Project Title

Provide a descriptive project title in 7 words or less in the space below.
For example: Development of the ABC Agriculture Resource Center

Hay and Grain For Beef Cattle

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Large animal operations (cattle, goats, pigs, reindeer, sheep, elk, yak, bison, etc.): \$5000

Amount of Funds

\$5,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

No

Animals Fed

What is the number of animals that you are currently feeding?

21

How many animals would you have to harvest without grant assistance?

8

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$20,640.00

What is the current market value of your animals?

\$52,575.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$13,534.00

What was the number of animals you were feeding last year?

14

What type of animals were you feeding last year?

beef cattle

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

The primary enterprise at Susitna River Ranch is the production of pure, chemical-free grass-fed beef for families in the local community. A very important secondary enterprise is educating our customers on the proper, safe and hygienic handling of their beef, including dispatch, skinning, gutting and cutting the animal into sides and quarters. Several of our repeat customers are now experienced enough to teach friends and family proper and safe procedures. We have been in operation since 2014. Annually we have harvested six beeves, about 2,400 pounds of finished beef, with a target of 20 beeves per year within five years.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$18,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The last two years saw hay prices skyrocket to \$850/ton at some suppliers in the Mat-Su valley. The only option producers have is to reduce breeding stock which will ultimately reduce the food supply for several years. This grant funding will prevent that reduction in breeding stock, keeping supply growing.

Direct Beneficiaries Location

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

we have 9 laying hens, 2 roosters, a boy and a laying girl duck, and three rabbits, silver fox pedigree meat rabbits. We will start breeding our rabbits, and hatching more eggs in the spring.our rabbits , we plan to breed them for pelts and meat. We know a rabbit will out produce in a cow in one year in meat, thats our goal. our goal for our chickens, and ducks is 2 dozen a day. We are just starting out, but there is a lot more costs that go into livestock then some think.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$8,800.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

I Think requested funds would only grow available livestock. Allowing people to keep their animals fed all winter. With being able to producing milk, eggs, meat, with our feed costs assisted , it would allow some people to expand the available livestock .

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

50+ piglets to be raised to 250+ pounds each = 7,200+ pounds of meat,

600+ gallons of goat milk per year,

Breeding pigs and goats to start new herds

What is the dollar value of the food that you plan to produce?

\$21,500.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

My primary goal is to provide piglets for Alaskans who wish to raise their own pork. I have produced up to 50+ piglets in a season and hoped to increase the number. Unfortunately, the rising feed costs have driven me to downsize instead - reducing my dairy goat herd as well.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We have already culled one breeding buck and three milking does to get our feed bill to where we can afford it better. So yes, I can afford to feed my animals as they are right now, but I can no longer operate my herdshare. If I can better afford the feed, I could keep the two doe goats I am considering selling, and buy a new breeding buck, and supply fresh milk to my community again. I used to serve fresh dairy products to 7 families but now just my own family and one other friend.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$3,500.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

We have already sold or culled several of our animals to get our feed bill in line with what we can afford. I would love to not have to dispose of more of my goats. I could do more than the estimate above but figured on half of capacity forward.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We plan to continue to raise our dairy goats, pigs and chickens to produce food for our family and surplus eggs for customers in the community. We expect to produce in the coming year 400 pounds of pork, around 300 dozen eggs, and 500 gallons of milk for drinking, cheese and yogurt as well as goat milk soap for the local market.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$11,300.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Living in Alaska causes us to value our farm and the food security it provides to our family, but the cost of feeding our current number of livestock at today's prices is not sustainable and without grant funds we would have to drastically reduce the number of livestock we raise.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Plan to have 6 litters per doe, per year, for 12 total litters. 12 litters with an average of 8 kits per litter leads to 96 kits at an average of 3.5lbs each at dressed out weight leads to 336lbs of rabbit per year. Breed of hens typically produce 290+ eggs per hen, per year, which leads to 2,900 eggs per year. Expect to produce 65lbs of turkey this year.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$4,734.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

For our particular situation, the requested funds has the potential to prevent us from having to eliminate turkeys from our future plans because they have such a high level of feed consumption.

poultry

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Arctic blessings farm has served our local communities for the past two years. We decided to raise laying hens and broilers due to customer feedback. The rise in chicken feed has brought us to a decision point. We have decided to raise laying hens. We are projecting 8 dozen eggs a day. This will meet the needs of our community with an impact to approximately 70 families. The increase of feed cost by up to 50% may bring us to another critical decision to cull some of our flock. This will impact our community with reduced egg availability.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$15,120.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The additional funding will provide our community with an adequate supply of eggs. Our community can rely on us rather than big box stores which receive their goods from outside Alaska. We will be able to maintain our flock thus allowing us to lessen our dependence on outside for sources.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We have a small flock of 13 chickens, they range from 6 months to 2 years old. They produce 8 eggs a day, in this economy that is \$7 a dozen. We are a family of 6 and go through many of the eggs ourselves. However when we do get a surplus we share them with our neighbors and family. These chickens are ravenous little birds, and they are go through the feed like crazy. Especially now that it is getting cold, they will be eating more and as the winter months set in.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$2,555.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

In this economy everything is outrageously expensive. We go to the store and can hardly afford the food for us to eat, let alone the food that the chickens need. These chickens help to sustain us. Having funds to feed our chickens means we can all eat!

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

With my project, I hope to continue to produce corn/soy free goats milk and Meat along with corn/soy free pork to feed my large family. For an entire years worth, I would like to produce Approximately 275 Gal of goat milk that is used for cheese and yogurt as well as just drinking milk. aprox 900 lbs of pork and 350 pounds of goat meat. In years past I had been able to raise more for meat, but the cost of hay and feed has forced me to downsize.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$12,175.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

To be awarded this grant, my family would be able to find some much needed relief for the high cost of feeding our livestock. My farm directly feeds my family. Also helping to sustain our food security in Alaska by keeping breeding stock alive for future meat.

