STAKES ARE HIGH!
PICK YOUR OWN PARCEL OF STATE LAND!

2019 Remote Recreational Cabin Sites Offering

State of Alaska - Department of Natural Resources
Division of Mining, Land, and Water

OFFERING #14 SCHEDULE
DRAWING APPLICATION FILING PERIOD:
Monday, August 19, 2019 at 10 a.m.
to Friday, October 11, 2019 at 5 p.m.

DRAWING:
Tuesday, November 5, 2019 at 10:30 a.m.

STAKING WORKSHOPS:
Workshops will be held in Anchorage and Fairbanks
between January 6, and January 26, 2020.

1st STAKING PERIOD:
Friday, January 31, 2020
to Monday, June 29, 2020

1st LEASE APPLICATION PERIOD:
Monday, February 3, 2020 at 10 a.m.
to Monday, June 29, 2020 at 5 p.m.

2nd STAKING PERIOD:
Friday, July 10, 2020
To Tuesday, September 8, 2020

2nd LEASE APPLICATION PERIOD:
Monday, July 13, 2020 at 10 a.m.
To Tuesday, September 8, 2020 at 5 p.m.

FOREWORD

Dear Fellow Alaskans,

A love for the outdoors and pioneering spirit is evident in those that proudly call Alaska home. By participating in the Remote Recreational Cabin Sites (RRCS) program, Alaskans can embrace their personal and individual sense of adventure by hand-selecting their own remote parcel off the beaten path. This unique program offers an opportunity like no other to personally select, stake, and purchase a piece of State land.

Through the RRCS program, and with some hard work and determination, you can settle Alaskan land of your own. I invite you now, after carefully reviewing the procedures and staking areas in this brochure, to submit an application.

Sincerely,
Michael J. Dunleavy
Governor

Dear Alaskans,

Since the first Remote Recreational Cabin Sites Offering in 2001, Alaska’s Department of Natural Resources has continued offering state land for private ownership in remote areas of Alaska. For those who dream of owning a piece of Alaska - whether building a hunting and fishing cabin, family retreat, or looking for solitude in the great outdoors - this program is for you.

In this, the program’s fourteenth offering year, four different staking areas are being offered: Kantishna II and Redlands II in the Northern Region and Innoko II and Mankomen Lake in the Southcentral Region. Although the process of staking a parcel is arduous work, the benefits are without equal as this program brings back the traditional Alaskan experience. The DNR Land Sales staff are on hand to guide you through the staking, leasing, and purchase process. I encourage you to take advantage of this unique program, as it provides a remarkable opportunity to own and enjoy your own remote slice of the Last Frontier.

Best Regards,
Corri A. Feige
Commissioner, Alaska Department of Natural Resources
The DNR land Sales staff welcomes your interest in the 14th offering of the Remote Recreational Cabin Sites (RRCS) program! We are eager to provide this unique opportunity for Alaskan residents to stake land for private ownership. Through responsible land management practices, education, and individual client services, we are contributing to the economic development and recreational opportunities within Alaska. Participation in this program will require a considerable investment of your time, resources, and effort. The rewards are tremendous as you embark on the adventure of staking a parcel of land that you will own and enjoy for years to come. This brochure is your guide through this complex process, and we recommend that you use it in the following manner:

1. **Before you apply, please consider if this program is for you:**
   - See if this program is right for you (page 4).
   - Submit an application for the drawing between August 19 and October 11, 2019 (page 29 and 31).
   - Cross your fingers and see if you’re drawn on November 5, 2019 (page 18).
   - Drawing winners can stake their parcels in the 1st staking period, which begins January 31, 2020, and ends on June 29, 2020 (pages 18-19).
   - Drawing alternates may also get an opportunity to stake in the 2nd staking period, which begins July 10, 2020, and ends on September 8, 2020 (pages 18-19).
   - You must apply to lease your parcel by the last day of your staking period. You must also submit your lease application within 14 days of staking (pages 20 - 21).
   - Make quarterly payments on your parcel lease for 3 years (page 20).
   - During the lease, DNR surveys and appraises your parcel (page 21).
   - After 3 years you can purchase your parcel from the state or enter into a one-time 5-year renewal of your lease. To purchase, you can pay in full or pay 5% of the remaining balance to enter into a state purchase contract with DNR (page 22).

2. **If this program is a good fit for you:**
   - Pick a Staking Area to apply for (pages 8-17).
   - See if this program is right for you (page 4).
   - Pick a Staking Area to apply for (pages 8-17).
   - Submit an application for the drawing between August 19 and October 11, 2019 (page 29 and 31).
   - Cross your fingers and see if you’re drawn on November 5, 2019 (page 18).
   - Drawing winners then receive a staking authorization (page 18). Drawing alternates may also get an opportunity to stake in the 2nd staking period, which begins July 10, 2020, and ends on September 8, 2020 (pages 18-19).
   - Attend a staking workshop to learn the requirements for a properly staked parcel (page 18).
   - Drawing winners can stake their parcels in the 1st staking period, which begins January 31, 2020, and ends on June 29, 2020 (pages 18-19).
   - Drawing alternates may get an opportunity to stake in the 2nd staking period, which begins July 10, 2020, and ends on September 8, 2020 (pages 18-19).

3. **On pages 18—22, read about the three-year process of staking, leasing, and purchase, that you will go through if you are drawn and stake a parcel in this year’s program.**

4. **Finally, pages 23—28 contain general considerations for applicants, including other information and resources for locating, staking, and leasing your parcel.**

Thank you for your interest in participating in the Remote Recreational Cabin Sites Staking Program. We look forward to receiving your applications.
How the Program Works

Before accepting applications to the Remote Recreational Cabin Sites (RRCs) program, DNR identifies sites that will be offered for staking. This year, four areas are being offered: Innoko II, Kantishna II, Mankomen Lake, and Redlands II. To participate in this program, you must apply, win, stake, apply and lease, and buy.

Apply: As an Alaska resident, you can apply for one or more areas that are of interest to you. You may only win one area per year. This year, the application period opens on August 19, 2019 at 10:00 a.m. We strongly recommend that you visit the staking areas you are considering before applying. Make sure you submit your application(s) before the deadline of October 11, 2019 at 5:00 p.m.

Win: After the application deadline, DNR holds a drawing to determine winners and alternates for each area being offered. This year’s drawing is on Tuesday, November 5, 2019 at 10:30 a.m.

Stake: After your name is drawn, you will receive a staking packet that includes a staking authorization, general staking information, detailed instructions, and specific restrictions for the area you are staking in. Staking workshops are a great way to learn about the staking, lease, and purchase processes. Staking workshops will be held between January 6 and January 26, 2020.

If there are more applicants than staking authorizations available for a staking area, there will be two separate staking periods for that area. In this case, drawing winners can stake their parcels in the 1st staking period, beginning January 31, 2020 at 8:00 a.m., and ending June 29, 2020 at 5:00 p.m. Drawing alternates may get an opportunity to stake in the 2nd staking period if there are unused authorizations from the first staking period. The 2nd staking period begins July 10, 2020 at 8:00 a.m., and ends on September 8, 2020 at 5:00 p.m.

If there are fewer applicants than staking authorizations for one staking area, there will be one staking period for that area. Stakers for that area will have between January 31, 2020 at 8:00 a.m. and September 8, 2020 at 5:00 p.m. to stake.

Apply and Lease: After staking, you must submit your lease application describing your staked parcel prior to the end of the staking period in which you staked. You must also submit your lease application within 14 days of staking. NOTE: You will have less than 14 days to submit your lease application if there are less than 14 days before the end of your staking period. DNR will review your lease application, and if approved, will issue your lease after the final staking period ends. You will make 12 quarterly payments while DNR surveys and appraises the parcel. Lease payments will be applied towards the lease rental fee, survey deposit, and appraisal deposit.

NOTE: It is up to the customer to provide proof of residency at the time of lease application. If you are unsure of your residency status after reading “DO YOU QUALIFY,” on page 5, please contact our office prior to applying for the drawing.

BUY: After the parcel has been surveyed and appraised, you then have the opportunity to purchase the parcel at the appraised value or a minimum of $1,000 over the actual survey cost, whichever is greater. The payments you make for the survey costs will be credited toward the purchase price for the appraised value of your parcel. You will have the option to either pay the remaining balance in full or to pay 5% of the remaining balance to enter into a state purchase contract to complete the purchase of your parcel. This purchase typically occurs within three to four years from the time of lease issuance.

Important: For a small number of participants, after determining the appraised value of the parcel and applying credits, it is possible that the remaining balance will be $2,000 or less. If this is the case, you will not be able to finance the purchase and will be required to pay the remaining balance in full.

Time, Money, and Resources Commitment

Staking a parcel of land in a remote area is very different from purchasing a previously surveyed parcel because of the requirement of time, finances, and resources, even as the rewards are significant. These are just a few of the challenges you may face as you stake and acquire a remote parcel:

First, travel to the designated areas may be costly and time consuming. Staking areas located off the road system may require travel by small plane, boat, ATV, or snowmachine, and you may incur the costs associated with charter, rental, or purchase of equipment. You may incur these costs multiple times over the staking period if you do not complete staking in one visit and each time you travel to your parcel. In addition, you may be asked to return to the field to correct a staking error or to do additional work if your application was determined to be incomplete. Access to each staking area is further explained in the area summaries on pages 8 – 17.

Second, staking your parcel will be time consuming and labor-intensive, as you must mark the corners of your parcel and brush the lot lines to prepare the parcel for survey and appraisal. Brushing lot lines requires the use of equipment, such as a chainsaw, to cut trees and brush to create a line of sight along the boundary lines of your parcel. Staking will also require you to know or learn basic skills of field navigation and parcel measurement using a map, compass, tape measure, and GPS. Read pages 18 – 19 to learn more about the staking process.

Additionally, there is no guarantee that it is practical to traverse or construct a trail on the legal access to the staking areas and parcels, even though legal access does exist. Construction of a trail to develop the legal access to a parcel may be costly and labor intensive. Learn more about legal access on page 24.

Improvements to your parcel may also be costly and labor intensive. If you plan to build on your parcel, carefully consider how you will bring in building materials. Development of your parcel may require permits from other agencies or permitting authorities: this may include building permits, stream crossing permits, wetlands fill permits, etc. Additionally, services (fire, ambulance, road maintenance, refuse collection, schools, etc.) are usually very limited or nonexistent. Utilities may be prohibitively expensive to bring to the site. Learn more about parcel development considerations on pages 24 – 27.

In addition to the costs associated with travel, staking, access, and development, you must lease your parcel from the state for a period of three years or more. You will make quarterly deposit payments during your initial three-year lease term to cover the estimated costs of survey and appraisal. DNR will use these deposits to complete the survey and appraisal of individual parcels. There are also lease fees and administrative fees. Read pages 20 - 21 for more information about the leasing process.

The purchase price of your parcel will vary depending on the size of your parcel and where you stake. Base appraisal reports give estimates of how much a parcel might cost depending on size, location, and other factors. Reports are available for each area offered at the DNR Public Information Centers and online at http://landsales.alaska.gov. The base appraisals can help you estimate the approximate value and purchase price of your parcel so that you can stake a parcel that will fit within your budget. Learn more about parcel appraisals on page 21.

Prospective applicants should read the information in this brochure thoroughly and be aware of the time, finances, and resources involved before deciding whether to participate. Through hard work, planning, and determination, participants can overcome these challenges, have an adventure of a lifetime, and gain ownership of a parcel of their very own that they can enjoy for years to come.

Note: After the conclusion of the staking period, the department assesses the number of staking authorizations remaining in each staking area and, if practical, surveys administrative parcels to be offered for sale at a later time. Creating additional parcels can help reduce the survey costs paid by each staker; this may be especially true for parcels that were staked away from adjacent parcels. In addition, the state reserves the right to offer additional parcels of land adjacent to or near previously sold parcels, thereby potentially increasing the population density in that area. Public notices about potential activities nearby are available from DNR Public Information Centers.

http://landsales.alaska.gov/
DO YOU QUALIFY?

To be eligible to stake a parcel in the RRCS program you must be a current Alaska resident and age 18 or older at the time you submit a drawing application. Corporations, businesses, and non-Alaska residents are NOT eligible to apply for the Remote Recreational Cabin Sites program.

Qualifying for the Remote Recreational Cabin Sites Program

To participate in the RRCS program, you must certify and prove that:

1. **You must be a current Alaska resident as defined by AS 01.10.055 Residency. This statute defines a person's establishment of residency as "being physically present in the state with the intent to remain in the state indefinitely and to make a home in the state." You must have been a resident of Alaska for at least one year (12 months) immediately preceding the date of the drawing application (11 AAC 67.005 General Qualifications for Remote Cabin Site).**

2. **You are 18 years of age or older on the date of application (11 AAC 67.005 General Qualifications).**

3. **You have not held a purchase contract or lease issued by DNR that has been administratively foreclosed or terminated for cause within the past five years.**

4. **You are not in default for nonpayment on a purchase contract or lease issued by DNR.**

5. **You are not in default for nonpayment of municipal taxes or assessments on a purchase contract or lease issued by DNR.**

For required and acceptable items of proof of residency, see the “Proof of Residency” section below.

