## INTRODUCTION

This guide provides operators with important safety, regulatory, and legal information for conducting gold dredging off the coast of Nome, Alaska. The guide does not include every rule, regulation, or permit in full. Materials presented here may change. Permits vary depending on the mine plan, equipment size, and area of operation. No single guide can provide the appropriate process for permitting every operation. Additional information, on a case by case basis, will be necessary to ensure that you have the proper permits and safety equipment for your specific operation. This guide includes relevant agency contacts and web links following each subject. Please check with online and agency resources for the most up to date information.

**THE DEADLINE FOR FILING PERMITS TO MINE IN THE PUBLIC MINING AREAS IN NOME IN 2014 IS MAY 31.**

**NO APPLICATIONS FOR THE 2014 MINING SEASON WILL BE ACCEPTED FOR THESE AREAS AFTER THAT DATE.**

**THE CITY OF NOME WOULD LIKE TO REMIND MINERS THEY ARE RESPONSIBLE FOR THE REMOVAL OF ALL CAMPING AND OPERATION DEBRIS, TRASH, AND EQUIPMENT AFTER THEY SUSPEND THEIR OPERATION.**

## GENERAL

### NOME

Nome is located on the southern coast of the Seward Peninsula in Norton Sound. The population is approximately 3,700. There are currently no roads to Nome, although a regional network of roads extends to neighboring communities. Nome is accessed by air and barge services. Additional sources of information about Nome can be found through the convention and visitor's bureau, the City of Nome, and the local paper, *The Nome Nugget*.

- Nome Convention and Visitors Bureau <http://www.visitnomealaska.com/index.html>
  - Gold Dredging <http://www.visitnomealaska.com/nome-gold-dredging.html>
- City of Nome <http://www.nomealaska.org/>
- *The Nome Nugget* <http://www.nomenugget.net/>

### NOME OFFSHORE PUBLIC MINING AREA DREDGING

Suction dredging is a popular form of recovering gold from placer gravels in freshwater streams and in marine sediments. Suction dredges are categorized by the size of the intake hose (nozzle) and horsepower of the pump engine. The Department of Natural Resources (DNR) provides a fact sheet with further information about suction dredging in Alaska. DNR provides additional information for those who are interested in gold dredging specifically in the area offshore of Nome. DNR has three Public Information Centers (PIC) where information may be sought in person or over the phone. The PICs are in Juneau, Fairbanks, and Anchorage. General information in this document is typically followed by specific agency contacts. Where that is not the case, the PIC is the best source for additional information.

The East and West Nome Beach Public Mining Areas are the only areas where people are allowed to suction dredge for gold on public land offshore of Nome without a mining lease. Commercial operations are not allowed in these areas. DNR has specific rules for mining in the Nome public mining areas. A map and coordinates depicting these areas are also available from DNR. Although some information from the following documents is summarized in this guide, please refer to the documents in their entirety to ensure a safe and legal offshore dredging season in Nome.

## STIPULATIONS AND PERMITS

### PERMIT STIPULATIONS FOR THE NOME EAST AND WEST BEACH PUBLIC MINING AREAS

Generally, the permit stipulations will apply in both public mining areas at Nome. The stipulations will be as follows:

No individual or association of individuals or a company may hold an interest in the operation of more than one suction dredge in the two public mining areas combined. The intent of this stipulation is to prevent any individual, association of individuals, or company from leasing out a number of dredges to be operated in the public mining areas and retaining a royalty on production from the dredges. Individuals or companies may rent multiple dredges for use in the public mining areas, but the dredges must be rented at a set rental rate, with no royalty on production.

#### West Beach Public Mining Area

- Suction dredge miners will be limited to six-inch or less suction nozzles with no more than 23 horse power pump engines. This limitation is to maintain the small/recreational mining character of the public mining area, and to extend the life of the resource in the new area.

#### East Beach Public Mining Area

- Suction dredge miners will be limited to eight-inch or less nozzles with no more than 46 horse power pump engines. These conditions and limitations have been in place for this area for several years now.