Last Year's Budget

What was your previous year's cost of feed for animals?

\$5,452.41

What was the number of animals you were feeding last year?

29

What type of animals were you feeding last year?

Last year I was feeding a total of 29 animals of which included pigs, goats, sheep, laying hens, and a turkey. Each summer I raise at least 10 broiler chickens as well.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Since 2004 I have been raising livestock for organic food including pork, lamb, eggs, chicken, and goats milk, for my family of 12, some of which have medical conditions requiring special dietary needs. Last winter I had to reduce animals due to the cost and availability of feed and supplies. This grant will help maintain my livestock of 10 animals to continue to provide for my family and our small-knit community with extra products. With assistance I plan to produce about 77 gallons of goat milk, 100 pounds of chicken, 200 pounds of lamb, and 960 pounds of pork.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$6,363.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

These funds ensure livestock is maintained to continue producing for family and community. Without assistance current animals will be grown out for food rather than perpetuating a local food supply. This puts my family and community at risk. Alaska will lose a local food source and another female farmer.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I plan on selling at least 8 lambs to 4-H Youth on the Kenai Peninsula. I have purchased three new ewes that should produce a more marketable animal. I had my ram in with them over the course of two heat cycles to have babies born within the parameters set by the Kenai Peninsula District 4-H. Last year I had a waiting list and was unable to fill youth orders. I am also working on finishing a cow to file the freezer of at least 3 families.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$3,200.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Due to biosecurity measures importing animals and the reduced availability of AI in sheep, killing off breeding stock means that the State will have smaller breeding populations, more health issues and not enough food for our community. The Purchase price for cows is astronomical.

Provide a descriptive project title in 7 words or less in the space below.
For example: Development of the ABC Agriculture Resource Center

Hillberry Swamp Homestead

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Small animal operations (such as poultry, eggs, rabbit): \$2000

Amount of Funds

\$2,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

Yes

Animals Fed

What is the number of animals that you are currently feeding?

6

How many animals would you have to harvest without grant assistance?

0

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$540.00

What is the current market value of your animals?

\$28.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$0.00

What was the number of animals you were feeding last year?

0

What type of animals were you feeding last year?

0

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We have 5 laying hens and 1 rooster. Plan to provide eggs for consumption by the family. 6 eggs per day average. We also plan to grow the flock by hatching 1 dozen fertilized eggs for next year. Value: \$30 per dozen hatching eggs and \$5 per dozen eating eggs.

What is the dollar value of the food that you plan to produce?

\$912.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Feed for our flock will prevent us from having to buy imported store-bought, large-farmed eggs that are a result of inhumane practices, enable us to grow our flock to produce more each year, and enable us to care for our extended family and neighbors and their food security.

Direct Beneficiaries Location

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Started a new flock of chickens from my own hatching in April and May to feed our family to prevent buying eggs from the grocery store. Chickens are still pretty young. I have 5 rhode Island Red hens with 2 roosters and 18 polish chickens and 4 silkies. Only getting 5 eggs a day currently. Hoping to get a dozen per day once the polish start laying. Plan to expand the rhode island red flock next spring to increase production.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$1,500.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

This will help grow our chicken flock to get our chicken egg production up and help feed our family and sell extra eggs to local village families.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We currently maintain a flock of 14 Light Brahma chickens and a flock of 11 Silver Laced Wyandottes. The Light Brahmas are 1.5 years old and are strong egg producers. The Wyandottes are 5 months old and just beginning to lay eggs. We anticipate production of up to 334 dozen eggs next year from the two flocks.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$2,004.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

A grant would help us to keep feeding the young Wyandottes and allow them to mature as egg producers. Without the grant we will have to butcher them and will lose half of the anticipated egg production.

\$2,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

Yes

Animals Fed

What is the number of animals that you are currently feeding?

17

How many animals would you have to harvest without grant assistance?

5

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$1,600.00

What is the current market value of your animals?

\$200.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$2,000.00

What was the number of animals you were feeding last year?

21

What type of animals were you feeding last year?

Chickens

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I plan to produce 3-4 dozen eggs a week.

What is the dollar value of the food that you plan to produce?

\$1,000.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

With rising inflation, the cost of chicken feed had grown substantially. With this grant I will be able to provide feed for my chickens and food for my children and family.

Direct Beneficiaries Location

What is the current market value of your animals?

\$1,000.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$2,467.00

What was the number of animals you were feeding last year?

40

What type of animals were you feeding last year?

Meat/Egg Chickens

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We will continue to produce 3,500 eggs per year. Meat production will increase from 80lbs to 240lbs per year. 40% of all that we produce is given to the community for free. 10% is sold under cost. We have made excellent use of past grant funds and take seriously our commitment to use these funds to benefit our community. We acquired 2 young goats this year. Next year we expect to harvest 1,000lbs of milk for our family. I can verify all figures provided for this application.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$5,928.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Without assistance we will reduce our flock of laying hens by 10% and reduce our meat chicken production by 25%. Port Alexander is a low-income, roadless community and freight charges add substantially to costs, compounding food security issues and making our continued contribution critical.

35

What type of animals were you feeding last year?

