

NOTES

- A. This survey was accomplished in accordance with AS 38.05.600, RRCS-SI 2003-10 and contract number GSC 664.
- B. All bearings shown are true bearings as oriented to the Basis of Bearing and distances shown are reduced to horizontal field distances.
- C. The accuracy of the survey is greater than 1:5000.
- D. All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot(50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
- E. The existing lessee's claim corners were recovered and used to control the location of the tract boundary.
- F. BASIS OF BEARING The Basis of Bearing for this plat was determined by high precision GPS survey using Topcon GGD receivers, differentially corrected and processed using Trimble Total Control, Version 2.73 processing software.
- G. BASIS OF COORDINATES The coordinates depicted on the plats are based on a tie to a monument of record using high precision GPS survey techniques. The bearing and distance obtained were applied to the record NAD27 position to compute the NAD27 positions of a corner of each tract.
- H. The 2003 mean magnetic declination was determined by calculation using the Magnetic Declination Calculator (MIRP) maintained by Natural Resources Canada at http://www.geolab.nrcan.gc.ca/geomag/mirp_e.shtml
- I. There is a 100 foot building setback from the line of ordinary high water of all public and navigable water bodies.
- J. The Matanuska-Susitna Borough is not responsible for road construction or road maintenance.
- K. There may be federal, state and local requirements governing land use. It is the responsibility of the individual parcel owner to obtain a determination whether such requirements apply to the development of the parcels shown hereon.
- L. No individual water supply system or sewage disposal system shall be permitted on any lot unless such system is located, constructed and equipped in accordance with the requirements, standards and recommendations of the State of Alaska, Department of Environmental Conservation, which govern those systems.
