

TEKLANIKA II REMOTE RECREATIONAL CABIN SITES

Mean Magnetic Declination
 26 1/2' E.
 USS 8084
 1987

Basis of Coordinates
 BLM Witness Cor. to the Cor. of T.5&6S., R.9&10W., F.M.
 Latitude: 64°25'51.51" North
 Longitude: 149°25'38.72" West
 (NAD 1927 Record)

BLM record geodetic coordinates for this monument are only available to the hundredths of seconds as are shown here. Individual Tract Corner No. One coordinates are provided to the thousandth of second of precision to maintain dimensional integrity, but should only be considered accurate to the significant figures of the basis of coordinates.

Tract Monument Tie Table

Basis of Coordinates to	Bearing	Distance

WCMC1, Tract Q	S 55°25'07" W	30,525.33'
WCMC1, Tract T	S 55°45'44" W	11,428.96'

Bearings in this table are in the Basis of Bearings of this plat. Distances provided are ground measured at an average elevation of 500 feet. These ties would have to be rotated clockwise by 00°05'41" and adjusted to sea level to yield geodetic azimuths and distances that would then agree with the geodetic positions computed and shown on the individual sheets of this plat. The NAD 83 geodetic coordinates provided were converted from the NAD 27 computed positions using NADCON interpolation files.

General Notes

- This survey was accomplished in accordance with AS 38.05.600, GSC 710, and RRCS SI 2005-28.
- All bearings shown are true bearings as oriented to the Basis of Bearing. See Note No. 5. Distances shown are reduced to horizontal field distances.
- The accuracy of this survey is greater than 1:5000.
- All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
- All bearings on this plat other than those indicated as being record are in a local plane bearing system, oriented to the NAD 27 true meridian near the line between protracted Sections 15 and 16, in the approximate geographic center of this project area. The orientation to the true meridian was determined by a high precision GPS survey, using Leica receivers, differentially corrected and processed using Geo Office, Version 2.0 software.
- Tract specific notes are listed on the plat sheet with the corresponding tract.

Surveyor's Certificate

I hereby certify that I am properly registered and licensed to practice land surveying in the State of Alaska, that this plat represents a survey made by me or under my direct supervision, that the monuments shown hereon actually exist as described, and that all dimensions and other details are correct.
 Date 7-25-2007 Registration No. 5032-S
Richard B. Gray
 Richard B. Gray, Registered Land Surveyor

LOCATION MAP

**Certificate of Ownership
And Dedication**

I, the undersigned, hereby certify that I am the Director, Division of Mining, Land and Water and that the State of Alaska is the owner of ASLS 2005-28, as shown hereon. I hereby approve this survey and plat for the State of Alaska, and dedicate for public or private use as noted, oil easements, public utility areas, and rights-of-way as shown and described hereon.

Dated: October 03, 2007
Gerald Jennings
 Director, Division of Mining, Land, and Water

Notary's Acknowledgment

Subscribed and sworn to before me this 3rd day of OCTOBER, 2007, for GERALD JENNINGS
Gerald Jennings
 Notary for the State of Alaska
 My commission expires 1-9-09