#### Both East and West Nome Beach Public Mining Areas

- Miners must maintain a minimum 75 feet distance between dredges. The first miner on site establishes their position; miners arriving later must locate with no part of their operation, dredge, anchors, or divers less than the separation distances cited above from prior miner's dredges.
- There is no winter (under-ice) dredging allowed in the East and West Recreation areas. Winter dredging is only allowed on leases and mining claims.
- Suction dredges are only allowed in the two offshore recreational mining areas when occupied by the miner. Miners may not leave their suction dredge anchored in the recreational areas and go ashore.
- Floating suction dredge or a stationary high banker operated below the mean high tide is the only equipment allowed in the recreational mining areas. Tracked, wheeled and mechanical equipment are not allowed.
- Miners may not leave their suction dredge anchored overnight unless they are on the dredge during the night.
- Miners may not leave any type of marker to secure a location for their exclusive mining on future days.
- A miner only occupies a location while their dredge is on that location and they are in operation.
- The miner must be in the water. All of the uplands at Nome are privately owned. Avoid submerged claims.
- Any miners mining or camping on the beach or tundra above the beach will be in trespass unless they have permission from the land owner. Trespass is not allowed and is grounds for revocation of a miner's permit.
- Permits can be revoked for failure to follow stipulations or for aggressive behavior.
- Miners operating in either of the public mining areas will confine their operations to those public mining areas. Miners will not venture outside of the public mining areas without the written permission of existing adjacent lease holders. (Lease areas are discussed following the permit section.)

- Upon reasonable evidence that a miner operating in either of these two recreational areas is not in compliance with the above stipulation requirements, the miner's permit may be revoked and the miner will not be allowed to operate in the recreational areas.
- Offshore dredge operators do not have exclusive use of the Nome offshore. Small and slow-moving, suction dredges present a navigational hazard to harbor traffic and fisherman.

### ENVIRONMENTAL MONITORING

Monitoring will be required based on the size of suction dredge or other mining method and water depth. In addition to DEC requirements, the following are minimum monitoring requirements:

- The permittee must maintain a daily log for each piece of mining equipment (i.e. suction dredge, mechanical dredge) containing accurate GPS coordinates defining boundaries of mined areas, total acreage, water depths, and substrate type (i.e. sand, gravel, cobbles etc.) disturbed by mining. Logs must be made available to the authorized officer or a representative for inspection.
- All logs must be submitted to DNR with annual reclamation statements. Copies are acceptable.
- Turbidity must be monitored in accordance to DEC APDES Monitoring Requirements.

Additional monitoring may be required by the authorized officer on a case-by case basis to address particularly sensitive environments or to avoid, minimize or mitigate significant adverse impacts.

### NOME OFFSHORE LEASES

On September 28, 2011, DNR held a competitive sale for offshore mineral leases at Nome. Lease tracts had not been offered for this offshore area since 1999. Bids were submitted by a range of individuals and companies, from small scale miners to larger, international corporations. Miners operating in either of the public mining areas (East and West Nome Beach) must confine their operations to those public mining areas. You may not mine on leases or mining claims without an operator authorization from the lease holder or claim owner that has been approved by DNR. It is the applicant's responsibility to uphold and maintain a current operator authorization for the life of a Multi-Year Application for Permits to Mine in Alaska (APMA – described in detail in the Permits section.) Failure to maintain an operator authorization form may result in a delay or revocation of an existing APMA. Under-ice dredging is only allowed on leases and mining claims and only in depths not to exceed 30 feet.

- 2011 Nome Offshore Mining Lease Sale Tract Location Map

- 2011 Nome Offshore Lease Coordinates  
<http://dnr.alaska.gov/mlw/mining/nome/2011NomeOffshoreLeaseCoordinates.pdf>

### PERMITS

The following permits, licenses, and rules apply for all sizes of suction dredge operations in East and West Nome Beach Public Mining Areas. Six-inch or smaller suction dredges with no more than 18 hp engines operating outside either the East or West Public Mining Areas do not require a Miscellaneous Land Use Permit (MLUP); however, they do require a General Permit from the Department of Environmental Conservation.

### Application for Permits to Mine in Alaska

An Application for Permits to Mine in Alaska (APMA) will be required for all sizes of dredges in both public mining areas. The APMA allows an applicant to file for permits from state and federal agencies using a single application. The APMA process is dependent on the location and type of operation submitted in your application. This requirement will allow the DNR to revoke permits for miners who do not follow the aforementioned stipulations for operating in the public mining areas.