Chickens, geese, turkeys

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We have about 60 birds. We are spending an average of 2 bags (or more now that winter is coming on feed at \$35 a bag per week). We have sold some chicken eggs, an average of 3 dozens a week last year. Our chickens are old and not producing as much this year. Our new hens are not producing yet. We have not sold eggs in months. We are running out of eggs for our own consumption. We had all of our animals out in a field all summer to supply them with food and avoid buying more feed.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$300.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

We are trying to keep our little farm alive. Right now, it is not sustainable, we have thought about getting rid of all of our animals due to the cost of feed. This is a heartbreaking solution.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We keep 20 layers 5 dozen eggs a week for 7months @ \$7= \$857.50

5 layer ducks,3 dozen eggs a week for 4 months @ \$10=\$420

Raise 50 meat birds for 9-10 weeks and only trade 25 @\$25 a bird = \$625

8 turkey we keep 3 and trade 5 @\$100= \$500. So the layer hens and ducks are the only birds keep through the winter. We are also trying to add quail.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$2,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

My family has not bought chicken, eggs, or turkey from the store in over 7 years. This is also true for the families we trade with. Knowing where your food comes from and how it was raised is the best feeling. Someday we hope to have a fully functioning farm.

For example: Development of the ABC Agriculture Resource Center

Development of sunny side up resource center

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Small animal operations (such as poultry, eggs, rabbit): \$2000

Amount of Funds

\$2,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

Yes

Animals Fed

What is the number of animals that you are currently feeding?

9

How many animals would you have to harvest without grant assistance?

5

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$700.00

What is the current market value of your animals?

\$315.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$1,000.00

What was the number of animals you were feeding last year?

12

What type of animals were you feeding last year?

Chickens

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I produce about 5-6 eggs per day, about 2.5 dozen a week.

What is the dollar value of the food that you plan to produce?

\$8.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

If we rely on all our food to be shipped up from out of state, then if there is a catastrophe of some sort, such as covid, we will literally starve to death.

Direct Beneficiaries Location

beef cattle

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I have been raising beef and dairy cattle on Nenana Urban Farm since 2008. I market the excess bulls/steers as beef every fall. I have numerous repeat customers, some who do field slaughter, some who want their beef cut and wrapped by local slaughter plant. Generally 6-8 steers, 700-1200lb live weight, so at max, 5200 lbs beef per year, bulk pack cut and wrap value of \$41,000. We also provide beef for the Nenana City Public School, under the Farm to School grant program. We are donating beef to the Nenana Student Living Center, for making into beef jerky snacks

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$41,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

I have 5 months of hay stockpiled, enough to get through April. Some of my cows are skinny, from nursing, and would benefit from having grain to supplement the hay. 4-5 steers are due to be slaughtered soon. I could reduce feed demand by culling my bull and 3 cows.

30

What type of animals were you feeding last year?

We fed rabbits and chickens

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We raise pigs, chickens for eggs, broilers, and rabbits. We have ten chickens and currently receive 2 dozen eggs/week. This year, we raised four pigs with a live weight of 800lbs, an approximate 640lbs of pork, and lard totaling 22 lbs. We raised 25 broiler chickens totaling 150 pounds. We rescue, rehabilitate and house feral rabbits, with 20 in our care. The rising costs of feed, hay, and bedding is hurting our ability to stay afloat. We supplemented spent brewery grain to offset costs. This grain availability/amount is not guaranteed. Total animals raised this year is 59.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$4,445.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Receiving these funds would allow my family (2 adults and 4 teenagers) to continue raising animals and harvest meat for our family, and for 3 other families/individuals. This provides food security for 12 individuals. We may have to discontinue raising laying hens to offset growing feed and bedding prices.

We raise Nigerian dwarf dairy goats. We are working on our dairy herd. Last year, only 2 does milking. Butchered one wether. This year we kidded 2 does and 2 weathers. Nigerian goats have the highest butter milk content and most protein in the dairy world. Each doe produces 2 qts daily. I milked 182 days this year. I also make cheese and goat milk soap. We would love to do a real dairy farm in the future and provide more to our community.

Our chickens are for eggs and butchering. Turkeys too.

4

What type of animals were you feeding last year?

1 pig 3 goats

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

The swine production plan projects two farrowing cycles per sow annually, with a minimum litter of 8 piglets per cycle. This should provide approximately 3,000 pounds of cut and wrapped pork. The dairy goat herd, comprised of 5 mature milking does, is expected to produce an average of 5 gallons of milk daily. Over a 10-month lactation period, this would equal an estimated 1,400 gallons of milk annually. 3 young replacement doelings are anticipated to contribute supplemental milk production. Each doe should deliver twins. 16 surplus kid goats, total cut and wrapped chevon (goat meat) production is projected at 750-1,000lbs.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$30,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The scarcity of productive farming operations in southeast Alaska results in a loss of breeding stock potential every time an animal is processed for meat. Building local food production capacity, developing the next generation of breeders from locally-born animals will build a sustainable foundation for ongoing farm production.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We operate a herd share program where we provide milk and eggs to several families on Prince of Wales.

We are currently getting between 1 1/2 to 2 gallons of milk a day from 14 does.

And producing around a dozen eggs per day at this time.

Things are slowing down as winter is coming.

We were getting almost 4 gallons of milk a day earlier this season.

And we have sold several goats for meat this year.

We still have 10 kids for sale at this time, but will have to harvest them if they don't sell soon.

What is the dollar value of the food that you plan to produce?

\$12,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

If we get this grant I will be able to retain my milking herd through the winter.

I am looking at having to downsize our herd with the cost of hay and feed once milk production ceases in about a month.

