### PLAT APPROVAL CERTIFICATE

This plat is approved by the Commissioner of Natural Resources, or the Commissioner's designee, in accordance with AS 40.15.

Commissioner 7/18/2018  
 Date

By approval of this plat, the Commissioner of the Department of Natural Resources hereby accepts for public use and public purposes the real property dedicated to the public hereon, including easements, rights-of-way, alleys, and roadways. The acceptance of such dedicated areas for public use and public purposes does not obligate the department, any governing body, or the public to construct, operate, maintain, or manage improvements.

- ### NOTES
- This survey of ASLS 2010-10 was accomplished in accordance with AS 38.05.600, GSC 816 and RRCS SI 2016-10.
  - All bearings shown are true bearings as oriented to the Basis of Bearing and all distances are reduced to horizontal ground distances shown in U.S. Survey Feet, unless otherwise noted.
  - The error of closure of this survey does not exceed 1:5000, and/or corner positions have a Relative Positional Accuracy at the 95 percent confidence level of 0.26 feet plus 200 parts per million, or better.
  - All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a fifty foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
  - The existing lessees' claim corners were recovered and used to control the location of tract boundaries.
  - Basis of Coordinates - the shown found NAD 83(2011) coordinates are based on an NGS OPUS solution (EPOCH: 2010.0000) for the found SE corner of Section 12, T9S, R27W, KRM. The coordinates were constrained to the National Spatial Reference System using the CORS reference stations: AB11 (PID# DL6423), AC07 (PID# DL6684), and AC50 (PID# DL7650).
  - The natural meanders of the ordinary high water (OHW) form the true southerly bounds of Tract E. The approximate line of OHW, as shown, is for area computations only, with the true corners being on the extension of the sidelines and their intersection with the natural meanders.
  - There is a 100-foot building setback from the ordinary high water line of all water bodies determined to be public or navigable.
