CHAPTER 2

Areawide Land & Water Management Policies

INTRODUCTION

Summary

This chapter includes goals, management intent, management guidelines, and proposed regulations that apply to state lands in the Recreation Rivers. The policies in this chapter consist of goals and management guidelines. Goals are the general conditions the department is trying to achieve and guidelines are specific directions that will be applied to land and water management decisions as resource use and development occur. For management intent on borough lands, contact the Matanuska-Susitna Borough.

Definitions

Throughout the plan, the terms Recreation River, rivers, and corridors are used. Recreation Rivers includes all land and water (including the uplands, shorelands, and water columns) designated under the Recreation Rivers Act (AS 41.23.500(1-6). River(s) includes the water column designated under the act. River corridor(s) or corridor(s) includes the uplands designated under the act. Uplands are defined as lands above ordinary high water. Shorelands include land belonging to the state that is covered by navigable water up to the ordinary high water mark. For further definitions see the glossary in Appendix A.

GOALS

The Recreation Rivers Act states that the primary purpose for the establishment of the six Recreation Rivers is the maintenance and enhancement of the land and water for recreation. The act states that the primary purpose for the management of the six Recreation Rivers is for a variety of resources and uses including fish and wildlife, recreation, economic use, the enjoyment of the public, multiple use of the uplands, and the accommodation of access.

To meet these goals, state land and water in the Recreation Rivers will be managed for:

2. Recreation. Maintain and enhance the Recreation Rivers for recreation.
3. Fish and Wildlife. Manage, protect, and maintain the fish and wildlife populations and habitat on a sustained-yield basis.
4. Public Use. Protect and enhance public use and enjoyment of the Recreation Rivers, including ensuring the availability of public use sites to meet the needs of all users.

The order of the goals listed throughout this chapter are not listed in order of priority.
Areawide Land & Water Management Policies

Economic Use. Allow continued economic uses.

Mitigation Measures. Manage upland activities for multiple use within the Recreation Rivers using mitigation measures to alleviate potential adverse effects on water quality and stream flow.

Access. Accommodate access for resource uses including recreation and tourism within or adjacent to the Recreation Rivers.

Spectrum of Opportunities. Provide for a spectrum of recreation opportunities on the six Recreation Rivers.

Specific Opportunities. Provide specific recreation opportunities on individual rivers, river segments, units, subunits, and public use sites.

Monitoring. Monitor conditions to ensure that the desired recreation opportunities are maintained through time.

Education. Promote public understanding and appreciation of the resource and public values.

Management. Formulate policies and specific guidelines for short- and long-term management.

MANAGEMENT INTENT

The goals listed above will be met by managing state land through management intent statements. Management intent describes the future condition that is desired. Three general classes of management intent were developed to provide diverse recreation opportunities to satisfy the public’s varying preferences. The class assigned to each area is similar to current use patterns. Management intent classes range along a recreation opportunity spectrum that includes Class I, Class II, and Class III areas: Class I areas provide primitive recreation opportunities; Class II areas provide semi-primitive recreation opportunities; Class III areas provide recreational opportunities in a more developed setting. Management decisions on whether proposed land uses are compatible and which guidelines apply will be based on these general management intent statements, guidelines, and specific management intent for the subunit. The management intent class for each subunit is shown in Map 2.1 on the following page and described in Table 3.1 in Chapter 3.

PROPOSED REGULATIONS

New regulations are necessary to implement the policies and guidelines in the plan. Proposed regulations are described in this chapter. In the Recreation Rivers Act, AS 41.23.440(c) states that, "The commissioner shall adopt regulations necessary to implement the management plan." Most regulations proposed apply to recreational use, including recreation-related commercial use. All regulations, whether or not specifically indicated, apply only to state land and water in the Recreation Rivers. Under AS 41.23.440(b) in the Recreation Rivers Act, DNR may not adopt regulations until the management plan takes effect. Proposed new statutory authorities needed to enforce these regulations are listed in Chapter 4.

Two new types of permits are proposed to implement the plan. The first is the Commercial-use Permit which is described in Chapter 2 (See Commercial). The other is the Recreation Rivers Special Use Permit which covers all activities listed in the plan that require a permit but are not covered under existing DNR or other agency permits.
MANAGEMENT INTENT FOR SUBUNITS

MAP 2.1

SUSITNA BASIN RECREATION RIVERS MANAGEMENT PLAN

MANAGEMENT UNITS & SUBUNITS

1. Little Susitna River
   1a. Lower Little Susitna River
   1b. Middle Little Susitna River
   1c. Upper Little Susitna River

2. Deshka River
   2a. Mouth Of Deshka River
   2b. Lower Deshka River
   2c. Middle Deshka River
   2d. Neil Lake
   2e. The Forks
   2f. Kroto Creek
   2g. Lower Moose Creek
   2h. Oilwell Road
   2i. Upper Moose Creek

3. Talkeetna River
   3a. Lower Talkeetna River
   3b. Middle Talkeetna River
   3c. Clear (Chunilna) Creek
   3d. Talkeetna Canyon

4. Lake Creek
   4a. Lake Creek Mouth
   4b. Lower Lake Creek
   4c. Middle Lake Creek
   4d. Upper Lake Creek
   4e. Chelitna Lake

5. Talachulitna River
   5a. Mouth Of Talachulitna River
   5b. Talachulitna River Canyon
   5c. Middle Talachulitna River
   5d. Talachulitna Creek
   5e. Judd Lake
   5f. Upper Talachulitna River

6. Alexander Creek
   6a. Lower Alexander Creek
   6b. Upper Alexander Creek
   6c. Alexander Lake
   6d. Sucker Creek
