

MAP 3

**Land Management Units**

**MANAGEMENT UNITS**

The subbasin is divided into 25 management units. Management unit boundaries encompass areas with similar resources, ownership patterns and access characteristics. Three general categories of management units are described below:

**Legislatively Designated Areas** - Land uses within these areas (the Capital Site, Nancy Lakes Recreation Area and three game refuges) have been previously determined by the State legislature. Consequently, these areas are not addressed by the plan.

**Areas with Specific Land Use Designations** - Management units shown in gray are primarily owned by the state and borough. In these areas detailed land use designations are prepared as well as management guidelines to control how these uses occur.

**Areas with General Land Use Objectives** - Management units shown in white (excluding legislatively designated areas) are primarily privately owned but contain some parcels of state/borough lands. The area plan addresses appropriate land uses in these areas through general land use objectives prepared for each management unit; specific land use designations are made for state land in some cases.