Past participation in state land sales does not prohibit you as an individual from participating in the RRCS drawings. You may also participate in subsequent offerings under the RRCS program, if eligible at the time of drawing application.

Stakers will be required to submit acceptable proof of Alaska residency with the lease application. Failure to ensure that DNR receives the required proof of residency with your lease application and by the staking deadline will result in the rejection of your application, in accordance with the terms of this brochure and your certified agreement on the application form.

Proof of Residency

Only Alaska residents may submit applications for the Remote Recreational Cabin Sites (RRCS) drawing. Proof of residency is required at the time of lease application. In addition, you must prove Alaska residency to qualify for a Veterans’ Discount.

Proof of residency must include:

1. A copy of your valid and current Alaska Driver’s License or State-issued ID card. If you do not have a valid, current Alaska Driver’s License or State ID card, please contact DNR Land Sales before applying for the drawing to inquire about acceptable substitutions for this requirement. If you have a driver’s license or ID card issued by another state, you are not considered an Alaska resident for the purposes of these programs.

2. AND ONE of the following items:
   - Alaska Permanent Fund Dividend confirmation of eligibility or confirmation of receipt of funds;
   - Employment, unemployment, or military records showing current or recent employment in Alaska;
   - Current and valid occupational licenses issued by the State of Alaska;
   - Income tax records showing employment in Alaska; or
   - School records showing current or recent school attendance in Alaska.

The Director may accept other forms of proof. Applicants are required to submit as many items of proof of residency as needed to document the minimum, one full year of Alaska residency. If you are relying on an item not specifically listed above or have questions about residency, please contact the Land Sales team before applying for the drawing or applying for a Veterans’ Land Discount.

To confirm PFD eligibility or payment, follow these directions:
2. Click on the blue “myPFD” button.
3. Click on the blue “Yes, proceed.” button.
4. On the “myPFDInfo Application Search” page, choose the most recent year as the Dividend Year, and fill in the remaining Applicant Details fields with your personal information.
5. Click the “Submit Search” button.
6. After the screen loads, print, photograph, or take a screenshot of the “PFD Information for [Your Name]” page that shows your name and the Application status.
7. Send the printout or the file of the “PFD Information for [Your Name]” page to DNR Land Sales.

Drawing applicants must have been Alaska residents for one year prior to the date they submit their applications. It is the responsibility of the applicant to determine if they are an Alaska resident BEFORE submitting an application. Proof of residency is not required until the time of lease application, but if you turn in a lease application after staking a piece of land, and it is determined that you did not meet residency requirements when you submitted your drawing application, your lease application will be disqualified, and you will have no rights to lease or purchase the land.

If you do not have a valid Alaska Driver’s License, State ID, or an Alaska Permanent Fund Dividend confirmation of eligibility, please contact the Land Sales Section BEFORE applying for the drawing to determine if you qualify.

You are not allowed to claim Alaska residency during any period that you claimed residency in another state, were registered to vote in another state, or claimed another state or nation as your residence for purposes such as taxes, school tuition or benefits, including obtaining a driver’s license or ID from another state.

All documents submitted as proof of residency must have dates clearly showing that you are currently an Alaska resident and that you were a resident of Alaska one year prior to the date of your drawing application, with intent to make a home and remain in the state indefinitely. It is your obligation to prove that you are eligible for this program.

Failure to prove Alaska residency under these terms will result in the loss of your opportunity to participate in the offering and may result in the forfeiture of some, or all, of your deposit and fees. You are strongly encouraged to gather their required documentation well in advance of the required date of submission.

Residency Consideration for Active Duty US Armed Forces Personnel

If you are on active duty in the US Armed Forces (or are accompanying a family member on duty) during part or all of the year leading up to the drawing or auction, the following considerations apply to establishing or maintaining Alaska residency.

- If military service takes you out of Alaska, you can retain Alaska residency by continuing to register Alaska as your permanent residence with the military; maintaining your Alaska driver’s license, and maintaining other ties with Alaska such as receiving the Permanent Fund Dividend, voting, maintaining vehicle registration, etc. The expiration date of non-commercial Alaska driver’s licenses is automatically extended while you or your spouse is on active duty outside of Alaska; see http://dps.alaska.gov/dmv/akmil/military.htm and 2 AAC 90.430 for details.

If military service has brought you to Alaska, you must take additional actions to establish Alaska as your residence, such as obtaining an Alaska driver’s license or state ID card, registering to vote and voting, registering your vehicle in Alaska, registering Alaska as your residence with the military (DD Form 2058), and paying local property taxes on property you personally own as a residence, at least one year immediately preceding the date of submitting your drawing application.

- If you collect overseas pay for being stationed in Alaska, or claim some other state as your residence for purposes such as taxes, school tuition, or benefits, including obtaining a driver’s license from another state, you do not qualify as an Alaska resident for this program.

If you have questions about residency and military service, please contact the Land Sales team prior to applying to participate in the RRCS drawing, or applying for a Veteran’s Land Discount.
Keep Your Address Current with Land Sales Section (LSS)

Any notice or other correspondence sent to you is sufficient if mailed to the last address of record, even if it does not reach you. In accordance with 11 AAC 67.005 (g) General Qualifications, an applicant or bidder is required for keeping Department of Natural Resources, Division of Mining Land & Water (DNR DMLW), Land Sales Section (LSS) informed of their current address throughout the bid/application, lease, contract, and patent processes. A change of address form must be signed by the applicant or purchaser, and must be submitted to LSS at 550 W. 7th Ave., Ste. 640, Anchorage, Alaska 99501, (907) 269-8594, Fax (907) 269-8514. Please contact LSS for this form.

The application or bid is subject to rejection if LSS is unable to contact the applicant or lessee at the current address of record. Please note that notifications sent to other Sections, Divisions, or Departments may not reach LSS and your records may not be updated. Failure to keep your address and contact information current with LSS could result in closure of your application, loss of all opportunity, right, title, and interest in the land, or termination of your contract.

Brochure Changes and Errata

This brochure is intended for informational purposes only and does not constitute an offer to sell. At times, modifications in the terms of a land offering become necessary after the publication of the brochure. Changes are announced and published as soon as possible in supplemental information sheets called “Errata.” You may obtain a copy of new or existing Errata from the DNR Public Information Offices or online at http://landsales.alaska.gov/.

It is your responsibility to stay informed of any changes or corrections prior to submitting an application. DNR reserves the right to make changes up to the time a contract or patent is issued. DNR reserves the right to waive technical defects or errors in this publication.

Inspect the Site

Important: It is the responsibility of all interested parties to fully review this brochure and personally locate and thoroughly inspect the staking area and your desired parcel location before applying for a staking authorization, lease, contract, or purchase.

DNR strongly urges anyone wishing to stake and purchase a parcel to first review all information and then personally inspect the land before submitting a drawing application. The land chosen by an applicant/staker is taken AS-IS and WHERE-IS with no express or implied guarantees as to the land’s suitability or fitness for any intended or particular purpose. The submission of a lease application of a staked parcel constitutes acceptance of the parcel AS-IS and WHERE-IS. The reader is referred to the “No Warranty of Suitability or Fitness” section on page 24 of this brochure for more information.

Land Records, Survey Plats, and Maps

Comprehensive area information can be found by researching various state and federal websites or by contacting or visiting one of the DNR Public Information Centers. A valuable resource developed by DNR and the Bureau of Land Management (BLM) is http://dnr.alaska.gov/landrecords/, which lists links to many DNR and BLM websites where you can find information such as recorded survey plats, federal surveys, federal master title plats, state status plats, recorded subdivision covenants, mapping/GIS applications, and case file summaries. Some private businesses may also carry USGS maps in your area. To find the correct reference for the USGS map(s) of your area, look under the vicinity name and the upper right corner of the state survey plat. Geographic maps may be purchased from the United States Geological Survey (USGS) online at https://store.usgs.gov. They may also be purchased at the Map Office, Geophysical Institute, University of Alaska, Fairbanks, 903 Koyukuk Drive, P.O. Box 757320, Fairbanks, AK 99775-7320, (907) 474-6166 fax; (907)474-2665, uaf-maps@alaska.edu; or from numerous other commercial sources. Full size copies of the recorded survey plats are available at DNR Public Information Centers or the appropriate District Recorder’s Office. A nominal fee for the maps may apply. Find the appropriate district Recorder’s Office at: http://dnr.alaska.gov/sud/rec/ findYourDistrict.cfm.

For more information on finding and using basic parcel information sources like surveys and case files, see the Online Resources section of this brochure or visit one of the DNR Public Information Centers.

- 2019 Remote Recreational Cabin Sites Staking -

Tentatively Approved Lands

The State of Alaska may not yet have received final patent from the federal government for some of the land in this offering. Such lands are designated as “tentatively approved.” Title for parcels on tentatively approved land will be conditioned upon the State of Alaska receiving patent from the federal government.

In accordance with 11 AAC 67.015 Land Available, in addition to selling, leasing, or granting patented land, the division (DMLW) may conditionally sell, lease, or grant land that has been tentatively approved by the federal government for patent to the State, but that is not yet patented. A sale, lease, or grant on this conditional basis will be cancelled if the state is denied title to the land.

Based on the date of cancellation, a pro rata portion of money paid in advance to lease such land will be refunded, or may be applied to the lease of another parcel. The state is in no way liable for any damage that may be done to the land by the purchaser, lessee, or grantee, or liable for any claim of any third party or for any claim that may arise from ownership. If the state does receive title to the land, the conditional sale, lease, or grant then has the same effect as other sales, leases, or grants.

Department regulations provide that if for any reason the state is denied patent to the land, a sale, lease or grant on this conditional basis will be canceled, and the money paid to purchase the land will be refunded. The state has no further liability to the lessee, purchaser, or any third party for termination of the contract.

Ordinarily, there is little risk of loss of title associated with tentatively approved land, however, there may be practical problems including: (1) title insurance companies may not provide title insurance unless this contingency is “excepted” from coverage, and (2) banks may not loan money for construction on, or the purchase of tentatively approved lands.

In this Remote Recreational Cabin Sites offering, Innoko II, Kantishna II, and Mankomen Lake staking areas are all or in part on tentatively approved land.

Misrepresentation - False Information

If you provide false information on forms or other required documents, you may be prosecuted to the full extent of the law. In addition to any other penalties prescribed by law, you will forfeit all monies paid and may lose all right, title, and interest in the land if a lease or purchase contract has been issued.

Privacy Notice

AS 38.05.035 Powers and Duties of the Director authorizes the Division Director to decide what information is needed to process an application for the sale or use of State-owned land or resources. This information is made a part of the State public land records and becomes public information under AS 40.25.100 Disposition of Tax Information and AS 40.25.120 Public Records; Exceptions; Certified Copies; unless the information qualifies for confidentiality under AS 36.05.035; (a)(8) and confidentiality is requested, or AS 45.48, Alaska Personal Information Protection Act. Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 40.25.310 Information Accuracy and Completeness by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210 Unsworn Falsification in the Second Degree.

Personal information (such as social security numbers, credit card numbers, bank accounts, etc.) is held confidential. However, all other information concerning applications to lease or purchase State-owned land is considered public and available upon request. Such public information may include, but is not limited to applicants, lessees, and payment histories.

Right to Adjourn/Postpone/Cancel

DNR reserves the right to postpone or cancel an offering, in whole or in part, if necessary to protect the interest of the State of Alaska. Such a postponement or cancellation may occur at any time prior to or during the offering, even after the applicant has been notified, but prior to DNR signing a final conveyance document. In the event that DNR cancels this offering, applicable fees, deposits, or payments may be refunded. This brochure is intended for informational purposes only and does not constitute an offer to sell.

http://landsales.alaska.gov/
Apply for a Staking Authorization

Application forms are available in this brochure, at the DNR Public Information Offices, and on the DNR web site http://landsales.alaska.gov/ . Applications may be completed and submitted online using a credit card. Please visit the above website address for further information. Application forms may be reproduced.

You may file only one application per staking area. Although you may apply for multiple areas, you may receive only one staking authorization in this offering, so be sure to file only for the areas for which you would want to be selected. You will be awarded the staking authorization for the first staking area for which your name is drawn during the drawing or for which there are fewer applicants than available authorizations.

For each staking area that you want to apply to, you must:

1. Complete a 2019 Remote Recreational Cabin Sites Staking Authorization Application/Eligibility Statement for each staking area you wish to apply for. The application must contain the staking area name and number, your name, mailing address, telephone number(s), date, and your signature.

2. Pay a non-refundable $75 drawing application fee with each application submitted. This fee may be paid by a personal check, cashier's check, certified check, credit card, or money order. Do not send cash. Checks should be made payable to the Department of Natural Resources. Checks returned for any reason will invalidate the application(s). No application will be accepted without the fee. If submitting multiple applications, the fees may be paid with a single check, money order, or credit card transaction.

3. Certify that you are an eligible participant and have been an Alaska resident for at least one year (12 months) immediately preceding the date of your drawing application.

An agent who presents a power of attorney or other notarized authorization of agency may file an application on behalf of a qualified applicant.

