ATTENTION MAP USERS
The information displayed on these maps is excerpted from the Alaska Resource Data Files as historical mine sites where it is believed hazardous conditions to users or water resources could potentially exist. The sites shown are in no way to be considered as a definitive or complete set of hazardous sites. All abandoned mine sites are best avoided - the "Stay Out and Stay Alive" slogan is much more than mere words. As agencies get the opportunity to evaluate individual mine sites they will be added to, or removed from, these maps. Updates are most likely taking place on an annual basis.