- A \$150 processing fee must accompany the application for the first year. The APMA may be filed for a period of up to five years, with an additional fee of \$50 for each additional year.
- This is the coordinated effort for permitting oversight by multiple agencies with DNR as the lead.
- The APMA needs to be completed and approved annually. However, for multi-year APMA's only the Reclamation Plan, annual Reclamation Statement (due no later than December 31), and Bond Renewal (if applicable) need be submitted each year after the first year.
- Additional information may be required for permits issued by the Alaska Department of Environmental Conservation (DEC), the Alaska Department of Fish and Game-Division of Habitat (ADFG), and the U.S. Army Corps of Engineers (USACE).
- Permits are subject to revocation if trespassing, or if any rules, regulations, or stipulations are not followed.
- Miners must display the last four digits of their APMA number. The numbers must be at least 16 inches high and 10 inches wide and visible on the shoreward side of the dredge at all times.
- Miners must maintain a 300 foot buffer from any part of a set net; if your operation is mechanical or uses an eight inch or larger nozzle you must maintain a 500 foot buffer from set nets.

Applications for the following permits are applied for through the APMA process described above.

**Department of Natural Resources (DNR)**

The Miscellaneous Land Use Permit (MLUP) authorizes temporary use of state land or resources.

**Department of Fish and Game Office (F&G)**

**Fish Habitat Permits**

Any activity or project that is conducted below the ordinary high water mark of any fish bearing water body requires review by F&G. All activity in anadromous waters requires a Fish Habitat Permit, and any activity that could impede fish passage in a resident fish stream also requires a Fish Habitat Permit.

**Anadromous Stream Restrictions**

- As a general rule, all mining is prohibited year-round within the 0.5 mile distance (radius) from any anadromous river mouth. Additionally, for 10 inch and larger suction dredge or mechanical placer mining operations, such as an excavator on a barge, mining within the 1 mile distance (radius) of any anadromous river mouth between the annual dates of June 1 – July 15 is prohibited. Exceptions to these mining prohibitions for the following anadromous rivers are as follows:
  - Mining offshore of the mouths of the Snake River, Penny River and Cripple River, between the annual dates of September 15 to December 1, is allowed to a distance of 500 feet from the mouth of these rivers.
  - At no time, from September 15 to December 1, may any mining operation be closer than 500 feet to these three river mouths.

Ph 907-459-7289; Fax 907-459-7303

Website <http://www.adfg.alaska.gov/index.cfm?adfg=habitatregulations.prohibited>

**U.S. Army Corps of Engineers (USACE)**

A USACE permit could be required for:

- Mechanical land clearing
- Backfilling
- Mine cuts
- Construction of a stream diversion
- Some road construction activities
- Suction dredging in a stream or offshore

## Alaska Department of Environmental Conservation (DEC)

### Water Quality

A wastewater discharge permit is required for dredging.

- Suction dredges and mechanical dredges can be covered under one of the following general permits.
  - Small Suction Dredge General Permit (dredges with nozzles less than or equal to six-inches)
  - Medium Suction Dredge General Permit (dredges with nozzles greater than six-inches and less than or equal to ten-inches)
  - Large Dredge General Permit (suction dredges with nozzles greater than ten-inches and mechanical dredges)
- All suction dredges shall
  - Maintain a copy of the permit on the dredge;
  - Avoid dredging of concentrated silt and clay that creates significant turbidity;
  - Ensure that turbidity plumes do not overlap with plumes from other active dredges; and
  - Not mine when sea ice is present, unless otherwise authorized (see below).
- Suction dredges with intake nozzle diameters larger than six-inches or with pump engines greater than 23 horsepower and mechanical dredges must keep daily records of turbidity monitoring and submit an annual report to DEC before January 31.
- Under-ice operation is restricted as follows.
  - Suction dredges with intake nozzle diameters less than or equal to six-inches, greater than six-inches, and less than or equal to ten-inches:
    - Allowed, provided that under-ice operation is indicated on the APMA or on separate application submitted to DEC.
    - Limited to water depths less than or equal to 30 feet.
  - Suction dredges with intake nozzle diameters greater than ten-inches or mechanical dredges:
    - Currently not allowed under a general permit.
    - Must be covered by an individual permit with a separate application process.

### ADDITIONAL DEC INFORMATION AND PERMITS

#### Mercury

If you encounter mercury or other pollutants, do not return them to the water. Mercury is highly toxic, particularly when heated to extract gold. Mercury vapors are released into the air and can be inhaled. Mercury may also be ingested when you eat contaminated food. Dredge permits do not authorize the addition of mercury or other chemicals for the enhancement of mineral recovery.