Once an application is filed, it may not be transferred to another staking area or to another applicant.

If you wish to withdraw an application, we must receive your request in writing prior to the end of the application period. Mail or deliver your request to one of the DNR Public Information Centers listed below. Your application fee is non-refundable.

Your application will be rejected if:

• It does not include the $75 drawing application fee.

• It is received before or after the application period.

• It is incomplete, unsigned, or illegible.

• A bank or credit union refuses payment on your check for any reason.

• Your credit card is declined.

Please note that filing an application does not grant or vest any right, title, or interest, or expectancy of a right, title, or interest in a Remote Recreational Cabin Site.

Multiple Applicants Not Allowed

There may be only one applicant per Remote Recreational Cabin Sites drawing application. An authorization to stake a Remote Recreational Cabin Sites parcel will be awarded to the individual drawing applicant, only. The individual who received the staking authorization MUST be the only person on the lease application and subsequent lease. Keep in mind that individuals cannot be added or removed from the lease except by court order.

Filing Policy for State Employees

State of Alaska employees, employees of state-funded agencies (such as the University of Alaska), or employees of a contractor employed by the State of Alaska or a state-funded agency, who gained knowledge of a land offering area at State of Alaska expense or were in a position to obtain inside information about the offering process, may not file an application during the last 15 days of the application period (11 AAC 67.005 General Qualifications). If you have questions about employee eligibility, contact one of the DNR Public Information Centers before applying.
The Innoko II staking area is located along the North Fork of the Innoko River, approximately 195 air miles southwest of Manley Hot Springs and 68 air miles northwest of McGrath. This area offers stakers the opportunity to own remote, river accessible property in Western Alaska. This area can be accessed by the Innoko River by boat in the summer and snowmachine in winter. The Innoko II staking area covers approximately 16,500 acres. There are 41 remaining authorizations for this staking area. **Southern portion of staking area is subject to rising river levels that may impact your parcel.** Parcels may be between 5 and 20 acres.

The Kantishna II staking area is located approximately 70 air miles west of Fairbanks, and 30 river miles south of the confluence of the Kantishna and Tanana Rivers. Scenic views and river access make this a desirable area for recreation activities such as hunting and fishing. There are 37 remaining authorizations left in the Kantishna II staking area which encompasses approximately 23,135 acres. Parcels may be between 5 and 20 acres.

The Mankomen Lake staking area is located just south of the eastern edge of the Alaska Range. Approximately 30 air miles east of Paxson, and 53 air miles southwest of Tok, this staking area is a great jumping off point for sheep, moose, and caribou hunting. This area can be accessed by float plane, ski plane, or via RST trail system from Mentasta or Chistochina. There are 25 staking authorizations available in this area. Parcels may be between 5 to 20 acres.

The Redlands II staking area is approximately 25 miles west of Manley Hot Springs, and 110 miles west of Fairbanks. With a staking area of approximately 7,550 acres along the Chitanana River, the opportunities for fishing, snowmachining, and hunting are plentiful. This area can be accessed by boat from the Tanana River in the summer and snowmachine in the winter. There are 25 staking authorizations available in this area. Parcels may be between 5 to 20 acres.
Pages 10-17 contain more detailed information about each staking area, including easements, setbacks, and other restrictions which may apply when staking your parcel. Estimated survey and appraisal costs are also included, which will be used to calculate the quarterly lease payments for your parcel during the 3-year lease term (see page 20 for details).

Additionally, the following pages include base appraisals, which estimate approximate values for hypothetical parcels of different sizes within each staking area. It is important to recognize that the base appraisals are estimates, and that the actual per acre price for a staked parcel may vary from these estimates. Please see page 21 for more information about base appraisals.

These prices are estimates only!
- 2019 Remote Recreational Cabin Sites Staking -

**Innoko II Remote Recreational Cabin Sites**

**Why Stake?**
Opportunity to own remote river accessible property in Western Alaska. The Innoko National Wildlife Refuge abuts the southern boundary of the staking area.

**Location**
Located approximately 65 miles northwest of McGrath and 65 miles south of Galena, situated at the confluence of the Innoko and North Fork Innoko Rivers.

**Terrain & Major Features**
Natural features include the hills along the Northwest boundary of the staking area. The Innoko and North Fork Innoko Rivers flow through the staking area. There are also numerous lakes throughout the staking area. A large portion of this staking area is located within a flood plain.

**Access**
Primary access is by floatplane during the summer to the lakes and rivers within the project area and by ski plane, snowmachine, or dog sledding during the winter. Other possible, although not practical, access is by boat on the Innoko River from Ophir during early and mid summer.

**Climate**
Temperatures average between 30 and 70 degrees F in summer and between -20 and 20 degrees F in winter with extremes being approximately 90 and -60 degrees F. Annual precipitation averages 13 inches including 63 inches of snowfall.

**Soils**
The soils in the lowlands are commonly shallow, over permafrost, and are constantly wet. Well-drained soils without permafrost occupy the rolling hills, terraces and natural levees on the floodplain.

**Vegetation**
White spruce stands occur on the natural levees along the river and in the nearby foothills. Sedges, mosses, tussocks, and shrubs are common throughout the area.

**Water Source**
The Innoko and North Fork Innoko Rivers, along with the numerous lakes and ponds, provide surface water within the staking area. Ground water quality and depth is unknown.

**Title**
The State holds Tentative Approval to lands within K019S012E. All other lands within the staking area are patented to the State of Alaska. Patent # 50-77-0007, State Case File: G3 2081.

**Fire Management Option**
The project area is located within a Limited Fire Management Option. Contact the Division of Forestry for updated information regarding management options.

**Game Management Unit**
The staking area is in Game Management Unit 21A.

**Municipal Authority**
This project is located within the Unorganized Borough and subject to the State of Alaska platting authority.

**Mineral Estate**
The project area is closed to mineral entry under MO 1103.

Innoko II Staking Area

This map is for graphic representation only. It is intended to be used as a guide only and may not show the exact location of existing surveyed parcels or show all easements and reservations. Source documents remain the official record.

1. All parcels staked on land owned by the State of Alaska that contain land within 50 feet of a surveyed or protracted (unsurveyed) section line, are subject to a 50-foot wide easement on each side of the section line, which is reserved to the State of Alaska for public highways under AS 19.10.010. Parcels may not be staked over a surveyed section line.

2. Parcels may not be staked across any public or navigable water body. Parcels are subject to a 50-foot public access easement along the ordinary high water mark.

3. Parcels are subject to a 100-foot building setback from the ordinary high water mark of all streams and all other water bodies determined to be public or navigable. Some water bodies may also have staking setbacks or water frontage limitations.

4. A staking setback is required from unauthorized improvements.

5. A staking setback is required from airstrips used by the public.

6. Most surveys (i.e. ASIL, US) have survey monuments at each corner, which can be used as reference points and common corners when staking. See the survey plats for information on monument corner numbers, bearings, and distances. Monuments found in the field take precedence over the graphic record.

7. There are public access easements along most ASILS boundaries. Check the survey plats for additional information.

8. Trail easements have not been verified and their actual location may differ on the ground. Labelling of a trail easement does not guarantee the existence of a trail.

9. Unauthorized airstrips are not maintained by the Department of Natural Resources. Use of airstrips on state land that are not authorized is at your own risk.

10. See the general staking instructions and area-specific supplemental instructions.
Kantishna II Remote Recreational Cabin Sites

**Why Stake?**
Recreation, hunting, trapping, wildlife habitat, forestry, settlement, and resource harvest for personal use are some of the uses of state land in this area.

**Location**
The Kantishna II staking area is located approximately 70 air miles west of Fairbanks, 110 river miles west of Nenana and 30 river miles south of the confluence of the Kantishna and Tanana Rivers.

**Terrain & Major Features**
This area is generally level, situated in the Tanana River Valley, and ranges from 325 to 650 feet elevation. Steep bluffs are present in the northern portion of the staking area. Localized steeply sloping, stabilized sand dunes are likely present throughout the interior portions of the area. A portion of the Kantishna staking area directly borders the Kantishna River.

**Access**
Primary access to the staking area is via riverboat and floatplane during the summer, and snowmachine and ski-plane during the winter.

**View**
Potential views of the Kantishna River and surrounding landscape.

**Climate**
Typical of Interior Alaska river valleys, this area has a cold, continental climate with extreme seasonal temperature variation and low precipitation. Summer temperatures range from 35 to 90 degrees F. Winter temperatures range from -65 to 45 degrees F. Average annual precipitation is 10 inches with 68 inches of snowfall.

**Soils**
Dominant soils in the lowlands around the Kantishna River consist of poorly drained lowlands and silt or sandy loam with shallow permafrost, interspersed with well drained natural loess along current or historic river channels. Soils in the upland portion of the staking area consist of silty loess over sand and stabilized sand dunes. Discontinuous permafrost may be present.

**Vegetation**
Vegetation within the proposed project is typical of Interior Alaska, with areas of mixed hardwoods and spruce found along the riparian areas and in the uplands. Large areas in the lowlands off the river are wet and contain tussocks and mats of moss. Contiguous stands of black spruce are found within the staking area.

**Water Source**
Water quality and depth is unknown. Small drainages provide surface water within the staking area. The Kantishna River and sloughs are silt laden.

**Title**
The State holds Tentative Approval to lands within F003S013W. All other lands within the staking area are patented to the State of Alaska, Patent No. 50-76-0060 and 50-86-0438. The applicable State casefiles are GS 516, GS1063, and GS 1065. The estimated appraisal cost for this area is $500 per parcel. The estimated survey cost for this area is $4,600 - $5,200 per parcel.

**Fire Management Option**
The staking area has a Full Protection Management Option. Contact the Division of Forestry for updated information regarding management options. Stakees are urged to locate parcels in fire defensible areas, hardwood stands, or near water bodies to reduce potential for fire.

**Easements, Setbacks & other Restrictions**
The following restrictions may be applicable to parcels within the Kantishna II staking area:

1. 30-foot public access and utility easement along all interior parcel lines;
2. a 50-foot continuous easement upland from the ordinary high-water mark of public or navigable water bodies in accordance with AS 05.05.127 Access to Navigable or Public Water;
3. a 50-foot wide section line easement on each side of surveyed or prorated section lines on State-owned land in accordance with AS 19.10.010 Dedication of Land for Public Highways and 1 AAC § 01.025 Section Line Easements; section-line easements may be vacated under AS 19.30.410 Vacation of Rights-of-Way and 11 AAC § 01.065 Vacation of Easements;
4. 60-foot easement centered on existing trails through and along staked parcels;
5. 00-foot building setback from the ordinary high-water mark of public or navigable water bodies;
6. 300-foot staking setback from the ordinary high-water mark of the Kantishna River; and
7. a 5-foot survey easement from the nearest practical point on the property boundary to control monuments within the parcel and an easement with a radius around the control monument, and as applicable, a 5’ direct line-of-sight easement from the control station to an azimuth mark or other control monument.

Staking will not be allowed within reserved areas imposed prior to or during the staking period, including reserved areas to avoid locating parcels within or near a specific resource or third-party interest, or to reserve areas for public use.

**Survey & Appraisal Costs**
The estimated survey cost for this area is $4,600 - $5,200 per parcel. The estimated appraisal cost for this area is $500 per parcel.

Mankomen Lake Remote Recreational Cabin Sites

Why Stake? Very scenic, remote interior lake near the Alaska Range. An informal trail network around the lake exists from current users and adjacent landowners.

Location The project area surrounds Mankomen Lake, approximately 65 miles northeast of Glennallen, approximately 25 miles west-northwest of Mentasta Lake, and 25 miles north of Chistochina. It is located between the Chistochina and Siana Rivers.

Terrain & Major Features The project area appears to be relatively flat but is just south of the Alaska Range. It also has high ridges, long foothills, and small outwash plains. There are many lakes, streams, and some scattered muskell. Hilpine plateaus and sharp ridges are present closer to the mountains.

Access Plane access is primary. There is an apparent airstrip on State land within the project area, but the large airstrip east of the lake is on private property. Overland access is secondary. The two main routes are from Mentasta Lake west through Siana River drainage, and from the Tok Cutoff Hwy near the Chistochina River crossing north. The trail from Mentasta Lake is very challenging and parking is limited. Please contact Land Sales staff for more information.

Climate The Mankomen recording station reports an average high temperature in July of 63.9 degrees F and an average low temperature in January of 15.1 degrees F. Average annual precipitation is 23.65 inches with an average annual snowfall of 92.2 inches.

Soils The majority of the soils within the project area are glacial till or loamy colluvial sediment. Closer to the mountains, the primary soil is stony and gravelly colluvial material over bedrock with some till deposits. Approximately 50-90% of the project area is underlain by permafrost.

Vegetation Some sparse white spruce forests are present; however, most areas exhibit tundra vegetation with dwarf birch, low shrubs, and muskels.

Water Source Ground water depth and quality is unknown. Surface water quality is unknown.

Title The State hold Tentative Approval to lands within the staking area.

Fire Management Option The project area is located within a Limited Fire Management Option.

Game Management Unit The project area is within Game Management Unit 13C.