Plat Approval

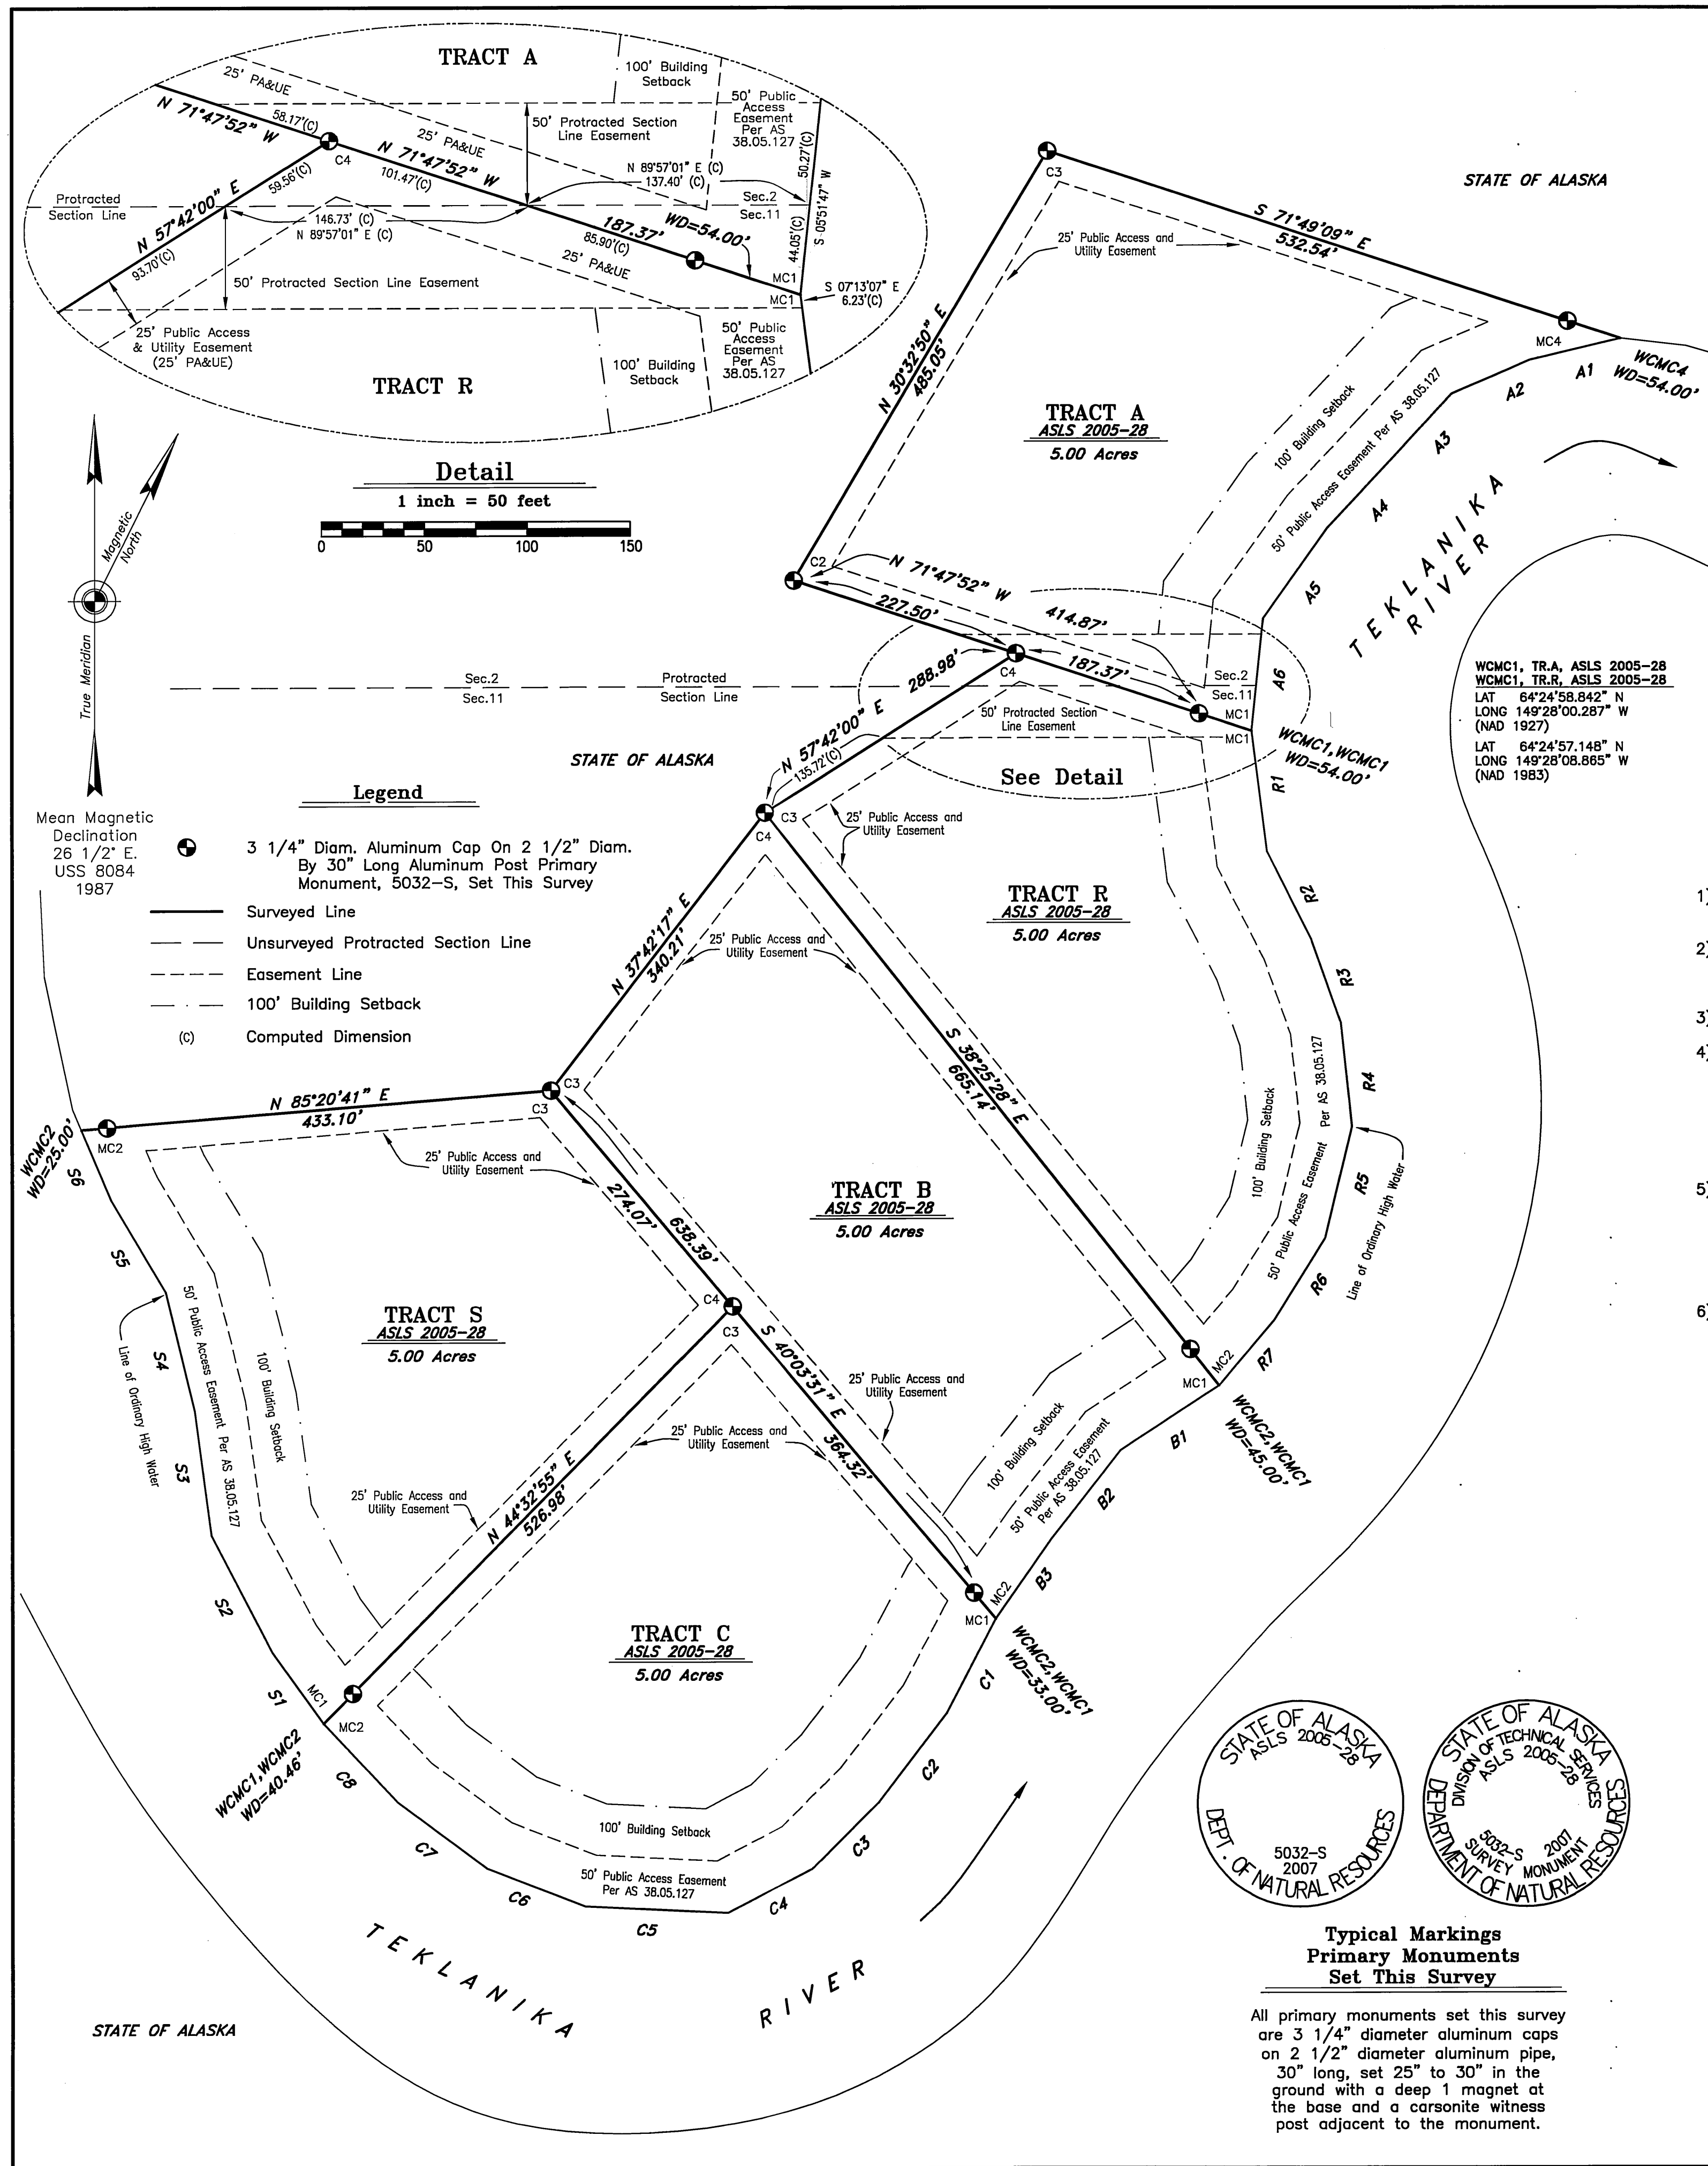

This plat is approved by the Commissioner of the Department of Natural Resources, or the Commissioner's designee, in accordance with AS 40.15.
Gerald Jennings Oct. 03, 2007
 Commissioner Date
 By approval of this plat, the Commissioner of the Department of Natural Resources hereby accepts for public use and public purposes the real property dedicated to the public hereon, including easements, rights-of-way, alleys, and roadways. The acceptance of such dedicated areas for public use and public purposes does not obligate the Department, any governing body or the public to construct, operate, maintain or manage improvements.

Sheet 2 Notes

- General Notes applicable to all sheets of this survey appear on Sheet No. 1.
- The existing lessees' claim corners were recovered and used to control the location of the boundaries of Tracts A, B, and C.
- There are no applicants for Tracts R and S.
- The natural meanders of the line of ordinary high water of the Teklanika River form the true bounds of Tracts A, B, C, R, and S. The approximate line of ordinary high water, as shown, is for area computations only, with the true tract corners being on the extension of the tract sidelines and their intersection with the natural meanders.
- All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
- The line between protracted Sections 2 and 11 extends through Tracts A and R. The computation of the position of this protracted section line utilized the basis of coordinates and the basis of bearings as described on Sheet 1 and the protracted position for the corner of Sections 1, 2, 11, and 12 and the protracted position for the corner of Sections 2, 3, 10, and 11. It is not intended to represent the official section line location. The protracted section line shown hereon fixes the location of the section line easement within Tracts A and R.

