PRESS RELEASE

For Immediate Release: April 11, 2025

Avoid Driving on Fairbanks Forestry Roads During Breakup

(Fairbanks, AK) – With spring breakup approaching in Interior Alaska, the Fairbanks Area Forestry office is urging the public to avoid driving on select Tanana Valley State Forest roads from April 11 to May 19.

Affected logging roads include Cache Creek, Nenana Ridge, Rosie Creek, Skinny's, Bonanza Creek, Standard Creek, Two Rivers and Mosquito Creek.

The silt-based roads in the Fairbanks area become extremely soft and muddy during breakup, making them susceptible to damage from vehicles and ATVs. Some roads become impassable and motorists risk getting stuck and having their vehicles mired in mud up to their axles. Traffic in these tenuous conditions creates ruts, which channels runoff from snow melt and causes roads to wash out.

"If roads are severely damaged by traffic and runoff during spring breakup, repairs can cost thousands of dollars and lead to long-term closures," **Said Fairbanks Area Resource Forester Andrew Allaby with the Alaska Division of Forestry & Fire Protection.** "We're asking Alaskans to avoid using these roads while they are soft and susceptible to damage. Getting stuck or damaging a road this time of year isn't worth a load of firewood or preventing your fellow Alaskans from using the resource in the future."

The Department of Natural Resources' mission is to develop, conserve, and maximize the use of Alaska's natural resources consistent with the public interest.