Money from the milk just barely covers costs.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Our family invested in a small flock of 5 chickens in Spring of 2023 to produce eggs for our family of five as well as my elderly parents and in-laws. We collect around 2.5 dozens eggs a week. The hens started laying in late June and ever since our families haven't had to purchase eggs from the store. This grant would assist us in purchasing the more expensive and additional feed required to keep our hens healthy and laying in the winter. We hope to add an additional laying hen to our flock as funds allow.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$750.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Though small, our flock of five hens are able to regularly feed 9+ people as long as the hens stay healthy and keep laying through the winter. While the impact is small, it is an important source of food for our family, extended family and friends.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Our family farm currently feeds 2 goats, 5 turkeys, & 5 ducks for food production. We keep egg laying ducks and use these eggs to provide most of our family's egg needs when in season, 3-5 eggs per day. Our goats are meant for slaughter but aren't quite up to size yet, mostly due to cutting back on feed provided them due to finances. 3 of our turkeys are for slaughter keeping one mated pair for future production. We expect about 36-40 pounds of meat from these birds.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$2,100.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The potential for our family of 5 is significant. Our goals in producing these animals is to offset the lack of available moose while hunting, as well as the reduced fishing allowances we've experienced the last two years. Our need is great.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We live in an offgrid cabin on hinchibrook Island and have our chickens for eggs and meat and food security. In the summer I average 6 eggs a day and try and grow 2 turkeys and 6 chickens for meat. I let my birds free-range for bugs and greens and give them layer feed. The turkeys eat wild game bird feed. I keep them secure in an insulated well built coop at night. I give my layers a break in the winter so produce around 120 dozen eggs a year.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$1,240.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Food in rural cordova alaska has gone up from \$17/bag to \$37/bag in less than a year. When I first started raising birds for food it was break even but I felt good about it being sustainable. Now it costs more to raise your own food.

Provide a descriptive project title in 7 words or less in the space below.
For example: Development of the ABC Agriculture Resource Center

Off grid livestock operation

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Large animal operations (cattle, goats, pigs, reindeer, sheep, elk, yak, bison, etc.): \$5000

Amount of Funds

\$5,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

No

Animals Fed

What is the number of animals that you are currently feeding?

75

How many animals would you have to harvest without grant assistance?

25

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$10,000.00

What is the current market value of your animals?

\$4,000.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$7,000.00

What was the number of animals you were feeding last year?

75

What type of animals were you feeding last year?

pigs, chickens, ducks

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

800-1000# of pork including sausage, bone broth, scrapple etc, 25 chickens, 20 ducks, 100 pints chicken stock

What is the dollar value of the food that you plan to produce?

\$7,000.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

These funds will offset extraordinarily high feed costs so we can continue to provide much needed nutrient dense food to our community. We already have more customers who want us to raise more animals for them but we cant afford to feed more animals.

Direct Beneficiaries Location

Which census borough are the direct beneficiaries located? Please save after selecting a location to update the total funding amount.

What was the number of animals you were feeding last year?

8

What type of animals were you feeding last year?

sheep

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

10 meat sheep this year.

What is the dollar value of the food that you plan to produce?

\$4,000.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Funds would allow me to retain more sheep for breeding thus increasing number of future meat lambs. Last year's feed costs pushed me to reduce breeders and I am reducing again this year due to feed costs. People want meat raised here, I am willing to do that if affordable.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

At Morales's family farm, we pride ourselves on producing top-notch sheep meat. In addition, we take care of goats and provide the community with fresh raw goat milk. Our farm also offers a variety of meats, including rabbit, chicken, and quail. For those interested in hatching animals, we have eggs for sale and a selection of hatching animals available during the spring season. Along with education classes for the community from adult to children.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$15,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Morales Family Farms not only provides food for the community, also imparts educational classes on farming, meat processing, and animal care. The livestock is not only harvested for food, but also utilized to teach how to farm and process their own meat.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

With good feed access, our dairy cows produce 8 gallons of milk a day plus provide 2 calves each year for beef.

If we don't have to butcher 3 beef cows they would calve next year providing 3 beef calves which could then be butchered in 2025, with carcass weight of 500-700 lbs each.

We would like keep our herd growing. There is high demand and a wait list for beef in our community. We have provided these products for 11 years.

Feed costs have caused us to drastically cut our stock since 2020

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$15,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

This grant would enable us to maintain our current herd which in turn will increase the herd by the nature of breeding cattle.

We've watched our many friends, neighbors, and fellow farmers quit farming recently due to price increases. We want to keep these farm products available.

For example: Development of the ABC Agriculture Resource Center

Chicken Feed/Egg Production

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Small animal operations (such as poultry, eggs, rabbit): \$2000

Amount of Funds

\$2,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

No

Animals Fed

What is the number of animals that you are currently feeding?

7

How many animals would you have to harvest without grant assistance?

7

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$900.00

What is the current market value of your animals?

\$175.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$900.00

What was the number of animals you were feeding last year?

8

What type of animals were you feeding last year?

Chickens

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We live in bush Alaska so we pay freight by pound for chicken pellets from AK Mill and Feed. Our chickens provide us with 5-7 (3-5 dozen per week) eggs per day for our family of 5 as well as our Tuesday morning community breakfast at our house.

What is the dollar value of the food that you plan to produce?

\$100.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

These funds would supplement our flight and feed cost freeing up resource for further expansion of our chicken housing and egg production

Cow

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Raising dairy cow for milk and to be able to harvest a cow a year for meat. Two cows a year 2500 lbs of beef, 2,000 gallons of milk, use for butter, cream and milk. Food will be timothy hay, Alfalfa, and sweet feed. Per cow is two bags a week of sweet feed and three bales of hay or alfalfa. The rising cost of beef and milk in Southeast Alaska Prince Of Wales is making it to hard to afford. The amount if meat and milk coming to the island is decreasing but the prices are increasing major.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$20,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Price on island keeps going up and the amount we are getting in the store is going down. We will be able to feed five family off of meat and milk for a year from this grant. We will be feeding 6 week old to elders with this help.

Rabbits, Chickens, Goats

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I have already had to reduce my animals this year due to feed prices. Hatching and breeding more will depend on feed affordability. I currently have 18 chickens remaining that provide about a dozen+ eggs per day. I will harvest 12 of the hens for meat (approx 40lbs) in the fall after hatching more. I will harvest 5 of the 7 meat rabbits (approx 15 lbs) in the summer after breeding more and approximately 20 more (approx 60lbs) in the fall. That is approximately 150 dozen eggs, 40lbs of chicken meat, and 75lbs of rabbit meat.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$2,500.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Without feed assistance I have to slaughter the majority of the few livestock animals I have remaining, without replacing them. This will remove a major food source for my immediate large family. This will also decrease the availability of locally farm raised meat and eggs in my small rural community.