Sheet 3 Notes

- General Notes applicable to all sheets of this survey appear on Sheet No. 1.
- The existing lessees' claim corners were recovered and used to control the location of the boundary of Tract D.
- There is no applicant for Tract T.
- The natural meanders of the line of ordinary high water of the Teklanika River form the true bounds of Tracts D and T. The approximate line of ordinary high water, as shown, is for area computations only, with the true tract corners being on the extension of the tract sidelines and their intersection with the natural meanders.
- All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
- The line between protracted Sections 2 and 11 extends through Tract D. The computation of the position of this protracted section line utilized the basis of coordinates and the basis of bearings as described on Sheet 1 and the protracted position for the corner of Sections 1, 2, 11, and 12 and the protracted position for the corner of Sections 2, 3, 10, and 11. It is not intended to represent the official section line location. The protracted section line shown hereon fixes the location of the section line easement within Tract D.

Sheet 6 Notes

- General Notes applicable to all sheets of this survey appear on Sheet No. 1.
- The existing lessees' claim corners were recovered and used to control the location of the boundaries of Tracts I, J and K.
- The natural meanders of the line of ordinary high water of the Teklanika River form the true bounds of Tracts I, J and K. The approximate line of ordinary high water, as shown, is for area computations only, with the true tract corners being on the extension of the tract sidelines and their intersection with the natural meanders.
- All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.

Applicant Certificate

I, the undersigned, hereby certify that I am the applicant as shown hereon. I hereby approve this survey and plat.

Sheet 7 Notes

- General Notes applicable to all sheets of this survey appear on Sheet No. 1.
- The existing lessees' claim corners were recovered and used to control the location of the boundaries of Tracts L and M.
- The natural meanders of the line of ordinary high water of the Teklanika River form the true bounds of Tracts L and M. The approximate line of ordinary high water, as shown, is for area computations only, with the true tract corners being on the extension of the tract sidelines and their intersection with the natural meanders.
- All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
- The line between protracted Sections 16 and 17 lies west of Tracts L and M as shown hereon. The computation of the position of this protracted section line utilized the basis of coordinates and the basis of bearings as described on Sheet 1 and the protracted position for the corner of Sections 8, 9, 16, and 17 and the protracted position for the corner of Sections 16, 17, 20, and 21. It is not intended to represent the official section line location. The protracted section line shown hereon fixes the location of the section line easement within Tract L.

Sheet 8 Notes

- 1) General Notes applicable to all sheets of this survey appear on Sheet No. 1.
- 2) The existing lessees' claim corners were recovered and used to control the location of the boundaries of Tracts N and O.
- 3) The natural meanders of the line of ordinary high water of the Teklanika River form the true bounds of Tracts N and O. The approximate line of ordinary high water, as shown, is for area computations only, with the true tract corners being on the extension of the tract sidelines and their intersection with the natural meanders.
- 4) All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under AS. 19.10.010.
- 5) The line between protracted Sections 17 and 20 extends through Tract O and the line between protracted Sections 20 and 21 lies east of Tract N. The computation of the position of these protracted section lines utilized the basis of coordinates and the basis of bearings as described on Sheet 1 and the protracted position for the corner of Sections 16, 17, 20, and 21, the protracted position for the corner of Sections 17, 18, 19, and 20, and the protracted position for the corner of Sections 20, 21, 28, and 29. It is not intended that these represent the official section line locations. The protracted section lines shown hereon fix the location of the section line easements within Tracts N and O.