- DEC Mercury in the Environment <http://dec.alaska.gov/eh/docs/sw/Mercury%20Fact%20Sheet.pdf>
- Department of Health and Social Services (DHSS) Mercury, Gold Mining and Health Fact Sheet <http://www.epi.hss.state.ak.us/eh/MercuryGoldMiningFactsheet.pdf>

### **Solid waste, food service, sewage, and drinking water**

The following permits are not included in the APMA process, but are pertinent if you are applying for a camp permit on state land. A separate application must be submitted to DEC.

If you set up a remote base camp of operations, you may need a solid waste permit for your domestic waste.

Contact:

Neil Lehner

Ph 907-451-2134

Email [neil.lehner@alaska.gov](mailto:neil.lehner@alaska.gov)

Food service, wastewater (sewage), and drinking water permits may also be required. Also note that any hazardous waste encountered or generated by placer mining operations must be shipped out and disposed of at a facility permitted to accept hazardous waste.

## TAXES, RENTS, AND ROYALTIES

### MINING LICENSE TAX

Alaska levies a mining license tax on mining net income and royalties received in connection with mining properties and activities in Alaska. A person engaging in the business of mining in the state must obtain a license from the Department of Revenue. All new mining operations are exempt from the tax for three and one-half years after production begins; however, a mining license must be in possession during that time. To qualify for the exemption an Affidavit of Initial Production must be recorded in the recording district in which the operation is located.

Mining licensees are required to file an annual return that is due before May 1 for the previous calendar year's business.

Anchorage, AK 99501-3566  
Ph (907) 269-1017  
Email [cecilia.licht@alaska.gov](mailto:cecilia.licht@alaska.gov)

### PRODUCTION ROYALTY

Alaska requires a production royalty on all revenues received from minerals produced on state land including in the East and West Nome Beach Public Mining Areas. Minerals produced include any mineral extraction or leached in place from the surface or subsurface and sold or removed from the state. The royalty is three percent (3%) of net income determined under your mining license tax. A production royalty return must be prepared and submitted every May 1 from the previous calendar year. Unlike the mining license tax, new operations are not exempt.

## LABOR AND RENT FOR LEASEHOLDERS

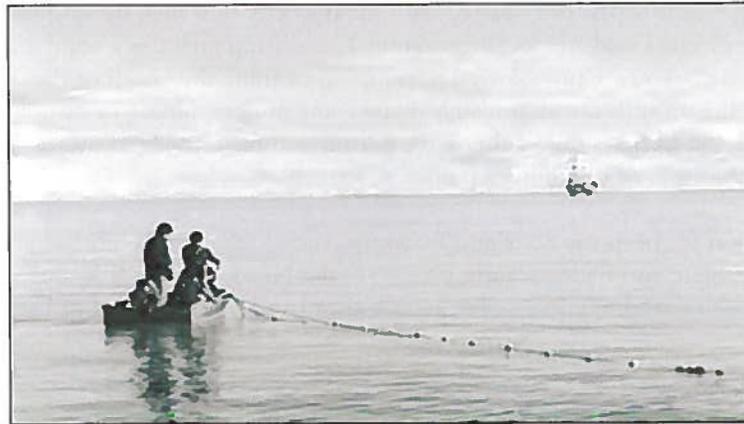

Offshore Nome area leaseholders and claim owners must also file an annual affidavit of labor and pay annual rent.

- Annual Rental Fact Sheet [http://dnr.alaska.gov/mlw/factsht/mine\\_fs/annualre.pdf](http://dnr.alaska.gov/mlw/factsht/mine_fs/annualre.pdf)

## FISHING AND ENVIRONMENT

### SUBSISTENCE AND PERSONAL USE

Norton Sound and Port Clarence residents have relied on fish for cultural and nutritional sustenance for thousands of years. Subsistence and personal use set netting for fish occurs in the East and West Nome Beach Public Mining Areas and other locations offshore of Nome. Set nets are a type of gill net operation where the nets are up to 50 fathoms (300 feet) in length and are anchored at both ends just offshore marked with buoys. Adjacent nets are required to be 300 feet apart. Spin fishing (using a rod and reel) may occur along the drainages up and down the Nome coast.

Deploying or retrieving a set net in Cook Inlet, Alaska. Courtesy of ADF&G.

Offshore mining operators using suction dredge and mechanical placer mining equipment must implement the following buffer around these set nets.

