## INTRODUCTION

Over the last two decades Alaska has experienced tremendous changes in land ownership and management. Many areas previously available for public use may today be restricted due to inclusion in a federal conservation unit, state legislatively designated unit, or may no longer be available for public use because of conveyance to a Native corporation or other private parties.

This atlas has been designed to aid both the public user and the land owner or manager in dealing with a growing problem in Alaska, unauthorized use of land and resources. This use, for the most part, has been inadvertent because of a lack of easily understood and readily available current land status information. This atlas has been designed to provide this information by graphically portraying current land ownership as of date of publication and public access site locations, including identifications of any restrictions.

This atlas is not a legal document. It is a representation of official state and federal land records. Generally, information is shown to a section (one square mile) level. For accurate information refer to the official records in the public information offices of the state's Department of Natural Resources (DNR) and the federal Bureau of Land Management (BLM).

Private land is not open to public use or travel without prior permission from the landowner. Use or travel across private land or the unauthorized use of public easements may result in criminal trespass. If you have any questions concerning public use of an area, you are encouraged to contact the appropriate land owner or manager. A list of the names, addresses and phone numbers of corporate land owners is included within the atlas. Privately owned land may be located on detailed land status maps that are available at BLM and State DNR public offices. It is your responsibility to know what land and use restrictions apply and to obtain permission and any necessary permits in advance from the land owner.

Invasion of community and camp privacy is a concern of many rural residents. Therefore, please be sensitive to local concerns and customs. Do not take pictures of residents without permission or otherwise encroach on local use areas.

Trapping cabins, fishing and hunting camps and tent camps are essential to the livelihood of many rural residents. They should not be used by the public except in case of real emergency. Although they may appear abandoned, the owners will return and will need everything they left for the coming season. Early trappers and travelers established an honorable tradition of respecting cabins and campsites, a tradition that should be continued today.

## HOW TO USE THIS ATLAS

The maps in this atlas show where land has been conveyed to Native corporations, within federal conservation units or state legislatively designated units. Land conveyances of less than 160 acres are not mapped. The maps identify other federal public domain land managed by the Bureau of Land Management (BLM), state land, or other private land. If it is not private land it is generally public land available for general public use without a permit. Further information can be obtained by contacting an office of either BLM or the state Department of Natural Resources (DNR).

This atlas also does show parcels of private property, such as Native allotments, homesteads, trade and manufacturing sites, etc. You should be aware that they may exist in any area. Detailed land status maps which identify all private land are available at BLM and DNR land record offices.

Waterbodies marked as federally determined navigable on the maps are available for public use up to the line of ordinary high water (usually the vegetation line). Tideland areas are also available for public use up to the line of mean high tide. State law also provides that you can use any waterbody in the state for free passage without obstruction. This does not, however, give you the authority to use the adjoining private land without permission. State determined navigable waters are so identified and is for informational purposes only.

Public access routes and easements are shown on each map along with a written description of their locations, season of use and use restrictions, if any. Although many of these easements are not marked on the ground, it is your responsibility to confine your passage and activities only to those areas and to specified allowable uses. Only 17(b) easements, USFS developments, Omnibus Roads, Federal Aid Highways, and other granted rights-of-way are shown. R.S. 2477 rights-of-way will not be shown until determined valid by the courts or officially asserted by the state.

## **EXPLANATION OF TERMS**

**"Easement"** is an interest in land which has been reserved for the public to use even though the land may be owned by a private individual or Native corporation. An easement are reserved for a variety of specified purposes, such as a road, trail, campsite, airport, etc. Easements are restricted in terms of width, types of use, seasons of use, and duration of use. Easements cannot be used for any other uses than those for which they were reserved. For example, a site easement, reserved under the authority of the Alaska Native Claims Settlement Act (ANCSA), may only be used for temporary 24 hour camping. You may not fish, hunt or otherwise recreate on the site, and you may not disturb the site in any way, such as cutting trees or firewood.