Municipal Authority The project area is within the Unorganized Borough and is subject to the State of Alaska plating authority.

- Key Parcel in bold *Size adjusted Key Parcel based on adjustment shown in Addenda.

Mineral Estate (MCO 511) closed the bed of the East Fork Chistochina River to mineral entry. The extent of Subunit 29B is closed to mineral entry under MD 1209.

Allowed Uses No commercial use or permanent residence is allowed for RRCS parcels while under lease. Once the parcel is under purchase contract or conveyed into private ownership these restrictions no longer apply.

Easements, Setbacks & other Restrictions

The following restrictions may be applicable to parcels within the Mankomen Lake Staking Area:

- 200-foot staking setback from the ordinary high-water mark of the East Fork Chistochina River on each side;
- 100-foot staking setback from the approximate center-line of the rustic airstrip within the northeast corner of Section 17, Township 14 North, Range 5 East, on both sides and 500-foot staking setback at each end;
- 50-foot staking setback from the centerline of the Mentasta-Slate Creek Trail (RST 440) on each side;
- 30-foot staking setback from the approximate center-line of the main trail through the project area connecting to the Mentasta-Slate Creek Trail (RST 440) on each side;
- 100-foot access easement centered on RST 440 - Mentasta-Slate Creek Trail (50 feet on each side);
- A 50-foot wide section line easement on each side of surveyed or protracted section lines on State-owned land in accordance with AS 19.10.010 Dedication of Land for Public Highways and 11 AAC 71.025 Section-Line Easements - section-line easements may be vacated under AS 19.30.410 Location of Rights-of-Way and 11 AAC 71.065 Vacation of Easements;
- 60-foot access easement centered on existing trails that are not assigned an AOX or RST number through and along staked parcels (30 feet on each side);
- 30-foot public access and utility easement along all interior parcel lines;
- 50-foot continuous public access easement, upstream from the ordinary high-water mark of public or navigable water bodies for AS 38.05.127 Access to Navigable and Public Waters; and 5-foot survey easement from the nearest practical point on the property boundary to control monuments within the parcel and an easement with a radius of 5 feet around the control monument, and as applicable, a 5-foot wide direct line-of-sight easement from the control station to an azimuth mark or other control monument.

Staking will not be allowed within reserved areas imposed prior or during the staking period:
- A reserved area at the northwest end of Mankomen Lake around Canyon Creek at the inlet to Mankomen Lake;
- A reserved area on the peninsula on the middle of the northeast side of Mankomen Lake; and
- A reserved area upon lots 1, 2, 4, 8, and 10 of US 4509;

Improvements Prior to construction of any structure or waste disposal system, contact the platting authority for any permits or for required setbacks from water bodies, lot lines, and easements.

Survey and Appraisal Costs The estimated survey cost for this area is $4,500 - $5,000 per parcel. The estimated appraisal cost for this area is $500 per parcel.

http://landsales.alaska.gov/
There are public access easements along most ASLS boundaries. Check the survey plats for information on monument corner numbers, bearings, and distances. Monuments found in the field take precedence over the graphic record.

1. All parcels staked on land owned by the State of Alaska that contain land within 50 feet of a surveyed or proscribed section line, are subject to a 50-foot wide easement on each side of the section line, which is reserved to the State of Alaska for public highways under AS 19.10.010. Parcels may not be staked over a surveyed section line.

2. Parcels may not be staked across any public or navigable water body. Parcels are subject to a 100-foot public access easement along the ordinary high water mark of all streams and all other water bodies determined to be public or navigable. Some water bodies may also have staking setbacks or water frontage limitations.

3. Parcels are subject to a 100-foot building setback from the ordinary high water mark of all streams and all other water bodies determined to be public or navigable. Some water bodies may also have staking setbacks or water frontage limitations.

4. A staking setback is required from unauthorized improvements.

5. A staking setback is required from airstrips used by the public.

6. Most surveys (i.e. ASLS, USB) have survey monuments at each corner, which can be used as reference points and common corners when staking. See the survey plats for information on monument corner numbers, bearings, and distances. Monuments found in the field take precedence over the graphic record.

7. There are public access easements along most ASLS boundaries. Check the survey plats for additional information.

8. Trail easements have not been verified and their actual location may differ on the ground. Labeling of a trail easement does not guarantee the existence of a trail.

9. Unauthorized airstrips are not maintained by the Department of Natural Resources. Use of airstrips on state land that are not authorized is at your own risk.

10. See the general staking instructions and area-specific supplemental information for more details.
Redlands II Remote Recreational Cabin Sites

Why Stake?
Scenic views of the Chitina River, hills and surrounding landscapes.

Location
The Redlands II staking area is located along the Chitina River (locally known as the Redlands River), approximately 25 miles west of Manley Hot Springs and 110 miles west of Fairbanks.

Terrain & Major Features
The Chitina River runs through the middle of the staking area. The area is generally flat, with rising hills to the south and north of the river. Elevation ranges from approximately 250 feet near the Tanana River to approximately 600 feet in the hills.

Access
Summer access to the area is primarily via shallow draft boat on the Tanana River approximately 34 river miles downstream from Manley Hot Springs, then up the Chitina River. River access to the western portion of the staking area may be difficult in low water conditions. Winter access may be possible via snow travel along the Tanana River to the project area.

Climate
The project area has a cold continental climate. Temperatures average between the 30 to 70 degrees F in summer and -10 to -40 degrees F in the winter, with extremes from -71 to 94 degrees F.

Soils
Soils in the project area consist primarily of poor to moderately drained silt loam and sandy loam with shallow to moderately deep permafrost. The steep to moderately sloping hills within the western portion of the project area contain moderate to well drained loam and loess with moderate to deep permafrost.

Vegetation
Vegetation consists primarily of mixed spruce, birch, and shrubs along the river. Adjacent lowlands are boggy with stands of black spruce. Uplands within the western portion of the staking area contain larger stands of birch and aspen.

Water Source
Surface water may be collected from the Chitina River, sloughs, or small streams or ponds in the area. Water quality is unknown.

Title
Lands within the project area are patented to the state under General Selection Patent No. 50-88-0327 and 50-91-0326. The applicable State casefile is GS 3421.

Fire Management Option
The area generally north of the Chitina River has a Modified Fire Management Option. The area generally to the south of the Chitina River has a Limited Fire Management Option. Contact the Division of Forestry for updated information regarding management options. Stakers are urged to locate parcels in hardwood stands or near water bodies to reduce potential for fire.

Game Management Unit
The project area is located within game management unit 20C.

Municipal Authority
The project area is in the Unorganized Borough, and subject to the platting authority of the State of Alaska.

Mineral Estate
The project area is closed to mineral entry under MO 1114.

Redlands II - Base Appraisal Summary

Hypothetical Key Parcel *A* Redlands II Area
Size: 10.00 acres
Lot Type: 1st tier parcel within 330 feet of the Chitina River, or float plane accessible lake
Access: Boat, snowmachine, floatplane
Building Site: At least 50% level, wooded, and well drained
Amenities: Typical view of the surrounding area

Hypothetical Key Parcel *B* Redlands II Area
Size: 10.00 acres
Lot Type: Interior parcel located a quarter mile from the Tanana River, Chitina River, or floatplane-accessible lake
Access: Boat, snowmachine, or floatplane
Building Site: At least 50% level, wooded, and well drained
Amenities: Typical view of the surrounding area

* 1st tier parcel is defined as a parcel with direct frontage on a lake, river or creek, or is separated from the water by public land.

*Key Parcel in bold. Size adjusted Key Parcels based on adjustment shown in Addenda.

Allowed Uses
Remote Recreational Cabin Sites are for recreational use only. No commercial use or permanent residence is allowed while under lease. Once the parcel is under purchase contract or conveyed into private ownership, these restrictions no longer apply.

Easements, Setbacks & Other Restrictions
The following restrictions may be applicable to parcels within the Redlands II Staking Area:
- 100-foot building setback from all other anadromous streams;
- a 50-foot wide section line easement on each side of surveyed or prorotected section lines on State-owned land in accordance with AS 19.10.019 Dedication of Land for Public Highways and 1 AAC §7.025 Section-line Easements; section-line easements may be vacated under AS 19.30.410 Location of Rights-of-Way and 1 AAC § 0.065 Vacation of Easements;
- Prior to construction of any structure or waste disposal system, contact the platting authority for any permits or for required setbacks from water bodies, lot lines, and easements.

Improvements
The estimated appraisal cost for this area is $4,600 - $5,200 per parcel. The estimated appraisal cost for this area is $500 per parcel.

Survey and Appraisal Costs
Seasonal flooding may occur along the Tanana and Chitina Rivers. Stakers are encouraged to locate parcels with respect to potential flooding.

http://landsales.alaska.gov/
Redlands II Staking Area

2019 Offering: Remote Recreational Cabin Sites Offering #14

Staking Authorizations: 25
Minimum Parcel Size: 5 acres
Maximum Parcel Size: 20 acres

USGS Quadrangle Kantishna D-4 1:63,360
Township: 1 North, Range 20 West, Fairbanks Meridian

This map is for graphic representation only. It is intended to be used as a guide only and may not show the exact location of existing surveyed parcels or show all easements and reservations. Source documents remain the official record.

1. All parcels staked on land owned by the State of Alaska that contain land within 50 feet of a surveyed or protracted (unsurveyed) section line, are subject to a 50-foot wide easement on each side of the section line, which is reserved to the State of Alaska for public highways under AS 19.19.010. Parcels may not be staked over a surveyed section line.

2. Parcels may not be staked across any public or navigable water body. Parcels are subject to a 50-foot public access easement along the ordinary high water mark.

3. Parcels are subject to a 100-foot building setback from the ordinary high water mark of all streams and all other water bodies determined to be public or navigable. Some water bodies may also have staking setbacks or water frontage limitations.

4. A staking setback is required from unauthorized improvements.

5. A staking setback is required from airstrips used by the public.

6. Most surveys (i.e. ASLS, USS) have survey monuments at each corner, which can be used as reference points and common corners when staking. See the survey plats for information on monument corner numbers, bearings, and distances. Monuments found in the field take precedence over the graphic record.

7. There are public access easements along most ASLS boundaries. Check the survey plats for additional information.

8. Trail easements have not been verified and their actual location may differ on the ground. Labeling of a trail easement does not guarantee the existence of a trail.

9. Unauthorized airstrips are not maintained by the Department of Natural Resources. Use of airstrips on state land that are not authorized is at your own risk.

10. See the general staking instructions and area-specific supplemental instructions.
There May Be 2 Staking Periods

If there are more applicants than staking authorizations available for a staking area, there will be two separate staking periods for that area. In this case, drawing winners can stake their parcels in the 1st staking period, beginning January 31, 2020 at 8:00 a.m., and ends June 29, 2020 at 5:00 p.m. Drawing alternates may get an opportunity to stake in the 2nd staking period if there are unused authorizations from the first staking period. The 2nd staking period begins July 10, 2020 at 8:00 a.m., and ends on September 8, 2020 at 5:00 p.m. Staking priority for alternates in the 2nd staking period will be determined by the order in which they are drawn.

If there are fewer applicants than the number of staking authorizations available in a staking area, then all drawing winners for that staking area will have from January 31, 2020 at 8:00 a.m. - September 8, 2020 at 5:00 p.m. to stake.

A staking authorization and staking packet will be issued to apparent winners of the drawing. This packet will include staking instructions that tell you:

- When you can stake.
- How much land you can stake, and
- Other guidelines that may apply to your specific area.

The staking packet will also include a staking map, a lease application form, and instructions describing how to submit a lease application. You have the option to submit online or in person. You may submit in person at the Anchorage Land Sales Office (550 W. 7th Ave. Ste. 640, Anchorage AK, 99501), or the Fairbanks Public Information Center (3700 Airport Way Fairbanks, AK 99709), during the times listed below.

- 1st LEASE APPLICATION PERIOD: Monday, February 3, 2020 at 10:00 a.m. to Monday, June 29, 2020 at 5:00 p.m.
- 2nd LEASE APPLICATION PERIOD: Monday, July 13, 2020 at 10:00 a.m. to Tuesday, September 8, 2020 at 5:00 p.m.

After staking, you must submit your lease application describing your staked parcel prior to the end of the staking period in which you staked. You must also submit your lease application within 14 days of staking.

NOTE: You will have less than 14 days to submit your lease application if there are less than 14 days before the end of your staking period.

Workshops

The staking packet will include a schedule for DNR staking workshops for the winners of the staking authorizations and/or their agents. Alternates are also invited to the workshops. The workshops will answer any questions you have about the program and staking your parcel. Drawing winners are strongly encouraged to attend the staking workshops.

http://landsales.alaska.gov/
Brushing and Flagging Your Parcel

The corners of your parcel must be marked with your name, address, and corner number on a weather resistant material. Parcel boundary lines must be brushed and flagged at the time of staking and maintained until the survey is completed. Brushing lot lines requires the use of equipment, such as a chainsaw, to cut vegetation and create visible boundary lines for your parcel. Failure to do so may result in the rejection or cancellation of the fee. If the participant notified the appropriate DNR regional office and the department gives written permission that it is impractical to brush all or any portion of the parcel boundary lines, the applicant may flag, blaze trees, or otherwise mark the lines in a manner that provides reasonable notice of the boundaries.