- Miners must maintain a 300 foot buffer from any part of a set net; if your operation uses an 8 inch or larger nozzle or is a mechanical placer mining operation (e.g. excavator with a wash plant on a barge or vessel), you must maintain a 500 foot buffer from set nets.
- As a general rule, all mining is prohibited year-round within the 0.5 mile distance (radius) from any anadromous river mouth. Additionally, for 10 inch and larger suction dredge or mechanical placer mining operations, such as an excavator on a barge, mining within the 1 mile distance (radius) of any anadromous river mouth between the annual dates of June 1 – July 15 is prohibited. Exceptions to these mining prohibitions for the following anadromous rivers are as follows:
  - Mining offshore of the mouths of the Snake River, Penny River and Cripple River, between the annual dates of September 15 to December 1, is allowed to a distance of 500 feet from the mouth of these rivers.
  - At no time, from September 15 to December 1, may any mining operation be closer than 500 feet to these three river mouths.

If a mining operator damages a set net, immediately report the damage to the Department of Fish and Game at 907-443-5167 and Department of Natural Resources at 907-269-8648.

## SPORT FISHING

If you want to take fish for personal use in Southern Norton Sound, you must have a sport fishing license and adhere to all general and special regulations.

## PRIVATE LAND

The land surrounding Nome is privately owned with the majority of it held by various Alaska Native Corporations and the Nome Gold Alaska Corporation. Ownership includes a combination of surface and subsurface rights. As such, you are not allowed to camp on or mine the beach or the uplands of this privately owned land. Because the uplands are all privately owned, any miners mining or camping on the beach or tundra above the beach will be in trespass unless they have permission from the land owner. Trespass is not allowed and is grounds for revocation of the miner's permit.

For contact information for both the State and Federal agencies that may be able to assist you with questions concerning mining on State and Federal lands, please see the Nome Convention and Visitors Bureau webpage <http://www.visitnomealaska.com/nome-gold-dredging.html> and the individual private land owners listed here.

## SUBMERGED CLAIMS

Upland mining claims can extend into tide and submerged lands if at least two claim corners are at or above mean high water. A number of such claims have been located along the north coast of Norton Sound. This is the case both east and west of Nome and the offshore lease tracts.

Sometimes claims are staked improperly or are “paper staked.” In those cases a certificate of location is recorded, but no claim marker has actually been staked on the ground. Prospective miners should be extremely cautious if purchasing upland mining claims. DNR developed a fact sheet to protect yourself when considering the purchase of an existing claim.

- Investigate That Claim Before You Buy [http://dnr.alaska.gov/mlw/factsht/mine fs/investig.pdf](http://dnr.alaska.gov/mlw/factsht/mine_fs/investig.pdf)

## HARBOR

Harbor space will be at a premium during the mining season. You should plan your operation such that you will not require harbor space if at all possible. Vessels should have their own trailer to haulout when necessary (during periods of significant overcrowding, i.e.: storm conditions, low visibility, etc.). Familiarize yourself with the Port Tariff Rules and Regulations, Harbor Moorage Policy, and harbor/river permit requirements. Vessel docking permits must be obtained in advance prior to launching.

All vessels are required to maintain a functioning VHF marine radio onboard at all times. VHF radios are to remain on Marine Channel 16 while traveling within the navigation channel and approach areas. Users must properly communicate with all other marine traffic when traveling in or out of the Nome Harbor.

Tariff rule and regulations and docking permit rates may be found on the port’s website.

Email [port@nomealaska.org](mailto:port@nomealaska.org)

## VESSEL REGISTRATION

Dredges equipped with mechanical propulsion are considered “boats” under both state and federal law, and are subject to the same boating safety equipment and boat registration requirements as other boats. The owner must complete a state registration application and pay appropriate fees to the Department of Motor Vehicles (DMV).

Contact: Department of Motor Vehicles (DMV) Nome Office

214 Front Street #219 (2nd floor of the SITNASUAK Building)

Nome, AK 99762

Ph 907-443-2350

Website <http://doa.alaska.gov/dmv/reg/boat.htm>

Hours:

- Open Monday through Wednesday and Friday 1:15pm - 4:30pm, Closed Thursdays and weekends

## EQUIPMENT REQUIREMENTS AND SAFETY

### U.S. COAST GUARD AND ALASKA REQUIREMENTS

Any floating platform or vessel associated with mining and used to transport persons and equipped with motorized propulsion will be considered a vessel for the purposes of vessel registration and equipment requirements. Mining in marine and navigable waters with a floating vessel is subject to both State and Federal equipment requirements. An individual operating a boat in the State of Alaska must adhere to the following conditions:

- Must carry required equipment (see Alaska Vessel Safety Requirements Summary table on page 15)
- Must register the boat
- Must not operate their boat in a reckless or negligent manner so as to endanger the life or property of another person
- All persons under the age of 13 must wear a USCG-approved personal flotation devices (PFD) / life vests
- Operating a boat under the influence of drugs or alcohol is strictly prohibited.