**"Navigable Waters"** are those waterbodies that have been found or are capable of transporting people or goods and, as such, the land beneath them is owned by the state. These waterbodies extend up to the line of ordinary high water (usually the vegetation line). The adjacent uplands may be in private ownership and not available for use without permission.

**"Federally Determined Navigable"** are those waterbodies that BLM has administratively determined to be navigable for land title purposes. Their definition has changed over time as the result of various court cases. However, today BLM considers water bodies navigable if they were, at the time of statehood, navigable for crafts larger than a one-person kayak.

**"State Determined Navigable"** are those additional waterbodies that the state has determined navigable. This usually occurs where BLM has not yet made a determination or, because of an earlier determination, the state disagreed with the criteria they used. The state today uses the same definition as BLM for rivers and streams.

**"Public Waters"** are those waterbodies that are not navigable. Public waters may be used, without obstruction of interference, but the land beneath them and adjacent to them may be in private ownership, and not available for use without permission.

**"Ordinary High Water Mark"** is defined as the mark along the bank or shore where the presence and action of water are so common and usual, and so long continues in all ordinary years, as to leave a natural line impressed on the bank or shore. that line may be indicated by erosion, shelving, changes in soil characteristics, destruction of terrestrial vegetation, or other distinctive physical characteristics.

An **"IC"** is an Interim Conveyance document issued to a Native corporation under ANCSA which passes title to land from the federal government to a corporation.

**"T" means "Township"** which is a tract of land contained by running the meridians and parallels six miles apart, whose sides run north and south and east and west, and is approximately square and contains thirty-six square miles or 23,040 acres. The townships situated east and west of each other are designated as townships, in describing lands, and are numbered from the base line north or south on the principal meridian.

**"R"** means "Range" which is a row or tier of townships lying east or west of and parallel with a principal meridian and north or south of a base line.

**"SE"** means surface estate only was conveyed.

**"SSE"** means subsurface estate only was conveyed

## EASEMENT USE LIMITATIONS

(Reserved in ANCSA Conveyances)

**25 Foot Trail** - The uses allowed on a twenty-five (25) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, and small all-terrain vehicles (less than 3,000 lbs Gross Vehicle Weight (GVW)).

**50 Foot Trail** - The uses allowed on a fifty (50) foot wide trail easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, and four-wheel drive vehicles

**60 Foot Road** - The uses allowed on a sixty (60) foot wide road easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks.

**100 Foot Road** - The uses allowed on a one hundred (100) foot wide road easement are: travel by foot, dogsled, animals, snowmobiles, two and three-wheel vehicles, small and large all-terrain vehicles, track vehicles, four-wheel drive vehicles, automobiles, and trucks. All roads in this category must be proposed for construction within a five-year period. If the road is not constructed the easement will be reduced to a trail and the uses will be consistent with the trail width. If after the road has been constructed a lesser width is sufficient to accommodate the road, the easement shall be reduced to a 60 foot wide easement.

**One Acre Site** - The uses allowed for a site easement are: vehicle parking (e.g., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading, or unloading shall be limited to 24 hours.

**Site Easement (Airstrip)** - The uses allowed for a site easement are: aircraft landing, vehicle parking (i.e., aircraft, boats, ATV's, snowmobiles, cars, trucks), temporary camping, and loading or unloading. Temporary camping, loading or unloading shall be limited to 24 hours.

### **OTHER RESERVATIONS** **WINTER TRAILS**

**Omnibus Roads** - Roads designated FAP or FAS are right-of-way interests that were conveyed to the State of Alaska by the quit claim deed dated June 3, 1959, executed under the authority of the Alaska Omnibus Act. They may not have been mentioned in the IC or an IC may have reserved an easement corresponding to the omnibus road. In either case the omnibus road rights are superior.

**Federal Aid Highways** - Roads designated A-XXXXXX (X stands for a number) are Federal Aid Highways under the Act of August 27, 1958. The designated number is a BLM right-of-way file number.