Please plan accordingly for the amount of time required to brush the parcel boundary lines. It is possible that it will take several days to completely brush the lines. Photos of brushed lines, flagging, and corner posts are required as part of the lease application.

Existing Improvements

Some staking areas include state land that was previously offered in other state land sale programs or used for other purposes; consequently some development may have occurred within the staking areas. In addition, there may be abandoned or unauthorized improvements on state land shown as open for staking. Improvements may not be included within your staked parcel. If you know of or encounter an abandoned or dilapidated structure, contact the appropriate DNR Public Information Center.

Airstrips

Pilots should be careful to avoid trespassing on private property. There may be airstrips within staking areas that are not shown on the staking maps. These could be on private land. Use of airstrips on state land that are not authorized is at your own risk. Some private businesses may also carry USGS maps in your area. To find the correct reference for the USGS map(s) of your area, look under the vicinity map on the upper right corner of the state survey plat.

Review all the available information on the parcel or area. If available, an appraisal report is especially helpful, as it may have pictures of the parcel and surrounding area. These can be obtained from DNR information offices. To pick out some distinctive features in the pictures that could help you locate the lot on the ground (a uniquely shaped tree, for example).

In addition, review the land status information online using Alaska Mapper at dnr.alaska.gov/mapper/controlling. Viewing the Land Estate map using this web-based geographic information system tool will show which lots in the subdivision or area have been disposed of previously, and may help you figure out which lots in the area have people living on them. You may try asking people living in the area what their lot and block numbers are. This will help orient you. Take a compass and measuring tape to help orient yourself and measure distances along lot lines. Look for brushed and cleared lines. These may be the lot lines for the parcel you are looking for. Also, look for the surveyor’s tape and wooden stakes -- sometimes these were used to mark the locations of the monuments. Also, a metal detector is a very useful tool in locating monuments.

To find a survey monument, you will need a copy of the survey plat for the parcel or subdivision. The survey plat may be purchased from the DNR Public Information Centers in Anchorage and Fairbanks at a cost of $1.25 for the first page and $.25 for every subsequent page after. Plats can also be found online at dnr.alaska.gov/landrecords or landsales.alaska.gov. The survey number and the Meridian, Township, Range and Section(s), which are indicated on the staking area map in the parcel table under “MTRS”, will be used to locate the parcel. The survey plat will show locations and types of monuments at each lot corner, distances along lot lines, and the general configuration of the subdivision.

http://landsales.alaska.gov/
Applying for a Remote Recreational Cabin Site Lease

Proof of residency is required at time of lease application. If you are unsure if you meet the residency requirement, please contact us before applying for the drawing. Only individuals who received a staking authorization may lease a cabin site. The lease applicant must provide proof of Alaska residency. Keep in mind that parties cannot be added or removed during the term of the lease by court order. After a parcel has been staked and before the staking period expires, the applicant must:

- Complete the Application for Remote Recreational Cabin Site Lease, sign it;
- Submit it to either the Anchorage or Fairbanks DNR Public Information Center;
- Pay a non-refundable application fee; the current fee is $240;
- Submit the application within 14 days after staking, but no later than the end of the staking period.

If an agent stakes for you, they must be noted on the lease application. You must sign the application unless your agent also has power of attorney and submits the proper documentation. An agent can be anyone you choose such as a friend or family member. Anyone who stakes for you must be listed as an agent.

By applying for a lease, you agree to pay the quarterly deposits for the department's estimated costs to survey and appraise the parcel. You also agree to pay all fees and lease rentals, and pay the appraised market value for the parcel when purchased.

Note: the survey deposit will be credited toward the purchase price. The actual cost of the appraiser will not be credited to the purchase price. You may not begin development of the parcel until the department has approved the lease application and the lease is effective. Please note that this may take several months. During the term of the lease, a survey and appraisal will be completed.

Lease Application Priority

The lease application period begins the Monday following the day your staking period opens. You have the option to submit online or in person. You may submit in person at the Anchorage Land Sales Office (550 W. 7th Ave. Ste. 640, Anchorage AK, 99501), or the Fairbanks Public Information Center (3700 Airport Way Fairbanks, AK 99709), during the times listed below:

- **1st LEASE APPLICATION PERIOD**: Monday, February 3, 2020 at 10:00 a.m. to Monday, June 22, 2020 at 5:00 p.m.
- **2nd LEASE APPLICATION PERIOD**: Monday, July 13, 2020 at 10:00 a.m. to Tuesday, September 8, 2020 at 5:00 p.m.

Lease applications will be date and time stamped, in order, to determine the priority of service. Applicants waiting in line when the doors open will undergo a drawing to determine priority of service. In the event of a staking conflict, the first applicant to stake a Remote Recreational Cabin Site and submit a valid application has priority over later applications.

Rejection or Modification of Lease Application

An application for a Remote Recreational Cabin Sites lease may be rejected for failure to comply with the program as established under state statutes and regulations, for failure to comply with the staking instructions, for staking over a prior lease application or exclusion, for staking outside the staking area boundary, for failure to brush and flag parcel boundary lines, or for locating and marking staked parcel prior to the opening day of staking. DNR reserves the right to modify parcel boundaries to conform to staking instructions; to eliminate a conflict with another parcel or exclusion; to avoid leaving an unusable remnant of state land; to satisfy municipal platting requirements; or to conform to topography. DNR also reserves the right to modify the parcel to conform to standard surveying practices and to reserve additional access easements for future legal access to parcels in the staking area.

Lease Payments

The term of the lease will be three years. There will be an annual lease rental fee; the current fee is $240. The lease rental fee is in addition to the quarterly survey and appraisal deposit payments. Lease rental fees do not apply toward the purchase price of your parcel. Lease rental fees are nonrefundable regardless of whether the lease is relinquished or terminated for cause.

During the three-year lease, the department will survey and appraise your parcel. DNR reserves the right to extend the three-year lease for one year if necessary to complete the survey and appraisal. At any time after the appraisal is complete, and during your lease if you are in good standing, you can enter into a purchase contract with DNR or pay off the full purchase price of the parcel. Any remaining lease rental for that year will be prorated. If you do not wish to purchase the parcel at the end of the three-year lease period, you can renew the lease for a single five-year term as long as you are in good standing. Lease payment during this second term automatically increase; the current cost is $1,200 per year paid quarterly, but LSS is in the process of changing this in the future. At any time during this one-time five-year renewal period if you are in good standing, you can enter into a purchase contract with DNR or pay off the full purchase price of the parcel. The lease payments in this second term are not credited toward the purchase price.

Deposits for Survey, Platting & Appraisal

During the three-year lease term, you will make quarterly deposit payments for the department’s estimated costs for the survey and platting, prorated by acreage, and appraisal of the parcel. The total amount of the deposit may vary from area to area and may be more or less than the actual cost of the survey and appraisal. The cost of the survey is credited toward the purchase price, while the cost of the appraisal is in addition to the purchase price. DNR may contract out for the survey and appraisal.

The first quarterly payment will be due when you are notified that the lease application has been approved. The next scheduled payment will be due three months from the effective date of the lease and every three months thereafter during the three-year lease term.

If DNR extends the lease an additional year after the three-year term, the survey and appraisal deposit payment is not required during that year. However, if the estimated total amount paid does not cover your share of actual costs (prorated by acreage and by parcel for appraisal), then the balance will be due at the time of purchase or prior to expiration of the lease. If the total deposit paid exceeds your share of the cost, the excess deposit will be credited toward the purchase price. A typical quarterly deposit payment may be between $300-$500, depending on the staking area. An example of a quarterly payment breakdown is as follows:

<table>
<thead>
<tr>
<th>Example of Quarterly Payment Schedule</th>
<th>Quarterly Payment</th>
<th>3 Year Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lease Rental Payment</td>
<td>$600.00 x 12 =</td>
<td>$7200.00</td>
</tr>
<tr>
<td>Appraisal Deposit</td>
<td>$416.7 x 12 =</td>
<td>$5000.00</td>
</tr>
<tr>
<td>Survey Deposit (credited to the purchase price)</td>
<td>$375.00 x 12 =</td>
<td>$4500.00</td>
</tr>
<tr>
<td>Total Quarterly Payment (example)</td>
<td>$476.76</td>
<td></td>
</tr>
</tbody>
</table>

NOTE: A deposit is non-refundable if a lessee or purchaser does not proceed with the purchase of the site. However, the department will refund 50% of the total deposit if you file a written relinquishment of the lease during the first year and the department accepts such relinquishment.

Use of Remote Recreational Cabin Sites

A lease allows you to use your staked parcel for recreational purposes while a survey and appraisal are being completed by DNR. Commercial use or permanent residency is not allowed while under lease. Once the land is under purchase contract or conveyed to private ownership, these restrictions no longer apply. You may construct improvements for recreational use on the parcel using gravel and timber on the site as needed. You must comply with all applicable federal, state and local laws, regulations and ordinances. You may not permit any unlawful occupation, business, or trade to be conducted on the parcel. Such use of state land is subject to prosecution. Gravel and timber on the parcel cannot be used or sold for commercial purposes.

When constructing improvements after your lease is issued, it is your responsibility to properly locate improvements within your parcel (11 AAC 67.020). Improvements (other than for access) may not be placed or constructed within any setbacks, easements or rights-of-way, or outside parcel boundaries. It is your responsibility to obtain all necessary authorizations from federal, state, or local agencies prior to placing or constructing any improvements. Caution should be exercised in constructing improvements prior to survey of the parcel. Improperly located improvements may be grounds for termination of a lease or contract.

http://landsales.alaska.gov/
Lease Service Charges

During your lease, you will owe fees for any late payments. You will also owe a returned payment fee for any payment which is refused by the bank. The date payment is due is not delayed if the bank refuses payment. Other fees may apply as set by AS 38.05.065 and 11 AAC 05.010. For updated fee amounts, contact Land Sales at landsales@alaska.gov or 907-269-8594.

Note: If your lease with DNR is in default status for breach of terms, you are not eligible to acquire any new authorizations from the department unless the breach is cured. If the default is not cured and the agreement is terminated for cause, you will be precluded from acquiring any new authorizations from the department for three years from the date of termination. Checks returned for any reason may invalidate the transaction and terminate your rights to the parcel.

Lease Transfers and Assignments

You may not transfer, sublease, or assign this lease, except by a court order as part of a property division resulting from a divorce or dissolution of marriage; or in the event of your death, by order of a court with probate jurisdiction, or at the discretion of the personal representative or similar person appointed by that court to manage your estate. An amendment fee may apply.

The department will issue survey contracts under state procurement code for the survey of parcels staked within the staking areas. DNR will award the contracts by competitive process. The surveys will be completed within the three-year lease term unless an extension is needed for completion, in which case the lease will be extended for one additional year. The actual survey costs will be your share of the total cost for the area prorated by the acreage of your parcel.

Preliminary Estimate of Survey and Plating Cost

Limiting conditions for Estimated Plating Cost – This estimate is provided to furnish applicants with some idea of the approximate cost to survey state land under the Remote Recreational Cabin Sites Program. No field inspection of the staking area has been performed. The actual survey cost for each parcel will be determined when the survey is completed. The lessee’s share of the cost, prorated by acreage, will be based on the actual contract cost.

The cost to survey state land in remote areas of the state may be higher than the actual value of the land. The minimum purchase price is $1,000 over the actual survey cost or the appraised value, whichever is greater, regardless of the actual survey cost.

Preliminary Estimate of Survey and Plating Cost

Note: These are rough estimates based on average cost per tract. The actual cost to survey a tract will vary, depending on the number of tracts surveyed, and the size of the tracts.

Appraisal of Parcels

An appraisal of the value of each parcel will occur after the staked parcels are surveyed, but will reflect the value of the parcel on the date the lease was approved by DNR (the date of entry). This appraisal will reflect the qualities of each staked parcel, such as water frontage, topography, parcel size, access, view, etc., and will also reflect any changes in market conditions that may have occurred between the date of the base appraisal (from the brochure) and the date DNR approved the lease application. DNR will notify lessees of the appraised value when the appraisal has been completed.

Estimated Appraised Values of Remote Recreational Cabin Sites

DNR cannot determine the appraised value of a parcel until the survey is completed and approved. As an alternative, Base Appraisal reports are provided to help you estimate potential purchase prices. There is a Base Appraisal for each staking area. The Base Appraisal report describes hypothetical key parcels for each staking area. The Key Parcel values are estimates of market value based on market transactions in the competitive market area of the staking area and will be used to determine the value of the parcel you stake. A staking area can have one or more key parcels; such as waterfront and interior key parcels. A key parcel is similar to the parcels that will likely be staked. The following features are described for each key parcel: location, access, size, physical features, amenities, and easements or restrictions. Some features that could increase the price of a staked parcel are exceptional views, frontage on a pond, creek, or established trail, or a good building site (mostly level, well drained, low potential for flooding and erosion). Some features that could decrease the price of a staked parcel are poor building site (mostly steep or wet ground, and/or high potential for flooding and erosion) or very difficult access.