**MARINE SAFETY INFORMATION BULLETIN 03-14**

**June 6, 2014**

**Vessel Safety Requirements for Offshore Dredge Operations for the Captain of the Port,  
Western Alaska Zone**

- Ref: (a) Title 33 Code of Federal Regulations (CFR) Subchapter S  
(b) State of Alaska Statute AS 05.25  
(c) Title 46 Code of Federal Regulations (CFR) Subchapter C and Subchapter I

**OVERVIEW:** The Coast Guard will continue to promote maritime safety and environmental protection in Nome during the 2014 gold dredging season. This informational bulletin discusses minimum safety requirements for recreational gold dredge vessel operators in coastal Waters under the concurrent jurisdiction the Coast Guard and the State of Alaska Department of Public Safety. Please contact Sector Anchorage to discuss the specifics of your dredging vessel(s) if your operation is other than recreational.

**Definitions:**

- *Vessel: A floating dredge (including jack-up dredges that float into position, excluding crawlers.*
- *Seagoing vessel: A vessel that operates outside of the Nome Harbor.*
- *Motor vessel: A vessel that has an engine of any type for propulsion.*
- *Non-self propelled vessel: A vessel that does not have an engine for propulsion.*
- *Towing vessel: A self-propelled vessel used to push or pull a non-self propelled vessel.*

**SAFETY EQUIPMENT AND OPERATIONS:** As in years past, all seagoing motor vessel dredges less than 300 gross tons must meet the recreational boating safety standards set forth in references (a) and (b). All seagoing motor vessels 300 gross tons and above must meet the safety requirements of reference (c). Operators of non-self propelled vessels requiring a towing vessel for positioning must ensure the towing vessel meet the safety requirements of reference (c). Note that towing vessels 26ft or longer must be operated by a master with an appropriate Coast Guard credential

**DOCKSIDE SAFETY CHECKS:** The Coast Guard will offer voluntary dockside safety checks during limited time periods. Interested operators will be able to sign up through the Harbormaster's Office. While the dockside safety checks are not mandatory, they are strongly encouraged. Passing a dockside safety check may reduce an operator's chances of being involuntarily boarded by the Coast Guard during mining operations.

**AT SEA ENFORCEMENT:** The Coast Guard will conduct underway boardings on dredge vessels off the coast of Nome to ensure compliance with applicable federal regulations. If violations are identified, fines or voyage termination may result.

**MANDATORY POLLUTION REPORTING:** Operators must notify the Coast Guard National Response Center if oil or certain other hazardous pollutants enter the ocean or waters leading to the ocean. This includes pollution spilled on or through the ice during winter dredging. To report a spill, call 1-800-424- 8802.

**EMERGENCIES:** The Coast Guard Sector Anchorage Command Center operates 24/7 and can be reached via marine radio or by calling 907-428-4100.

**WEBSITE:** The Voluntary Dredge Safety Check Safety Equipment Examination checklist, a pamphlet detailing Federal Boating Safety Requirements, and State of Alaska Boaters Handbook can be found on Sector Anchorage's website: <<http://www.uscg.milld17/SectorAnchorage/>>.

**CONTACT:** Coast Guard Sector Anchorage will continue to refine its approach to vessel safety with sensitivity to the unique operating conditions of Nome's expanding gold dredge fleet. Please contact Mr. Kevin Williams at 907- 428-4162 or Lieutenant Brierley Ostrander at 907-428-4164 with questions or concerns.

Sincerely,

PAUL MEHLER III  
Captain, U. S. Coast Guard  
Officer in Charge Marine Inspection,  
Western Alaska

