for purposes of exploring for, developing, and producing the reserved mineral resources. Exploration and development, that could occur, would be consistent with *AS 38.05.130 Damages and Posting of Bond* and any other applicable statutes and regulations, which provide that the land estate owner be compensated for damages resulting from mineral exploration and development.

Traditional Use Findings: For those parcels located within an organized borough, a traditional use finding is not required.

For those parcels located within the Unorganized Borough, a traditional use finding is required under *AS 38.05.830 Land Disposal in the Unorganized Borough*. The proposed disposal and use of these parcels is consistent with past land uses within and around the proposed parcels and all of the parcels in this proposal have been through a previous, complete notice, review, and decision process. It is anticipated that the resale of these parcels will not change the traditional uses. Should we identify any conflicts through the new public notice process but still

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 7 of 10

find this proposed action to be in the best interests of the State, we will address these issues and proposed mitigation measures in the subsequent Final Finding and Decision.

Access: Access to individual parcels varies. Pertinent access and location information will be part of the brochures in which individual parcels for sale are described. DNR DMLW will ensure that all parcels have legal access prior to sale, yet the access may not be developed. It is the responsibility of the interested party to investigate the existing and allowable access before purchase. DNR DMLW strongly encourages any persons interested in purchasing a parcel to first visit the site so that they have a good understanding of any potential issues concerning the parcel's access.

Easements, Setbacks, and Reserved Areas: Parcels may be subject to a variety of easements, setbacks, and reserved areas. Pertinent information regarding these types of restrictions will be part of the brochures in which individual parcels for sale are described. DNR DMLW strongly encourages any persons interested in purchasing a parcel to visit the site and review all associated documents so that they have a good understanding of any potential issues concerning the parcel.

Hazardous Materials and Potential Contaminants: Interested parties are encouraged to inspect the property and familiarize themselves with the condition and quality of the land. There are no known environmental hazards present within the parcels encompassed by this proposal. However, the State of Alaska makes no representations or warranties, expressed nor implied, concerning the existence or absence of any hazardous substances, hazardous wastes, contaminants, or pollutants on the land proposed for conveyance. The State further assumes no liability for the removal of hazardous substances, hazardous wastes, contaminants, or pollutants, nor for the remediation of the site should such substances be eventually found.

DNR DMLW recognizes there are potential environmental risks when previously vacant land is occupied. Many of the activities increasing these potential risks are regulated by other agencies. Given that this land was specifically designated Settlement for transfer into private ownership, and given the high degree of interest from both the legislature and citizens in transferring State-owned land into private ownership, DNR DMLW is of the opinion that the benefits outweigh the potential risks.

Surveys: All parcels have been surveyed. See Attachment A: List of Parcels for parcel-specific information.

Appraisals: In accordance with *AS 38.05.840 Appraisal*, an appraisal meeting Department standards will be required within two years of the date fixed for the sale for each parcel. Should any parcels have known improvements appraised at \$10,000 or more, those parcels and their improvements will be identified in the brochure if and when the parcels are actually reoffered for resale. Such improved parcels will be managed under *AS 38.05.090 Removal or Reversion of Improvements Upon Termination of Leases* (including those relinquished or terminated from land sale contracts). Purchases of these parcels will require that the successful bidder pay for the improvements, in full, upon notification of apparent high bid or application drawn.

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 8 of 10

VI. Agency Comments

Agency review is being conducted concurrently with the public notice for this Preliminary Decision. If, after consideration of timely written comments, this proposed action is approved, the Department will issue a Final Finding and Decision, addressing all comments received therein. A copy of the Final Finding and Decision will be provided to those that provide timely, written comment.

VII. Submittal of Public Comments

See Attachment B: Public Notice for specific instructions and conditions regarding notice and how to submit comment for consideration.

Pursuant to *AS 38.05.945 Notice*, the Department will issue public notice inviting comment on this Preliminary Decision and any Related Actions. If commenting on more than one proposed action, separate comments should be submitted for each.

In accordance with *AS 38.05.946 (a) Hearings*, a municipality or corporation entitled to receive notice under *AS 38.05.945 (c)* may hold a hearing within 30 days after receipt of the notice. If a hearing is held, the Department Commissioner (or representative) shall attend the hearing. The Commissioner has discretion whether or not to hold a public hearing.

The Division will consider all timely, written comments. If the comments indicate the need for significant changes to the Preliminary Decision or any Related Actions, additional public notice for the affected lands will be given before a Final Finding & Decision is issued. Reducing the amount of land offered and making minor changes to the proposal will not be considered significant changes requiring additional public notice.

The failure to approve any one action in this decision shall not affect the other proposed actions. Likewise, the failure to approve a proposal specific to any specific parcel(s) shall not affect the approval of the actions for any other parcels in this decision. That is to say that a valid concern regarding fewer than the entirety of the parcels listed in this decision will not preclude the Division from offering or selling the remaining parcels.

If the proposal is approved and no significant change is required, the Preliminary Decision, including any deletions, minor changes, and summary of comments and our responses, will be issued as a subsequent Final Finding and Decision without further notice. Related Actions, if any, are developed separately from the proposed primary action of this Preliminary Decision. However, approval and succession of the primary proposed action detailed in this Preliminary Decision are contingent on the completion of Related Actions, as described throughout this document.

Only persons from whom the Department receives timely, written comment during the identified comment period will be eligible to file an appeal of a Final Finding and Decision. Upon approval and issuance of a Final Finding and Decision, a copy of the decision will be made available online at <http://landsales.alaska.gov> and sent to any party who provides timely written comment.

**DEADLINE TO SUBMIT WRITTEN COMMENT IS

Preliminary Decision

Proposed Change in the Method of Conveyance
for the Future Reoffer of 691 Parcels Statewide
Page 9 of 10

VIII. Alternatives and Discussion

DNR DMLW is considering the following alternatives:

- Alternative 1: Approve all proposed actions.
- Alternative 2: Approve only some of the proposed actions.
- Alternative 3: Do not approve the proposed actions.

Article VIII, Section 1 of the Alaska Constitution states, in part, that "...it is the policy of the State to encourage the settlement of its land..." Furthermore, *AS 38.05.045* has placed this charge with the Commissioner of DNR. Alternative 1 provides an equitable method for DNR to help meet the obligations laid out in the Constitution and statute. The lands affected by this decision have been deemed appropriate for settlement through a previous best interest finding with related public process wherein these parcels were previously identified as appropriate for sale. DNR is now conducting a new notice to the public under this proposal to change the method of conveyance for uniformity and compliance with current law and to improve marketability and a greater return to the State to continue to fund land offerings and related development. Alternatives 2 and 3 may not allow the resale of these lands due to changes in statutes, regulations, and policies and thus the lands would be retained. Retention of these parcels would be contrary to the previous processes that identified these lands as appropriate for disposal and would inhibit DNR from meeting its Constitutional and legislative obligations. For the aforementioned reasons, Alternative 1 is the preferred alternative.

Recommendation follows.

IX. Recommendation

This Preliminary Decision for the proposed actions described throughout this document and its attachments are consistent with the overall management intent for State-owned land; potential changes to public resources and the public interest as a result of the proposal are acceptable; and these proposed actions are in the best interest of the State. It is hereby recommended to proceed to public notice.