The Base Appraisal has two purposes. First, it gives some idea of what a parcel will cost. Second, the values in the base appraisal will be used to establish the final appraised value for each surveyed parcel. This will be done by comparing each surveyed parcel to the appropriate hypothetical key parcel and making value adjustments for any differences. The information in this brochure includes a summary of the Base Appraisal for each staking area. As a potential applicant, you are encouraged to apply for a parcel that will fit within your specific budget. The appraised value of your parcel will be determined after the survey is completed and approved. The final appraisal will include a physical inspection of the staking area and each parcel appraised. The appraised value of your parcel may be different from the hypothetical key parcel because of physical differences found during the inspection. Base appraisal reports are available at the DNR Public Information Centers and online at http://landsales.alaska.gov.

Preliminary Estimate of Appraisal Costs

Limiting Conditions for Estimated Appraisal Cost - This estimate is provided to furnish applicants with an idea of the approximate cost to appraise state land under the Remote Recreational Cabin Sites Program. The lessee’s actual appraisal costs will be determined after the appraisal is complete by comparing each surveyed parcel to the appropriate hypothetical key parcel and making value adjustments for any differences. The information in this brochure includes a summary of the Base Appraisal for each staking area. As a potential applicant, you are encouraged to apply for a parcel that will fit within your specific budget. The appraised value of your parcel will be determined after the survey is completed and approved. The final appraisal will include a physical inspection of the staking area and each parcel appraised. The appraised value of your parcel may be different from the hypothetical key parcel because of physical differences found during the inspection. Base appraisal reports are available at the DNR Public Information Centers and online at http://landsales.alaska.gov.

Expiration or Termination of Lease

If you do not purchase the parcel by the end of the five-year lease renewal term, your lease will expire and you will be required to remove all improvements and personal property from the parcel. Improvements not removed become property of the state and are subject to disposal in accordance with AS 38.05.090. The parcel may be sold in a subsequent offering. A lease may be terminated for failure to comply with the terms of the lease, including but not limited to non-payment or for failure to sign the survey plat once the parcel has been surveyed.

http://landsales.alaska.gov/ 21
The terms for purchasing State-owned land by sale contract are:

| Parcels may be purchased either by paying the full purchase price in a lump sum or by entering into a land sale contract (purchase contract) with the State of Alaska or its authorized representative. **NOTE**: State land must be sold at market value. This program does not allow “proving up” (living on the parcel) in order to obtain title to the parcel. There are no land discounts other than the Veteran’s Discount on the purchase price. This is a lease/purchase program only.

### Minimum Purchase Price

The costs to survey state land in remote areas of the state may actually be higher than the appraised value of the land. The minimum purchase price is $1,000 over the actual survey cost, or the appraised value, whichever is greater.

### Purchase Information

DNR offers financing on land sales with a down payment of 5% of the purchase price, or parcels may be purchased by paying the full price at the time of purchase. Details of sale contracts and patents are below.

### Financing with a State Land Sale Contract

DNR offers financing through land sales contracts. A DNR land sale contract is a legally binding purchase agreement in which ownership is transferred after terms of the contract are satisfied. A DNR contract is different from a mortgage in that equity is not earned during the life of the contract. If you fail to make payments, or default on the contract in other ways, DNR retains all monies paid to that point, and retains ownership of the land. Your money will not be refunded if the contract is in default, has been relinquished, or is otherwise terminated. If the purchase price minus the 5% down payment is $2,000 or less, the purchase price must be paid in full. A land sale contract will not be issued if the purchase price minus the 5% down payment is greater than $2,000, the remainder may be paid by sale contract, if you meet the requirements to qualify for a contract as described in the Applicant Qualifications section of this brochure. Once you have signed a State of Alaska land sale contract, you have entered into a legal, binding contract. Your money will not be refunded if the contract is in default, has been relinquished, or is otherwise terminated.

A sale contract will not be issued by the State of Alaska unless all three requirements listed in the Land Sale Contract Applicant Qualifications section, below. The terms for purchasing State-owned land by sale contract are:

- A minimum down payment of five percent (5%) of the purchase price;
- A non-refundable document handling fee; the current fee is $100, but LSS is in the process of changing this in the future; and
- Contract for payment of the balance, with interest, over a period of up to 20 years based on the following parameters:

  - The interest rate is set by law at 3% plus the prime rate at the time the contract is written and is fixed for the life of the contract. The length of the contract depends on the amount being financed as follows:
    - $2,000.00 or less must be paid in full at time of purchase;
    - $2,000.01 to $9,999.99, contract length is 5 years;
    - $10,000.00 to $14,999.99, contract length is 10 years;
    - $15,000.00 to $19,999.99, contract length is 15 years; and
    - $20,000.00 or more, contract length is 20 years.

### Contract Assignments

Unlike Remote Recreational Cabin Sites leases, land sale contracts may be assigned to another qualified party. A fee applies; the current fee is $240. Once patent is issued, any change in ownership of a parcel is a private transaction. If you decide to sell your parcel after receiving patent, consult an attorney or title company.

### Land Sale Contract Applicant Qualifications

If you elect to enter into a purchase contract with the State of Alaska, in accordance with 11 AAC 67.008 Ineligibility Due to Default, you must also certify that you:

1. have not held a purchase contract or lease issued by DNR that has been administratively foreclosed or terminated for cause within the past 3 years (contact the Land Sales and Contract Initiation and Revenue Recovery at (907) 269-8594 if you have questions about eligibility);
2. are not currently in default for nonpayment on a purchase contract or lease issued by DNR; and
3. are not currently in default for nonpayment of municipal taxes or assessments on property currently under a purchase contract or lease issued by DNR.

Purchase contracts will not be issued by the State of Alaska unless all 3 qualifications listed above are met. If you are the applicant for a parcel and do not meet requirements listed above to qualify for a contract, a lump sum payment will be required. Failure to submit payment in full upon notification may result in the forfeiture of your deposit and loss of purchase rights to the parcel.

### Land Sales Contract Service Charges

Once the contract has been executed, you will owe late fees for any payments which are made late. You will also owe a returned payment fee for any payment which is refused by the bank. The date payment is due is not delayed if the bank refuses payment. Other fees may apply as set by AS 38.05.065 and 11 AAC 05.010. For updated fee amounts, contact Land Sales at landsales@alaska.gov or 907-269-8594.

### Receiving Title

Once you have paid off the parcel and completed any other conditions of the sale, DNR will issue you a state patent giving you title to the land. Once the patent has been issued and recorded, you own the land as detailed in the patent. Note that the State of Alaska will retain ownership of the mineral estate of all land sold as required by the statehood act, the state constitution, and state law.

### Keep Your Address Current with Land Sales Section (LSS)

Any notice or other correspondence sent to you is sufficient if mailed to the last address of record, even if it does not reach you. In accordance with 11 AAC 67.005 (g) General Qualifications, an applicant or bidder is responsible for keeping Department of Natural Resources, Division of Mining Land & Water (DNR DMLW), Land Sales Section (LSS) informed of their current address throughout the application, lease, contract, and patent processes. A change of address must be signed by the applicant or purchaser and must be submitted in writing to LSS at 550 W. 7th Ave., Ste. 640, Anchorage, Alaska 99501, (907) 269-8594, Fax (907) 269-8514. Please contact LSS for this form.

---

**Purchase Options**

After the survey and appraisal of the parcel are completed, lessees in good standing may purchase the parcel at its appraised market value, as of the date that DNR approved the lease (the date of entry).

The state must sell land at the appraised market value (AS 38.05.840). The following is a simplified example of the costs associated with the purchase and how the payable balance is calculated:

### Example of Purchase Price Calculation

<table>
<thead>
<tr>
<th>Appraised market value</th>
<th>$10,000</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less survey deposit paid</td>
<td>($4,500)</td>
</tr>
<tr>
<td>Remaining balance of appraisal cost (if any)</td>
<td>$5,500</td>
</tr>
<tr>
<td>Balance for payoff or contract (example)</td>
<td>$150</td>
</tr>
</tbody>
</table>

Parcels may be purchased either by paying the full purchase price in a lump sum or by entering into a land sale contract (purchase contract) with the State of Alaska or its authorized representative.

**NOTE**: State land must be sold at market value. This program does not allow “proving up” (living on the parcel) in order to obtain title to the parcel. There are no land discounts other than the Veteran’s Discount on the purchase price. This is a lease/purchase program only.

---

http://landsales.alaska.gov/
VETERAN’S LAND DISCOUNT

The State of Alaska offers Alaska resident veterans a once-in-a-lifetime discount on the purchase of state land in accordance with AS 38.05.940 Land Purchase Price Discount For Veterans. The discount is 25% of the purchase price, although the discount does not apply to certain costs which DNR incurred to develop the parcel for sale. Discount amounts for RRCS lease parcels are not available until the time of lease to sale conversion, once the survey and appraisal are complete, and the reimbursable costs have been determined. The details of how the discount amounts are calculated are below. Please note that the program is for veterans who have already received a DD Form 214 and who have been a resident of Alaska for one year immediately preceding the date of the sale. Active duty personnel who have not yet received a DD Form 214 are not yet eligible for these benefits. Please read the eligibility requirements below to confirm you qualify. The discount is up to 25% of the purchase price, although the discount does not apply to certain costs which DNR incurred to develop the parcel for sale.

Qualifications for Veteran’s Land Discount

To qualify for the Veteran’s Land Discount, you must submit proof of eligibility. Eligibility proof should be submitted only AFTER you are an apparent winner in the RRCS drawing. You must provide proof of the following items:

1. You are 18 years of age or older on the date of bid or application (11 AAC 67.055 General Qualifications);
2. You meet the Alaska residency requirements of this program as detailed at: https://dnr.alaska.gov/mlw/landsales/info/akresident/; and
3. A DD Form 214 (Report of Separation from Active Duty) showing the qualifying length of active duty and character of the discharge. There are many versions of the DD Form 214, and some versions contain multiple pages. Please ensure that the pages you submit show both dates of service and character of discharge.

Veterans are encouraged to request their DD Form 214 and gather their other required documentation well in advance of the lease application period.

The Veteran’s Land Discount may be applied only to acquisition of surface rights to the land. The discount may not be applied to survey costs, road development costs, utility assessments, or other costs deemed reimbursable to the State of Alaska by the DNR Commissioner. These reimbursable costs will be subtracted from the purchase price before the discount is calculated; afterwards, the discount amount will be deducted from the total purchase price.

The applicant for the Veteran’s Discount must be the Remote Recreational Cabin Site lessee, not a contract assignee.

Remote Parcel Example
Below is an example of how a Veteran’s Land Discount is calculated for a Remote Parcel with reimbursable costs of $5,410, if the bid price was $15,000:

<table>

*plus applicable fees

http://landsales.alaska.gov/
FURTHER INFORMATION

Access
When possible, legal access to Remote Recreational Cabin Sites staking areas will be shown on the individual staking maps. The location of legal access to a parcel may also be obtained from the appropriate regional DNR Public Information Center. It is your responsibility to properly locate yourself when crossing both public and private land to ensure you are on a legal right-of-way or section-line easement and to avoid trespass. It is important to note that while access may be legally reserved, it may not yet be improved.

Establishing new routes or making improvements to existing rights-of-way or easements may require an authorization depending on the type of activity and the site-specific conditions. You are advised to apply for an access easement to reserve legal access to your parcel.

The State of Alaska has no legal obligation to build roads or provide services to or within any parcel. Rights-of-way shown on the survey plats designate areas reserved for access but do not necessarily indicate the existence of a constructed road. In many cases roads have not been constructed. However, legal access does exist to all parcels. For instance, access may be via section-line easements (unless the section-line easement has been vacated), platted rights-of-way, trail easements, navigable water bodies, or across unreserved state land.

Physical access may be on roads, trails, rivers and lakes by means of on and off-road vehicles, snowmachines, airplanes, boats, all-terrain vehicles, dogsled, or by foot. You should inquire at one of the DNR Public Information Centers or borough land office to see if there is an existing road on a reserved right-of-way:

**PLEASE BE ADVISED THAT LEGAL ACCESS TO A PARCEL DOES NOT NECESSARILY CONSTITUTE DEVELOPED OR PRACTICAL ACCESS.**

There are certain generally allowed uses on State-owned land managed by the Division of Mining, Land, and Water that do not require a permit from DNR (11 AAC 96.020 Generally Allowed Uses and 11 AAC 96.025 Conditions for Generally Allowed Uses). The fact sheet at [http://dnr.alaska.gov/mlw/factsht/land_fs/gen_allow_use.pdf](http://dnr.alaska.gov/mlw/factsht/land_fs/gen_allow_use.pdf) contains more information about these generally allowed uses, including a list of areas where they do not apply and other restrictions.

Travel across unreserved state land may be made without a permit by the following methods:

- Hiking, backpacking, skiing, climbing, and other foot travel;
- bicycling; and traveling by horse, dogsled, or with pack animals.