<b>ALASKA VESSEL SAFETY REQUIREMENTS SUMMARY</b>				
<b>Requirements</b>	<b>Boats Under 16 Feet</b>	<b>Boats 16 feet to less than 26 feet</b>	<b>Boats 26 feet to less than 40 feet</b>	<b>Boats 40 feet to less than 65 feet</b>
<b>Personal Flotation Devices (PFD)</b>	One USCG-approved Type I, II, III or V PFD for each person on board. Must be in serviceable condition. Persons under 13 must wear a PFD when in an open boat, on the deck of a boat or when waterskiing.			
<b>Throwable Devices (Type IV)</b>	Recommended but not mandatory.	Except for canoes and kayaks, one USCG- approved Type IV (seat cushion or throw ring) device must be carried.		
<b>Sound Producing Devices</b>	Boats less than 39.4 feet (12 meters) in length must be able to make an efficient sound signal (such as that made with a whistle or horn) to signal intentions and to signal position in periods of reduced visibility.			Boats 39.4 feet (12 meters) or more in length must carry on board a whistle or horn.
<b>Visual Distress Signals</b>	USCG- approved night signals required between sunset and sunrise.	USCG-approved visual distress signals for both day and night time use must be carried. Exception: boats and open sailboats not equipped with mechanical propulsion and under 26 feet in length are <u>not</u> required to carry day signals. <i>Note: Pyrotechnic devices, if used to meet this requirement, must be current, serviceable and readily accessible. At the minimum, a total of three day/night combination devices or three day and three night devices must be carried.</i>		
<b>Fire Extinguishers</b>	At least one USCG-approved B-I required for boats with inboard engines, living spaces, permanent fuel tanks or enclosed storage areas or hull voids not sealed or filled with flotation material.	At least two B-I or one B-II USCG- approved fire extinguishers.	At least three B-I or one B-I and one B-II USCG-approved fire extinguishers.	
<b>Navigation Lights</b>	Display required between sunset and sunrise and during periods of restricted visibility. International configuration required (varies with length and mode of operation). See the International Navigation Rules.			
<b>Backfire Flame Arresters</b>	One USCG-approved backfire control device on each carburetor of all inboard gasoline engines.			
<b>Ventilation</b>	Boats with permanently installed engines, closed compartments or permanent fuel tanks must have efficient natural or mechanical ventilation.			
<b>Registration</b>	Undocumented boats equipped with mechanical propulsion (gas, diesel or steam engines, and electric motors) and any undocumented vessel used in sport fishing charter activities must be registered with the Division of Motor Vehicles. Certificate of Number must be carried onboard. Registration numbers and validation decals must be properly displayed on hull of boat.			

**DREDGE VESSEL SAFETY CHECK**

By participating in a voluntary dockside dredge vessel safety check, vessel owners can ensure that their vessels are in compliance with federal regulations. A sample examination form is below. For more information, contact Coast Guard Sector Anchorage.

**VOLUNTARY DREDGE SAFETY CHECK  
 SAFETY EQUIPMENT EXAMINATION**  
*To be completed by a U.S. Coast Guard District 17 approved Examiner.*

Date of Exam: \_\_\_\_\_  
 Decal Awarded: Yes  No

Owner Name: \_\_\_\_\_  
 Operator Name: \_\_\_\_\_  
 Owner/Operator has attended a Boating or Diving Safety Class:  
 Yes  No  Class date/location: \_\_\_\_\_  
 Location of Exam: \_\_\_\_\_  
 Replaced decal was: Last Year ; Outdated ; First Time

**VESSEL INFORMATION:**  
 Registration or Documentation Number: \_\_\_\_\_  
 HIN: \_\_\_\_\_  
 Length: <16 ; 16-25 ; 26-39 ; 40-65   
 Powered by: Gas ; Diesel ; Sail ; Other   
 Area of Operations: Inland ; Coastal   
 Type: Open ; Cabin ; Other

**SAFETY CHECK DECAL REQUIREMENTS**

**RECOMMENDED AND DISCUSSION ITEMS**

Item	Yes	No	N/A	Item	Yes	No
1. Display of Numbers				I. Marine VHF Radio		
2. Registration/Documentation				II. Dewatering Device & Backup		
3. Personal Flotation Devices (PFD)				III. Mounted Fire Extinguishers		
4. Visual Distress Signals (VDS)				IV. Anchor & Line for Area		
5. Fire Extinguishers				V. First Aid and PIW Kits		
6. Ventilation				VI. Discussion Items: as applies		
7. Backfire Flame Control				a. Accident Reporting		
8. Sound Producing Devices/Bell				b. Offshore Operations		
9. Navigation Lights				c. Nautical Charts/Navigation Aids		
10. Pollution Placard				d. Survival Tips/First Aid		
11. MARPOL Trash Placard				e. Fueling/Fuel Management		
12. Marine Sanitation Device				f. Float Plan/Weather & Sea Conditions		
13. Navigation Rules				g. Insurance Considerations		
14. State or Local Requirements				h. Boating Check List		
15. Overall Vessel Condition: as applies				i. Safe Boating Classes		
a. Deck Free of Hazards/Clean Bilges				j. Maritime Domain Awareness		
b. Electrical – Fuel Systems						
c. Galley – Heating Systems						
d. General Seaworthiness						