What was the number of animals you were feeding last year?

0

What type of animals were you feeding last year?

none

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We have 10 laying hens and a rooster that we purchased in May. We get about 8 eggs daily and can afford to feed this many chickens.

We would like to increase our flock to produce 1-2 dozen eggs per day. We have been trying to produce enough eggs for our family, a native widow, and some families fostering kids in our community.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$5,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

This fall 4 families in our community lost their chickens due to bears. We we would like to hatch chicks to replenish their flocks in the spring as well as help fill in their loss of eggs. There are very few chickens remaining in our community.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We have 13 egg laying hens and 1 rooster. We expect to get 7-8 eggs per day to use for our family. In the spring we would like to add 12 more laying hens, if possible. Our eventual goal is to have at least 1-2 dozen eggs laid per day so that we are able to sell some to neighbors to offset our costs.

What is the dollar value of the food that you plan to produce?

\$1,000.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

It is extremely difficult to raise livestock in Alaska. Once you have built facilities and purchased animals to raise, you have to buy food to maintain them. The cost of livestock feed in Alaska is more than double than that of other states. Our grazing/free range season is also shorter.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I have a small herd of 24 boer goats. I buy local alaska grown feed by the ton as much as possible. Need 9 tons of grain and roughly 11 tons of hay. And hope to provide the local community with 20 breeding stock to become more self-sufficient.

And 14 meat animals at 70 lbs hanging weight for a total of 980 lbs of meat.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$13,600.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Currently there is 4 herds of boers that I know of in state. 2 dispersed last year due to feed prices. Other option is importing from lower 48. Reducing stock = less available stock here. Last year I was only able to buy hay and not grain. Resulting in lower fertility rates.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I am wanting to raise 200 rabbits/year for butcher for local people to buy for quality lean meat. There are very few places to buy affordable farm raised meat in our town. I have a breeding program geared toward breeding good growth rates, good moms, and hardy rabbits with thick fur/short ears for cold hardiness. I am also breeding for moms that will take care of their young through winter. If people want to purchase live rabbits from me I'd like them to be able to breed year round for their families food security.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$2,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Feed prices have increased by 30% and this has impacted my ability to feed my rabbits, or have a viable breeding program with good nutrition. I don't have enough money to buy more feed upfront in case shipping were to fail, or to stock up on hay for winter.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I'd like to get eggs and meat chickens and supplies for them to be able to provide fresh eggs and meat to my family. I'm planning on getting 7-10 egg chickens to produce 15-20 eggs per week and 20-30 meat chickens to produce more than 100lb of poultry.

What is the dollar value of the food that you plan to produce?

\$1,600.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

These grants are important to middle class working families, because current inflation rate made it impossible to be able to afford healthy meals for families. The grant money would greatly benefit the families and give them a better chance to establish a self sufficient household.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Averaged over the year, we produce 4 dozen eating eggs per week, with 8+ dozen produced during high season (spring-summer). This amounts to about 208 dozen eggs per year, which are sold to friends and neighbors. We butcher excess (male) birds for personal consumption, averaging 9-10 birds for consumption per year. Additionally, I sell hatching eggs and chicks in the spring to provide the Fairbanks area with locally-sourced heritage chickens. Chick/grower feed is considerably higher priced than layer feed, and is not considered in the prices listed above.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$1,300.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

To keep healthy chickens in interior Alaska, much more than feed is a required expense. When one considers the additional expense of feed price hikes, perpetuating poultry becomes possible as only a high-income hobby! Funds assisting the procurement of feed supports those of all economic backgrounds to own food security.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I sell or barter duck eggs at \$231, Guinea fowl eggs at \$125.00, chicken's eggs at \$2,611 total of \$2,967. I sell or barter Guinea fowl meat \$ 30.00 a bird making \$120.00 I also have rabbit meat at \$ 40 a rabbit, I breed meat rabbits and make \$ \$1.200. We compost all the manure from all of our critters and grow a garden to help substain our way of life off the grid on Farm Island in the Stikine Wilderness

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$800.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The rising cost of animal products is directly linked to the increase price of fuel. Consequently, all items are subject to a fuel surcharge. Additionally, animal manure serves as compost for our garden, aiding in vegetable cultivation and preservation. Reducing livestock would ultimately impact our food.

What was your previous year's cost of feed for animals?

\$15,851.00

What was the number of animals you were feeding last year?

39

What type of animals were you feeding last year?

Goats

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I have a dairy herd and produce milk and some goat meat. Our herd is on dairy herd improvement, so our pounds of milk are tracked by our lab/data processing center. Of the does that kidded in 2022 and continued their lactation, we produced approximately 9,333lbs of milk in a year. We plan to have more does in milk and would like to produce 10,000lbs/year. This milk is used for personal use, herd shares, growing replacement animals, and raising meat animals.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$23,332.50

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The feed assistance will allow us to keep valuable breeding stock and increase herd share capacity for 2024.

Direct Beneficiaries Location

\$9,700.00

What is the current market value of your animals?

\$6,490.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$5,700.00

What was the number of animals you were feeding last year?

67

What type of animals were you feeding last year?