- Using a highway vehicle with a curb weight of up to 10,000 pounds, including a four-wheel-drive vehicle or a pickup truck, or using a recreational-type off-road or all-terrain vehicle with a curb weight of up to 1,500 pounds, such as a snowmobile (or other tracked vehicle), motorcycle or ATV, on or off an established road easement, if use off the road easement does not cause or contribute to water-quality degradation, alteration of drainage systems, significant rutting, ground disturbance, or thermal erosion. Use of larger off-road vehicles over 1,500 pounds curb weight and the off-road travel of construction and mining equipment requires a permit from DNR. An authorization is required from the State of Alaska, Department of Fish and Game, Division of Habitat for any motorized travel in fish bearing streams. Contact and program information can be found online at [http://habitat.adfg.alaska.gov](http://habitat.adfg.alaska.gov).

- Landing an aircraft (such as a single-engine airplane or helicopter), or using watercraft (such as a boat, jet-ski, raft, or canoe), without damaging the land, including shoreland, tideland, and submerged land.

Access improvements on unreserved state land may be allowed without a permit under the following conditions:

- Brushing or cutting a trail less than five feet wide using only hand-held tools such as a chainsaw (making a trail does not create a property right or interest in the trail).

- Anchoring a mooring buoy in a lake, river, or marine waters, or placing a float, dock, boat haul out, floating breakwater, or boathouse in a lake, river, or in marine waters, for the personal, noncommercial use of the upland owner, if the use does not interfere with public access or another public use, and if the improvement is placed within the projected sidelines of the contiguous upland owner's parcel or otherwise has the consent of the affected upland owner.

Vehicles are required to use existing trails where possible. Where no trails exist, vehicles are required to use the legal access to minimize the number of trails across public lands.

Moving heavy equipment, such as a bulldozer, is not authorized on state land without a permit. A permit can be obtained from the appropriate DNR regional office.

Public access and utility easements, water body easements, and public or navigable waterways may not be obstructed or made unusable by the public.

**Use of Adjacent State Land**

Uses of unreserved state land, other than those uses stated in 11 AAC 96.020 Generally Allowed Uses, may require a land use authorization from DNR. Lease or ownership of a remote recreational cabin site does not imply exclusive use of surrounding state-owned lands.

**Restrictions on Subdividing**

You may not subdivide or re-plat the land prior to receiving title. After title is conveyed, subdividing of any parcel must comply with state or local platting requirements and in accordance with the regulations of other agencies such as the State of Alaska, Department of Environmental Conservation, the United States Army Corps of Engineers, relevant municipalities, relevant Homeowners’ Associations, and the like.

**Hazardous Materials and Potential Contaminants**

Interested parties are responsible for inspecting the property and familiarizing themselves with the condition and quality of the land. Unless otherwise noted herein, there are no known environmental hazards present within the parcels offered. However, DNR has not necessarily inspected all the parcels in this brochure to determine if refuse or hazardous waste is present. The State of Alaska makes no representations or warranties, expressed nor implied, concerning the existence or absence of any hazardous substances, hazardous waste, contaminants, or pollutants on the land here proposed for conveyance. The State of Alaska further assumes no liability for the removal of hazardous substances, hazardous wastes, contaminants, or pollutants, nor for the remediation of the site should such substances eventually be found. The purchaser of the parcel is responsible for the disposal of any existing refuse or wastes.

**No Warranty of Suitability or Fitness**

**Important:** In accordance with 11 AAC 67.022 No Warranty Implied, by selling, granting, or leasing land, the State does not give nor imply any warranty as to the land’s fitness, use, or suitability for any intended use, presence of refuse or hazardous substances, or whether public utilities or services will be provided. It is the responsibility of the purchaser, grantee, or lessee to determine whether the land will meet their needs. Parcels are sold **AS IS** and **WHERE IS** with all faults, and in the condition as of the date of conveyance.

The State of Alaska makes no warranty, expressed or implied, nor assumes any liability whatsoever, regarding the social, economic, or environmental aspects of the parcel, including, without limitation, the soil conditions, water drainage, access, natural or artificial hazards that may exist, or the profitability of the parcel.

It is the responsibility of all interested parties to inspect the parcel and be thoroughly acquainted with the parcel’s condition prior to applying for a lease, contract, or patent. It is also the responsibility of all interested parties to determine and consider encumbrances, or the possibility of encumbrances, that may affect the use of the property, including those of record or apparent by inspection of the property, in your decision to enter into a lease, contract, or purchase.

http://landsales.alaska.gov/
Easements, Reservations, and Restrictions

All staking areas offered in this brochure are subject to all platted and valid existing easements and reservations such as various rights-of-way, building setbacks, utility easements, pedestrian easements, roads, trails, and other restrictions.

All State-owned land bordering surveyed or protracted (unsurveyed) section lines has a reserved public access easement usually 33 or 50 feet in width along each side of the section line, unless the easement has been vacated or officially removed. All public access easements, including those along public or navigable water bodies, are reserved for public use. You may not obstruct public access easements or make them unusable by the public.

It is your responsibility to review the staking map, instructions, and additional source documents thoroughly to determine what restrictions, if any, may affect your staking area. You must meet any borough or state standards and obtain any required permits before developing any easement. Contact the appropriate Public Information Center before constructing access, especially within surveyed or unsurveyed section line easements.

Mineral Estate

In accordance with AS 38.05.125 Reservation of Mineral Rights to Alaska, the state retains ownership of all oil, gas, coal, ore, minerals, fissionable materials, geothermal resources, and fossils that may be in or upon the land that it sells. The State of Alaska and its successors reserve the right to enter onto the land for the purposes of exploring, developing, and producing these reserved mineral resources. Under common law, this access reservation is superior to any and all land uses. The State of Alaska may also lease these interests to mineral developers or allow mining locations to be staked. Mineral orders that closed that area to new mineral entry, where they have been established, closed the area to new exploration and development of locatable minerals such as gold, copper, platinum, etc. Such mineral orders do not apply to leasable minerals, including oil and gas leasing, coal leasing, shallow gas leasing, or exploration licensing for such, nor do they preclude reasonable surface access to these resources. However, AS 38.05.130 Damages and Posting of Bond stipulates that the land owner will be compensated for damages resulting from exploration and development.

Mining activity would be incompatible with the past, current, and proposed surface uses for land disposals. To allow new mineral location within the boundaries of the parcels offered for sale could create serious conflicts between land and mineral users. Area plan subsurface management policy states that, in general, areas scheduled for disposal will be closed to mineral entry prior to sale to minimize potential conflict between land and mineral users. Mineral status is noted on the data summaries for each area described in this brochure.

Water Rights and Usage

Depending on your usage, construction plans, or demand relative to supply of water in the area, you may be required to obtain a water right or permit. Certain activities involving the diversion of water, even temporary routing during trail or road construction, may require advance authorizations. For information, contact DNR’s Division of Mining, Land, and Water, Water Resources Section. Information and applications are also available at any of the Public Information Centers and online at: http://dnr.alaska.gov/mlw/water/

Sewer and Water

No individual water supply system or sewage disposal system shall be permitted on any parcel unless such system is located, constructed, and equipped in accordance with the requirements of the State of Alaska, Department of Environmental Conservation (DEC). Approval of such system shall be obtained from DEC. For more information regarding wells and water systems see: http://dec.alaska.gov/ch/dw/dbp/private-wells

Fire

Some state lands are in areas without fire protection or with only limited fire protection. The State of Alaska assumes no duty to fight fires in these areas. Wildfires should be considered a serious potential hazard even in areas designated for fire protection. Visit DNR’s Division of Forestry’s Fire Information web page online at http://forestry.alaska.gov/fire/fireplans.htm for full descriptions of current Interagency Fire Management Plans and more information.

If you wish to develop your parcel, you should plan on implementing wildfire mitigation methods, including establishing a defensible space. Existing interagency programs, such as FIREWISE, can provide prospective landowners with valuable information regarding wildfire mitigation. To find out more, visit: http://firewise.org.

In specific areas of the state, burning permits are required for all burning other than fires contained within an approved device, and fires used for signaling, cooking, or warming. All other burning in the permit areas requires a permit during the fire season. There are potential liabilities if your fire escapes control (AS 41.15.060 Permits, AS 41.15.090 Building or Leasing Fire). For further information regarding wildfire mitigation and burning permits, contact the regional DNR Division of Forestry office. A list of their locations, addresses, and telephone numbers may be obtained from any of the DNR Public Information Offices as well as online at http://forestry.alaska.gov/

Use of Timber and Other Building Materials on Site

Before receiving patent to state land, purchasers are strictly prohibited from selling or removing from the parcel any surface resource such as stone, gravel, sand, peat, topsoil, timber, or any other material valuable for commercial or off-site purposes. Such materials may be used only on the parcel. Local governments may have additional restrictions regarding on-site material use after receiving title. For more information, contact your local government and the DNR Public Information Center.

The DNR Division of Forestry issues personal use permits for the purchase of fuel wood obtained from state land outside your parcel boundaries. Personal use contracts are also issued for the purchase of house logs and saw logs. Contact the appropriate regional DNR Division of Forestry office well in advance of need. Commercial sale of timber is not allowed.

Eagle Nesting Sites

Federal law prohibits any disturbance of bald eagles or their nests. The U.S. Fish and Wildlife Service (USFWS) enforces this law. The USFWS generally recommends no clearing of vegetation within 330 feet of any nest. Additionally, no construction or other potentially disturbing activity should occur within 600 feet of any nest between March 1 and June 1. Further, between June 1 and August 31, no construction activity should occur within 600 feet of active eagle nests until after juvenile birds have fledged. Nest trees should not be disturbed at all. Consult with USFWS on the string of structures and roads or cutting mature trees within 330 feet of a nest tree.
Wetlands

Some State-owned land offerings contain waters of the United States, including wetlands. Section 10 of the Federal Rivers and Harbors Act requires a permit for any structures or work in navigable waters of the United States, which includes those waters subject to the ebb and flow of the tide and/or presently used, have been used in the past, or may be used in the future to transport interstate or foreign commerce. Section 404 of the Federal Clean Water Act requires a permit for the discharge of dredged or fill material into all waters of the United States, including wetlands. Wetlands perform many important functions, including providing habitat for wildlife, preserving water quality, providing flood protection, and enhancing groundwater recharge. Before putting any dredged or fill material in wetlands and/or waters (for example, to build a road, or any other land clearing activities), and/or before working or placing any structures in such waters (for example, dredging, or constructing a dock or pier), purchasers must obtain a permit from the U.S. Army Corps of Engineers.

Working or building structures in waters of the United States and/or discharging dredged or fill material into waters of the United States, including wetlands, without a valid permit may result in civil fines or criminal charges. A wetland determination or delineation may be required before any construction can occur. For a wetland determination on your parcel or more information on permit requirements contact the U.S. Army Corps of Engineers, Alaska District, at (800) 478-2712 or visit: http://www.poe.n士e.army.mil/.

Migratory Birds

The Federal Migratory Bird Treaty Act prohibits the disturbance or destruction of nest areas during nesting season. Nearly all bird species in Alaska are migratory and subject to protection under the Act. Compliance with the Act would preclude road construction activities during nesting season. Additional information is available from the USFWS at: http://fws.gov/pacific/migratorybirds/.

Fish Habitat Requirements

The Fishway Act, AS 16.05.841, requires that an individual or governmental agency notify and obtain authorization from the State of Alaska, Department of Fish and Game (DFG), Division of Habitat for activities within or across a stream used by fish if DFG determines that such uses or activities could represent an impediment to the efficient passage of fish. The Anadromous Fish Act (AS 16.05.871) requires that an individual or governmental agency provide prior notification and obtain approval from the DFG, Division of Habitat "to construct a hydraulic project or use, divert, obstruct, pollute, or change the natural flow or bed" of an anadromous water body or "to use wheeled, tracked, or excavating equipment or log-dragging equipment in the bed" of an anadromous water body. All activities within or across an anadromous water body and all instream activities affecting a specified anadromous water body require approval from the Division of Habitat. Fish Habitat Permit Applications and a list of common activities that require permits are available at http://www.adfg.alaska.gov/index.cfm?adfg=uselicense.main. Activities include, but are not limited to: stream diversion; streambank or streambed disturbance (boat launches or dock construction for example); gravel removal; stream crossings; bridge or culvert construction and maintenance; streambank restoration/protection, erosion control; stream fluming; ice bridge/road construction; placer mining activities; recreational suction dredging; and use of explosives near stream corridors.

If you conduct any activity below ordinary high water of an anadromous water body or impede the efficient passage of fish without notifying and receiving the prior written approval from DFG, you are violating state law and may be charged with a misdemeanor. Contact DFG, Division of Habitat for more information on obtaining permits.

Fish & Game Requirements

State of Alaska, Department of Fish and Game (DFG) regulations allow taking game in defense of life or property only when all other practical means to protect life and property have been exhausted and the necessity for taking the animal is not brought about by harassment or provocation of the animal, by unreasonable invasion of the animal's habitat, or by the improper disposal of garbage or a similar attractive nuisance.

5 AAC 92.410. Taking game in defense of life or property

(a) Nothing in 5 AAC prohibits a person from taking game in defense of life or property if
(1) the necessity for the taking is not brought about by harassment or provocation of the animal, or by an unreasonable invasion of the animal’s habitat,
(2) the necessity for the taking is not brought about by the improper disposal of garbage or a similar attractive nuisance; and
(3) all other practicable means to protect life and property are exhausted before the game is taken.