I certify that I have personally examined this vessel and find it meets the above requirements at the time of this Voluntary Dredge Examination.  
 Printed Name of Examiner \_\_\_\_\_  
 Examiner Signature \_\_\_\_\_ Telephone Number \_\_\_\_\_

*Additional Comments: This is not an official boarding for law enforcement purposes. It is recommended that you correct any deficiencies noted. This checklist is furnished for your information. There is no assumption of liability of any kind for advice given or opinions expressed in connection to this examination. By accepting the Voluntary Dredge Safety Check decal you are pledging to maintain your boat and equipment to the standard of safety exhibited during this examination. Please remove the Safety Check Decal if the vessel is sold or no longer meets these requirements.*

I am consenting to this examination of my vessel with full knowledge that it is provided to me as a public service without cost and I understand and agree that my receipt of a Safety Check shall not constitute or be construed as a warranty or guarantee as to either the qualification, knowledge, or skills of the operator; the seaworthiness of the vessel; or the serviceability or adequacy of any equipment on board.

Owner/Operator Signature: \_\_\_\_\_ Date: \_\_\_\_\_

## POLLUTION AND FUEL SPILLS

During vessel refueling, be sure to prevent spills into surface waters or to groundwater. Clean all spills with materials such as sorbent pads and booms.

The Alaska Department of Environmental Conservation has two 20-foot response Conex's with spill prevention and response materials available located at the Department of Transportation and Public Facilities site north of the City Airfield.

Contact for access:

Evan Booth

Ph 907-443-3411

Alt Ph 907-304-1297

<http://dec.alaska.gov/spar/perp/lra/inventory/nome.pdf>

If pollutants (oil, diesel, chemicals) are spilled into the water or if sheening is observed,  
**YOU MUST** notify: Alaska Department of Environmental Conservations at 1-800-478-9300  
and The National Response Center at 1-800-424-8802 or 1-202-267-2675  
Online at <http://cgmix.uscg.mil/NRC/>

## BOATING SAFETY

Dredge operators do not have exclusive access to the waters offshore of Nome Harbor. Small and slow-moving suction dredges present a navigational hazard to the wide variety of vessel traffic off the coast of Nome as well as to other activities such as fishing. Know and follow all U.S. Coast Guard and Nome Harbor rules and regulations. Respect fishermen and other offshore users.

Most boating fatalities in Alaska result from drowning in cold water while not wearing a life jacket. Cold water immersion can kill in several ways, and most people die long before they become hypothermic. The Alaska Boater's Handbook can provide additional, Alaska-specific information concerning, but not limited to:

- Federal and State safety requirements and equipment
- Registration requirements and how-to's
- Additional boating laws
- Boat capacity, loading, and stability
- Navigation rules
- Communication
- Emergencies
- The Alaska Boater's Handbook

## DIVER SAFETY

If you have never used suction dredging equipment in Alaska, get trained properly and safely operate the equipment. One miner died offshore of Nome while mining in 2011.

A common method of underwater dredging is through the use of Hookah diving. This technique uses surface-supplied air generated by a motor and compressor for diving in a small area at relatively shallow depths. Scuba diving certification is recommended for safe diving practices, skills, and knowledge.

### Alaska Marine Safety Education Association (AMSEA)

AMSEA is a source of specialized marine safety and dive safety awareness training, but they are not a dive certification organization. AMSEA:

- Offers training nationwide, including dive awareness training, see website calendar for schedule or call to set up a workshop. <http://www.amsea.org/calendar.html>
- Their education program *Defensive Diving: What Every Tender Should Know About Dive Harvest Safety* introduces dive tenders to vessel safety, basic dive operations, and dive emergencies. It is available for \$20 plus shipping.

### SALMON LAKE CAMPGROUND

The Bureau of Land Management (BLM) Nome Field Station maintains Salmon Lake Campground, which is the only designated public campground on Nome's road-system. The campground is located approximately 40 miles north of Nome on the Kougarok Road. The campground offers six campsites with fire pits and picnic tables, a natural boat launch at Salmon Lake, and an outhouse. Depending on road conditions, the campground is open from late June through mid October.