Poultry, Goats, Pigs, Rabbits

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Our farm has 4 registered mini-alpine does, 5 mini-alpine kids, and 1 mini-alpine buck. We milk 2 quarts of goat's milk daily per doe for 6 months, making cheese and canning the excess. Our chickens produce enough eggs which we waterglass for the winter. Our ducks and geese provide meat for our family. We had been able to reduce our food costs in past years.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$6,700.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The requested funds will secure a new buck and appropriate feed to sustainably maintain our small livestock herd. This will enable a milk share program, building community resiliency and preventing the reduction of available livestock that would threaten Alaskan food security.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

This project produces approximately 15 piglets and 4 lambs yearly which are sold to indirect beneficiaries for their consumption or stock for their own breeding programs. Approximately 3 hogs and 1 lamb are kept for myself and direct beneficiaries who assist with the seasonal upkeep and final butcher/processing of the livestock. Generally, the livestock is sold to indirect beneficiaries at unfinished weight (piglets/lambs) so dollar amount in value at sale in the next section is less than finished weight of the final products produced.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$5,500.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The potential of the requested funds will provide opportunity for continuance of maintaining brood stock year-round and provide both direct and indirect beneficiaries opportunity each spring to provide themselves and others with pork and lamb as well as brood stock for their own food security in the future.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Farm is minority/woman owned. Project goal is to turn old family homestead into a developing business able to provide jobs for children and food for customers. In 2024 we want to produce 1840 gallons for milk shares, 1000 pounds of beef, and 1400 pounds of pork. We keep pulling money out of savings for feed. Dividends helped somewhat but funds are low. We are hoping the market for cows is better but the cows may have overextended us this winter. We keep investing in hopes of this taking off the ground.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$28,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

This summer we had to liquidate much livestock due to inflation and feed prices, approximately 30 goats, 15 sheep, 20 pigs. We are hoping to avoid culling additional animals this winter and shift in cows. A grant would likely save 9 sheep and goats this winter from having to liquidate.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Our ambitious project aims to cultivate a sustainable source of food for the Kenai Peninsula by producing an estimated 2,300 dozen high-quality chicken eating eggs, nurturing 50+ robust broiler chickens, and harvesting 42 dozen nutrient-rich turkey eggs. In addition, we plan to offer approximately 50-120 turkey poults for sale within our community, empowering residents to enhance their own food security. Through this diversified approach, we not only contribute to local dietary needs but also foster a resilient food system that can withstand potential challenges, ensuring a reliable supply for the community's well-being.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$20,164.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

It's a crucial lifeline, preventing the depletion of our poultry stock and securing a vital local food source. Through this approach, we meet dietary needs, fostering a resilient food system for community well-being. Ensuring a robust stock is essential for self-sufficiency in crises, making these funds integral to our resilience.

Cow Farm

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Large animal operations (cattle, goats, pigs, reindeer, sheep, elk, yak, bison, etc.): \$5000

Amount of Funds

\$5,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

Yes

Animals Fed

What is the number of animals that you are currently feeding?

5

How many animals would you have to harvest without grant assistance?

2

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$5,300.00

What is the current market value of your animals?

\$9,800.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$4,500.00

What was the number of animals you were feeding last year?

3

What type of animals were you feeding last year?

Cows

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We produce milk (approximately 4 gallons a day), cream, butter and cheese from accumulated milk. Beef when the animal reaches appropriate butcher weight. Hanging weight of butchered cow is approx. 700-800lbs per cow.

What is the dollar value of the food that you plan to produce?

\$12,000.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

We are currently considering the sell of some cows just to afford our feed costs. These funds will allow us to continue to raise the cows until proper butcher weight and provide a local food source for our family and our community. Setting us up for a successful farm cycle.

Direct Beneficiaries Location

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We are a small chicken operation with 30 layer hens and 40 broilers. We provide up to 7 dozen eggs a week to our neighborhood and harvest 30 broilers for sale in our community.

What is the dollar value of the food that you plan to produce?

\$3,500.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

In order to continue to raise small livestock, we need assistance. The food and transportation costs have made production cost prohibitive.

It is crucial to continue to support local producers to help combat the significant food security issue we see in Alaska.

dairy

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

My milk production averages 20 gallons per day all year around (7,300 gal per year). This provides milk for 60 families in my herd share. Yogurt and cheese is also available for these members. As of this fall, I am also selling cheese retail. I have set aside approximately 1500# of cheese which is now aging in my basement. Previous to being able to sell retail, my herd share did not buy as much cheese as I could produce. My operation is likely to stay at this scale for the coming year.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$110,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The price of hay did not come down this year. In 2022, I did cull animals due to the increase in feed costs. In order to pay for hay, I have been selling off anything of value I could part with (trailers, equipment, etc.). I can't keep going like this.

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

The quality of production I plan to achieve this coming year is, approximately:

- 2,000 lbs. of beef & yak
- 900 lbs. of pork
- 300 lbs. of goat/lamb
- 6 gallons of milk per day
- 30 dozen eggs per week

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$30,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The greatest potential of these funds is keeping us afloat. If we are unable to secure funding, our family will have to stop all production, as many friends/families have already. This is a wonderful start, but funding amounts could be more counter-aligned to the marketed Alaskan hay prices. Thank you!!!!

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We are currently selling eggs at \$7 a dozen. We produce approximately 200 dozen regular sized eggs per year. 50 dozen for home use, 51 given away and 99 were sold. Every year we replace some chickens we lose to old age and predators. We also hatch out some of our own chicks from our most productive hens. We will have to cull or give away excess rosters. This does not include the bantam eggs we use or give away.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$1,400.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The price of feed and chicks continually goes up. We are having to hatch out our own chicks because of their costs now. It was \$7.50 a chick if purchased. Feed started at \$18 a bag and it is now \$30-35 a bag. We would have to cut to 50%.

For example: Development of the ABC Agriculture Resource Center

Production of corn free/soy free eggs

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Small animal operations (such as poultry, eggs, rabbit): \$2000

Amount of Funds

\$2,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

Yes

Animals Fed

What is the number of animals that you are currently feeding?

95

How many animals would you have to harvest without grant assistance?