(b) Game taken in defense of life or property is the property of the state. A person taking such game shall immediately
(1) salvage and surrender to the department;
(2) hide and skull of a bear, completely removed from the carcass, including all attached claws;
(3) hide and skull of fur animals or furbearers;
(4) meat and antlers or horns of ungulates;
(D) meat of all other game not specified in (A)-(C) of this paragraph;
(2) notify the department of the taking; and
(3) submit to the department a completed questionnaire concerning the circumstances of taking the game within 15 days after taking the game.

(c) As used in this section, "property" means
(1) a dwelling, permanent or temporary;
(2) an aircraft, boat, automobile, or other conveyance;
(3) a domesticated animal;
(4) other property of substantial value necessary for the livelihood or survival of the owner.

Staking periods may overlap with certain hunting seasons. Check with DFG to find out the hunting season dates for the staking areas. More information is available at: http://adfg.alaska.gov.

Wildlife

There is always the possibility of encountering bears and other wildlife when in remote locations in Alaska. The State of Alaska, Department of Fish and Game's website (listed below) makes the following suggestions:

• Avoid surprising bears at close distance; look for signs of bears and make plenty of noise.
• Avoid crowding bears; respect their "personal space."
• Avoid attracting bears through improper handling of food or garbage.
• Plan ahead, stay calm, identify yourself, don't run.

We remind you to be aware of your surroundings and diligent when staking or visiting any site in the Alaska wilderness. Bears and all wild animals deserve your attention and respect. For additional information on traveling and working near wildlife, please contact any of the Public Information Centers or visit the following websites:

Provided by the DFG: http://adfg.alaska.gov/index.cfm?adfg=livingwithbears.main
Provided by DNR's Division of Parks and Outdoor Recreation: http://dnr.alaska.gov/parks/safety/bears.htm

Development activities may potentially displace wildlife. You are encouraged to contact DFG for information on how to minimize conflicts with wildlife.
Archaeological Sites

The Alaska Historic Preservation Act prohibits the appropriation, excavation, removal, injury, or destruction of any historic, prehistoric (paleontological), or archaeological site without a permit from the Commissioner of the Department of Natural Resources (AS 41.35.200 Unlawful Act). Should any sites be discovered, activities that may damage the site must cease and the Office of History and Archaeology (OHA) in the DNR Division of Parks and Outdoor Recreation must be notified immediately. To contact OHA, visit: http://dnr.alaska.gov/parks/oha/ or call (907) 269-8721.

Right to Adjourn/Postpone/Cancel

DNR reserves the right to postpone or cancel an offering, in whole or in part, if necessary to protect the interest of the State of Alaska. Such a postponement or cancellation may occur at any time prior to or during the offering, even after the applicant has been notified, but prior to DNR signing a final conveyance document. In the event that DNR cancels an offering, applicable fees, deposits, or payments may be refunded. This brochure is intended for informational purposes only and does not constitute an offer to sell.

Future Offerings

The state reserves the right to offer additional parcels of land adjacent to or near previously sold parcels, thereby potentially increasing the population density in that area. The department may also identify and survey additional parcels in a staking area up to the total number of stakings authorized during the staking period, to be offered for sale at a later time. Public notices about potential activities nearby are available from DNR Public Information Centers.

Taxes

Parcels are subject to taxes and assessments levied by local taxing authorities. Failure to make timely payment of all taxes and assessments on parcels under lease or purchase contract with the State of Alaska is a violation of the lease agreement or purchase contract and may result in termination of the lease or purchase contract. Please contact your local tax authority concerning the calculation of the assessed values of your leased recreational site. Local taxing authority for this offering include:

All staking areas are within unorganized boroughs

Privacy Notice

AS 38.05.035 (a) Powers and Duties of the Director authorizes the Division Director to decide what information is needed to process an application for the sale or use of State-owned land or resources. This information is made a part of the State public land records and becomes public information under AS 40.25.100 Disposition of Tax Information and AS 40.25.120 Public Records: Exceptions; Certified Copies, unless the information qualifies for confidentiality under AS 38.05.035 (a) (8) and confidentiality is requested, or AS 45.48, Alaska Personal Information Protection Act. Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 40.25.310 Information Accuracy and Completeness by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210 Unsworn Falsification in the Second Degree.

Personal information (such as social security numbers, credit card numbers, bank information, etc.) is held confidential. However, all other information concerning applications to lease or purchase State-owned land is considered public and available upon request. Such public information may include, but is not limited to applicants, lessees, and payment histories.

Multiple Uses

The land disposal described in this brochure is only one of the allowed land uses that may occur in any given area. A variety of other authorized uses, such as mining or timber sales, commercial or personal recreation, trapping or resource harvest, can and do occur on municipal, state, federal, and private lands near or within the offered areas. Such uses not only affect adjacent land, but also routes that are intended for access to those areas. Large truck and heavy equipment traffic may occur, and in some cases, small roads or trails are developed, improved, and maintained to accommodate increased traffic. It is strongly recommended that applicants take this into consideration when applying for the lease or purchase of land through these offerings.
ONLINE RESOURCES

These websites are listed here as a reference to assist you when researching a parcel, a land region, or certain development restrictions or policies. They may also include links to appropriate regional office and phone numbers. This is by no means a complete list of agencies that have authority over all aspects of land ownership and development, but it is a good place to start. Many of these websites are referenced throughout this brochure.

APPLICATION FORM

DELIVER APPLICATIONS IN PERSON TO:

Fax applications to: (907) 269-8901
Anchorage, AK  99501-3561
550 West 7th Avenue, Suite 1360
Department of Natural Resources
Remote Recreational Cabin Sites

MAIL APPLICATIONS TO:

OR

APPLY ONLINE AT: http://landsales.alaska.gov/

Applications must be received no sooner than 10:00 a.m., August 19, 2019 and no later than 5:00 p.m., October 11, 2019

Please read all the information in the 2019 Remote Recreational Cabin Site Offering #14 brochure before completing this form and applying. It is also recommended that applicants become familiar with the law implementing this program, AS 38.05.600 and its regulations, 11 AAC 67.800-.845. Incomplete, improperly marked/addressed, or applications submitted outside the designated application period will be rejected.

Note: Corporations, businesses, and non-Alaska residents are NOT eligible to apply for this program.

I hereby certify that:

☐ 1. I am an Alaska resident, and have been for at least one year (12 months) immediately preceding the date of this application;

☐ 2. I am 18 years of age or older;

☐ 3. I have not held a purchase contract or lease issued by the department that has been administratively foreclosed or terminated for cause within the past three years;

☐ 4. I am not currently in default for nonpayment on a purchase contract or lease issued by the department; and

☐ 5. I have not been notified that I am in default for nonpayment of municipal taxes or assessments on a purchase contract or lease issued by the department.

For EACH area applied for, I have enclosed a personal check, money order, cashier’s check, or a certified check payable to the DEPARTMENT OF NATURAL RESOURCES in the amount of $75.00, or completed the credit card information and authorization form below. I understand this fee only entitles me to the opportunity to apply for a staking authorization and does not guarantee I shall receive one. Credit card users, please be certain to include your signature, unsigned authorizations will not be valid payment. Applications submitted without payment will not be accepted.

I understand that I may receive only one Remote Recreation Cabin Site authorization per offering. If I withdraw my application, am ineligible, or am awarded a staking authorization and for whatever reason I decide not to stake a parcel, I understand that this filing fee shall be forfeited to the State of Alaska. I have checked for any Errata or supplemental information.

Signature: ______________________________________________________ Date _______________________________

NOTE: This application and eligibility certification must be filled out completely and submitted with all of the appropriate attachments and fees. Failure to do so may result in the rejection of your application. AS 38.05.035(a) authorizes the director to decide what information is needed to process an application for the lease, sale, or use of State land and resources. This information is made a part of the state public land records and becomes public information at the time the application is filed under AS 40.25.110 and 40.25.120 unless the information qualifies for confidentiality under AS 38.05.035(a)(8) and confidentiality is requested. Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 40.25.310, by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit are punishable under AS 11.56.210.

HOW THE STATE SELLS LAND

Sealed-Bid Auction

The Sealed-Bid Auction consists of parcels which have already been surveyed and appraised. The auction has a bidding period and a minimum bid based on the appraised value. By law, you must be an Alaska resident to participate in the auction. The number of parcels that one bidder may win may be limited in each auction. Typically, DNR begins accepting bids in early spring, and bids are opened in mid-summer.

Over-the-Counter (OTC)

The Over-the-Counter (OTC) offering follows the Sealed-Bid Auction, and includes parcels which did not sell in past Sealed-Bid Auctions. Initially, parcels may be sold above appraised market value. OTC parcels will be available until sold. Non-Alaska residents may purchase OTC parcels, and there is no limit to the number of parcels that can be purchased. OTC parcels are available year-round. For the latest inventory, visit http://landsales.alaska.gov or contact the DNR Public Information Center. Typically, newly released OTC parcels are made available in late summer.

Apart from the Remote Recreational Cabin Sites (RRCS) staking program, detailed in this brochure, the State of Alaska sells land to the public through two other programs: the Sealed-Bid auction, and Over-the-Counter (OTC) offering. The following is a brief description of both of these types of sales to help you understand which is right for you.

2019 Offering # 14 Schedule

Drawing Application Period:
Monday, August 19, 2019 at 10 a.m. to
Friday, October 11, 2019 at 5 p.m.
Drawing:
Tuesday, November 5, 2019 at 10:30 a.m.

1st Staking Period:
Friday, January 31, 2020 through Monday,
June 29, 2020 at 5 p.m.

1st Lease Application Period:
Monday, February 3, 2020 at 10 a.m. to
Monday, June 29, 2020 at 5 p.m.

2nd Staking Period:
Friday, July 10, 2020 through Tuesday,
September 8, 2020 at 5 p.m.

2nd Lease Application Period:
Monday, July 13, 2020 at 10 a.m. to
Tuesday, September 8, 2020 at 5 p.m.
OVER-THE-COUNTER PARCELS AVAILABLE

The Department of Natural Resources has parcels available for purchase Over-the-Counter (OTC) on a first-come, first-served basis. These parcels are offered at a minimum bid price established by the appraised market value. For a complete listing of available parcels and purchase information, see our website https://dnr.alaska.gov/mlw/landsales/otc or visit any of our Public Information Centers in Fairbanks and Anchorage. This list is constantly changing, so be sure to use our website to stay up to date!

How to Submit an Over-The-Counter Application On-line

To apply for a parcel online, go to https://dnr.alaska.gov/mlw/landsales/otc and use one of the many search options to find the parcel you wish to purchase. Maps, parcel information, and a link for purchasing the parcel online are available on the individual parcel pages. The online application process will ask for a Discover, MasterCard, or Visa credit card authorization to pay the deposit of 5% of the purchase price, the contract or patent application fee, and the recording fee. Please be sure to carefully read all the information when purchasing a parcel OTC. All down payments and associated fees are non-refundable. For any questions call our office at 907-269-8594 or email landsales@alaska.gov.

How to Submit an Over-The-Counter Application in Person

A Complete OTC application package for hand delivery includes the following four items:

1. A completed Over-The-Counter application form.
   - Forms may be found at http://dnr.alaska.gov/mlw/forms/land+land-sale or obtained from any of the DNR Public Information Center offices.
   - If applying for multiple parcels, a separate application must be completed for each parcel.

2. A completed Declaration of Intent form.
   - Forms may be found at http://dnr.alaska.gov/mlw/forms/land+land-sale or obtained from any of the DNR Public Information Center offices.
   - If applying for multiple parcels, a separate form must be completed for each parcel.

3. A non-refundable document handling and recording fee.
   - For applicants applying to enter into a contract with the State, the fees are:
     a. Individual $360.00
     b. Business $440.00
     c. Recording fee: $45.00
   - For applicants applying for payoff on the parcel, the fees are:
     a. Individual $240.00
     b. Business $320.00
     c. Recording fee: $25.00
   - If applying for multiple parcels, a separate application must be completed for each parcel.

4. A non-refundable down payment.
   - If applying for multiple parcels, a separate down payment must be included for each parcel.
   - The deposit for each application must be at least five percent of the total undiscounted purchase price (minimum bid amount from the auction brochure, appraised market value). Do not round down and double check your math!
     - For those applying for the Veteran’s Land Discount, please do not subtract your discount from your purchase price amount or your deposit. The discount will be deducted from the purchase price after you have been approved for both the purchase and the Veteran’s Land Discount.

VETERANS: The Veteran’s Land Discount is available on OTC purchases. If you will be applying for the discount, you will also need to include the following three items to your application packet:

1. A completed Veteran Eligibility Affidavit/Application form and completed Waiver of Veterans Discount form, if there is more than one applicant.
2. A copy of the applicant’s DD Form 214, showing the character of the discharge and length of active duty.
3. A copy of your valid and current Alaska driver’s license or State-issued ID Card or other required items of residency proof as described in the Proof of Residency section of this brochure.

Please note that we DO NOT accept mail-in applications for OTC purchases.
