

A. This survey was accomplished in accordance with AS 38.05.600, GSC 709 RRCS-SI 2005-27.

B. All bearings shown are true bearings as oriented to the Basis of Bearing and distances shown are reduced to horizontal field distances.

C. The accuracy of the survey is greater than 1:5000.

D. All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot(50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.

E. The existing lessee's claim corners were recovered and used to control the location of the tract boundary.

F. BASIS OF BEARING The Basis of Bearing for this plat was determined by high precision GPS survey using Topcon GGD receivers, differentially corrected and processed using Trimble Total Control, Version 2.73 processing software.

BASIS OF COORDINATES NAD27 The coordinates depicted on the plots are based on a tie to a monument of record using high precision GPS survey techniques. The bearing and distance obtained were applied to the record NAD27 position to compute the NAD27 positions of a corner of each tract.

NAD83 coordinates were derived by high precision GPS survey using Topcon GGD receivers, differentially corrected and processed using Trimble Total Control, Version 2.73 processing software. The adjustment was constrained to NGS CORS station ZANI (CORS96) (EPOCH 2003.0)

G. The natural meanders of the line of ordinary high water forms the true bounds of portions of Tract E. The approximate line of OHW as shown, is for area computations only, with the true corners being on the extension of the sidelines and their intersection with the natural meanders.

CERTIFICATE OF OWNERSHIP AND DEDICATION

I, the undersigned, hereby certify that I am the Director, Division of Mining, Land and Water and that the State of Alaska is the owner of ASLS 2005-27 as shown hereon. I hereby approve this survey and plat for the State of Alaska and dedicate for public or private use as noted, all easements, public utility areas, and rights-of-way as shown and described hereon.

NOTES

H. The 2006 mean magnetic declination was determined by calculation using the Magnetic Declination Calculator (MIRP) maintained by Natural Resources Canada at http://www.geolab.nrcan.gc.ca/geomag/mirp_e.shtml

I. The Matanuska-Susitna Borough is not responsible for road construction or road maintenance.

J. There is an 100 foot building setback from the line of ordinary high water of all public and navigable water bodies.

K. Flood Hazard Note for the Unnamed Lake bordering Tract E.

A primary benchmark (BM) was established at WCMC C2 Tract E. An elevation of 1153 ft. was assumed for the BM. The plat depicts elevations for selected points relative to the BM derived from GPS measurements.

In October 2006 the lake level was 1150 ft. - 3 feet lower than the TBM. Based on the topography and outfall to the southwest, the rainfall during our survey, and the limited area draining into the lake the BASE FLOOD ELEVATION of the unnamed lake is 1150 feet - 3 foot lower than the BM.

Tract E There is a less than one percent chance that any part of the platted area of Tract E, outside of the 100 ft. building setback, will be inundated by the Base Flood Event in any given year.

Prior to development within the Flood Hazard Area applicant must obtain a development permit from Code Compliance in accordance with M.S.B. 17.29

L. Land Use Note: There may be Federal, State and local requirements governing land use. It is the responsibility of the individual parcel owner to obtain a determination whether such requirements apply to the development of parcels shown hereon.

M. Wastewater Note: No individual water supply system or sewage disposal system shall be permitted on any lot unless such system is located, constructed and equipped in accordance with the requirements, standards and recommendations of the State of Alaska, Department of Environmental Conservation, which govern those systems.

N. A public access trail easement, ADL 229783, was recorded April 3, 2008 in the Anchorage Recording District as Document Number 2008-018099-0.

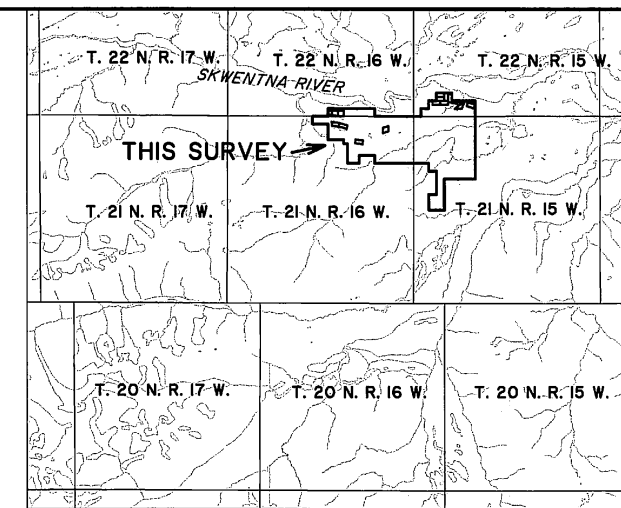

CERTIFICATE OF PAYMENT OF TAXES

I hereby certify that all current taxes and special assessments, through December 31, 2008 against the property, included in the subdivision, hereon have been paid.