30

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$4,011.39

What is the current market value of your animals?

\$2,375.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$4,963.63

What was the number of animals you were feeding last year?

76

What type of animals were you feeding last year?

Chickens/Turkeys

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I project to produce 1'136+ corn free/soy free eggs per month (94+ dozen). This is a past annual average..

What is the dollar value of the food that you plan to produce?

\$6,345.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

With the funds I will be able to continue to provide eggs to people in the community that have sensitivities to corn or soy in their diet

Rabbits, Egg laying chickens, meat chicken

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

This grant would assist in the ability to close the overhead gap so we could provide more quality self-sustaining food for our neighbors. We plan to produce 150 broilers of which 135 are sold or donated to the community. Our layers would lay approximately 885 dozen eggs for the year, providing 830 dozen to our local community. Our goals is to produce 80 rabbits, in hopes to sell 50.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$11,455.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

We could maintain the number of animals for longer, allowing more time for more production of high-quality food. Every doe we dispatch could have produced up to 24 more rabbits, providing 24-48 nutrient-dense meat opportunities for local buyers. Being completely self-sustaining, without shipping delays, creates community security and connection.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I would be able to produce about 900 dozen in 2024 with grant provided. With the birds I currently have I would be able to purchase a flat to carry over the year for current flock that has been strong producers and supply Starter feed for new chicks this April and overturn the older flock in later Fall. This will provide an opportunity to offer eggs to homes in need for Blatchley Middle School when I have offered each year the last few year via the principal.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$5,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The cost of feed has doubled. In New Mexico feed was 25 USD for a 50 lbs bag. I pay 47.99 per 50 lbs. If I am not successful to receive grant , I will continue to seek one but if unsuccessful I will need to discontinue plans for livestock.

Pig

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We plan to produce 5-6 pigs that are 12-16 months old at harvest time and 10-15 weaner pigs every year. Total estimated weight to be over 1000 lbs of meat. It would save a lot in feed costs if we could utilize fodder grown from barley instead of having all our feed shipped from Seattle. We would like to use a basic system that can consistently produce enough feed every day for our herd parents (4) and the ones that we will grow out. (1000 lbs of barley including freight is \$0.60 per pound, estimated feed produced is 7000 lbs.)

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$4,500.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

It is getting too expensive to have feed shipped up from Seattle and grazing is very limited on Prince of Wales Island. As we are the only pig farm on the island, local hunters will have to go without or buy imported pork to mix with venison harvested through subsistence.

What was your previous year's cost of feed for animals?

\$1,100.00

What was the number of animals you were feeding last year?

3

What type of animals were you feeding last year?

goats

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

I am on disability with a very restricted diet and rely on my goats for dairy and meat. I provide dairy and meat for myself and grandchildren. I had to keep my herd to three due to the climbing cost of feed last year. Now I am being faced with the reality of butchering the herd due to cost of feed. I get gallon of milk for drinking, yogurt and cheese. I also get ruffly 45Lbl of meat.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$3,100.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

For a family that cannot consume cow dairy nor afford meat due to the rising costs in our stores today, my goat farm is imperative to support good health for our family of 8.

What is this current year's cost for feed?

\$12,000.00

What is the current market value of your animals?

\$5,200.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$10,000.00

What was the number of animals you were feeding last year?

16

What type of animals were you feeding last year?

Goats, chickens, ducks, LGD

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We are currently producing about 2 dozen eggs per week sometimes less, but would like to be able to produce more. We share our eggs with our surrounding neighbors and family. For meat birds we like to have 6 per month (which is all we can really afford)

Goats to be producing 6 gallons a week depending. Ducks for harvest about 3 a month if possible.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$15,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

We live on ten acres and love to be able to produce food for our family and others. The high cost of feed has made it hard for us to be able to produce the amount of food we'd like because we are limited. Would love to produce more.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We currently are estimate 10,600lbs of beef off yearling animals and cull cows. More if we have to cull more cows.

What is the dollar value of the food that you plan to produce?

\$35,000.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

We've meticulously employed artificial insemination to enhance the quality of our meat-producing herd. The prospect of culling those genetics poses a significant setback, as rebuilding the herd to its current size would be a lengthy process, depriving us of the ability to scale up in the upcoming year.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

About 45 of our 55 chickens are hens, we can get anywhere from 8 to 12 dozen eggs estimated every week. In the winter due to sunlight restrictions and a period of rest, that drops to about 2 dozen every two weeks. Our roosters get upwards of 9 pounds, and our hens can sit around 7.5 - 8 pounds. We butcher to maintain the flock, and provide food for our family. The chickens also provide about 100% happiness upon interaction.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$4,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Alaska imported 95% of it's food last year, if even a fraction of farmers in Alaska were to no longer be able to do their job more than 1 out of 7 families would lack food security. Farming is good for Alaskans, and good for the state.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

The Reindeer Farm in Palmer Alaska supports Agritourism in our community proving jobs to local families and their children, in the care and feeding of our animals, which is open to the public. Adding a draw to tourist which supports local business in the Matsu Valley. We provide live animals sales and livestock to support other growing farms. Including education with high-school agriculture programs, 4-H clubs, and individual households. The production of animal sales both controls the herd population to manageable size and provide funds to feed the remainder of the herd.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$8,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Family run farms are difficult to support, given recent grain/hay shortages and availability as well as rising cost to transport hay from locations such as Delta Junction to Palmer, our choices have been to sell off more animals to feed the remainder. A losing game over time. We need help.

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Small animal operations (such as poultry, eggs, rabbit): \$2000

Amount of Funds

\$2,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

Yes

Animals Fed

What is the number of animals that you are currently feeding?

25

How many animals would you have to harvest without grant assistance?

0

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$1,660.00

What is the current market value of your animals?

\$600.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$650.00

What was the number of animals you were feeding last year?

9

What type of animals were you feeding last year?

Chickens

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We project we will produce 8 dozen eggs per week.

What is the dollar value of the food that you plan to produce?

\$1,728.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Without this grant, we would have to reduce our flock to a manageable number for our family only. We would not be able to supply eggs for the community, due to the increasing cost of caring for the chickens.

Direct Beneficiaries Location

Which census borough are the direct beneficiaries located? Please save after selecting a location to update the total funding amount.

Goats

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

We are providing herd shares for our goats in order for families to be able to harvest their own milk. The 6 are able to produce between 10-15 gallons a week.

What is the dollar value of the food that you plan to produce?

\$3,500.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The requested funds will bolster sustainable farming practices and mitigate the livestock reduction of the herd. This is crucial for food security as livestock sustains local communities, providing essential resources. Without intervention, reduced livestock could lead to heightened food scarcity, jeopardizing Alaska's overall food stability.

Direct Beneficiaries Location

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Seasonal egg production varies but we usually are getting 6 dozen eggs a week at peak season. We continue to expand the flock each spring and harvest nonlayers as meat.

What is the dollar value of the food that you plan to produce?

\$350.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The funds requested have the potential to regenerate Wrangell Alaska's livestock, enhancing disease prevention by preventing necessity of attempting restock from outside sources and promoting sustainable farming practices. This regeneration is vital for maintaining local communities' food resources. A decline in livestock could pose threats to Alaska's overall food security.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Purchase feed for 16 laying hens that will produce 120 dozen eggs to be sold to the community through the local farmers market and food hub, generating \$840 in eggs sales and \$300 in broiler chickens.

Purchase feed for 20 broiler chickens, half for household use and half to sell.

What is the dollar value of the food that you plan to produce?

\$1,140.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Funds would feed current laying hens. Our homestead is off the main road system and we hike a mile (sometimes 3 miles depending on road conditions) back to our home after we park our vehicle. This grant will really help us with food security, especially in the winter.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Our farm is Wolverine Farm, LLC. We are a grass fed and finished beef operation in the Lazy Mountain area of Palmer. There has been a Wolverine Farm here since 1953 and I run the beef side of things on behalf of my father-in-law, Larry DeVilbiss. I am slowly building back up the herd after he retired. This coming year I hope to sell 600 lbs of beef from our farm. With only one feeder steer and the rest females, I will be hard pressed to not cull a cow to pay for hay.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$3,600.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

We have been providing local grass fed beef for 4 generations to local Alaskans. No antibiotics, steroids, or hormones. Per lbs in the freezer, we are now cheaper than the grocery stores. With the rising cost of hay, we are having a hard time keeping animals over winter.

Egg and meat poultry operation in Healy

ALASKA MICRO GRANTS

Do You Currently Have a Livestock Operation?

Yes

By checking the box below, I confirm that I am over the age of 18 and a resident of the State of Alaska.

Confirmed

Type of Project

The following fixed awards will be offered to grantees:

Purchasing feed for animals for the purpose of producing meat, eggs, dairy, and other related by-products for human consumption:

Small animal operations (such as poultry, eggs, rabbit): \$2000

Amount of Funds

\$2,000.00

Current Affordability

Can you currently afford to feed all your animals without assistance?

Yes

Animals Fed

What is the number of animals that you are currently feeding?

33

How many animals would you have to harvest without grant assistance?

17

ALASKA MICRO GRANTS

Current Budget

What is this current year's cost for feed?

\$2,800.00

What is the current market value of your animals?

\$1,200.00

Last Year's Budget

What was your previous year's cost of feed for animals?

\$0.00

What was the number of animals you were feeding last year?

0

What type of animals were you feeding last year?

0

ALASKA MICRO GRANTS

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

In our first year raising poultry, we have produced 40 meat birds (chickens and turkeys), and keep 30 laying hens with 4 roosters.

Through October this equates to over 300lbs of meat for our family, as well as more than 300 dozen eggs that we have shared/sold to our community.

This grant will allow us to continue egg production throughout the winter, and expand our meat operation in the spring. We would like to produce enough meat birds to market 2 batches next summer along with our eggs.

What is the dollar value of the food that you plan to produce?

\$6,000.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

The combined costs of providing heat and nourishment to our poultry throughout the winter is not offset by the revenue they bring. Without the grant, our poultry operation will not realistically provide food throughout the winter. We will be required to cull our flock and build again in the spring.

10 Reindeer Carcasses a Year

What is the dollar value of the food that you plan to produce?

\$25,000.00

ALASKA MICRO GRANTS

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

Reindeer provides a high protein, high mineral, nutritious red meat with a high demand. As it becomes more expensive and time consuming to raise these animals, the ability to source animals could be compromised. Assistance in regards to basic feed costs would be one less reason to quit farming reindeer.

Project Details

In 100 words or less, provide details for your project. Details include: What is the quantity of food you plan to produce?

(For example: Amount of eggs per dozen, number of broiler chickens, pounds of beef, gallons of milk, etc.)

Each lamb produces about 30-45lbs of meat and adults give 80-100+ lbs. Their wool is valuable as well as their milk. Bringing in new genetics and selling their offsprings really help diversify and bring better quality to the meat and that is what I am working on. The current chickens lay enough for our daily use plus about an extra dozen to sell every week, plan to start incubating in February to raise and sell chicks and start breeding our new turkeys.

ALASKA MICRO GRANTS

What is the dollar value of the food that you plan to produce?

\$5,800.00

In 50 words or less, please describe what is the potential of requested funds to prevent the reduction of available livestock, and its devastating impact on Alaskan food security.

I had to pull in partners to prevent me from selling and harvesting my stock. I gave the meat back to them, reducing my profits this year. The potential of the requested funds help keep my preservation project going and to help feed them a decent quality hay from Anchorage.