Q7	S 73°42'40" W	64.39'

Sheet 9 Notes

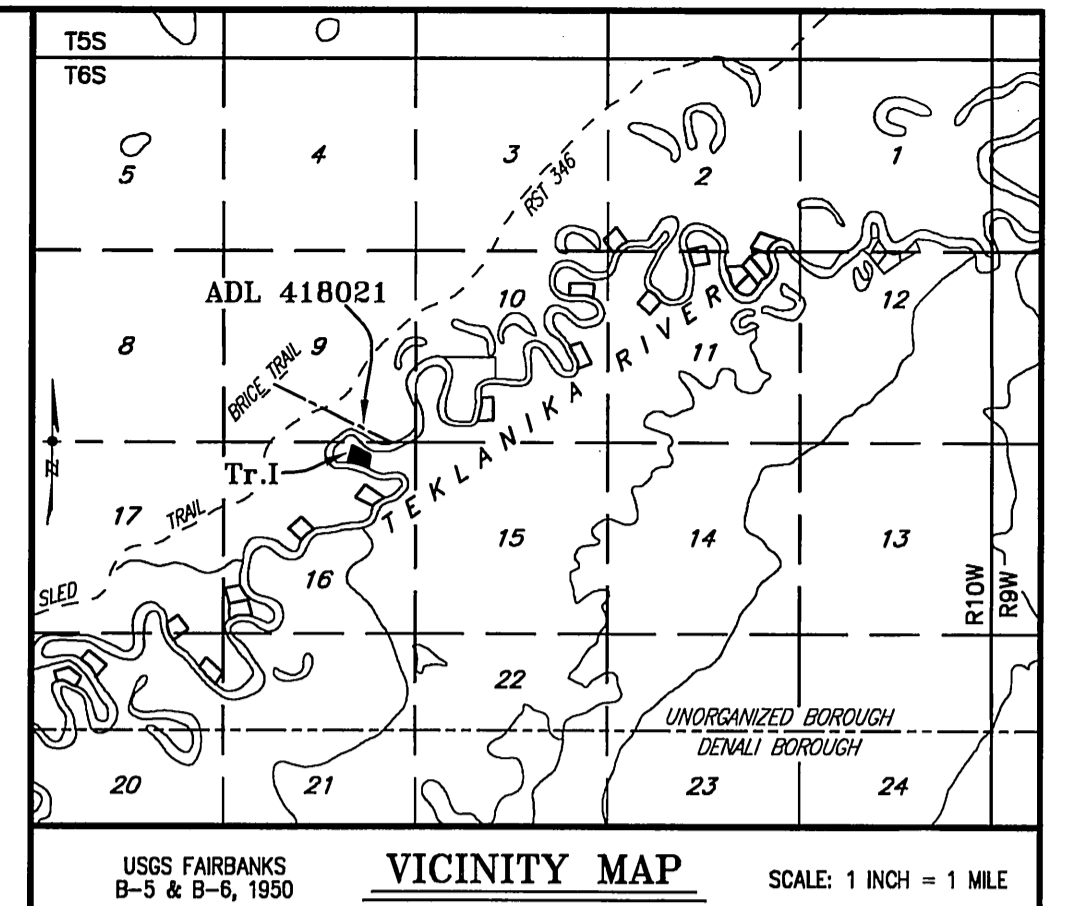

- 1) General Notes applicable to all sheets of this survey appear on Sheet No. 1.
- 2) The existing lessees' claim corners were recovered and used to control the location of the boundaries of Tracts P and Q.
- 3) The natural meanders of the line of ordinary high water of the Teklanika River form the true bounds of Tracts P and Q. The approximate line of ordinary high water, as shown, is for area computations only, with the true tract corners being on the extension of the tract sidelines and their intersection with the natural meanders.
- 4) All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.

Typical Markings
Primary Monuments
Set This Survey

All primary monuments set this survey are 3 1/4" diameter aluminum caps on 2 1/2" diameter aluminum pipe, 30" long, set 25" to 30" in the ground with a deep 1 magnet at the base and a carsonite witness post adjacent to the monument.

Sheet 10 Notes

- 1) General Notes applicable to all sheets of this survey appear on Sheet No. 1.
- 2) The natural meanders of the line of ordinary high water of the Teklanika River form the true terminus of ADL 418021. The approximate line of ordinary high water, as shown, is for graphic clarity only, with the true easement sidelines terminating at their intersections with the natural meanders.
- 3) All parcels of land owned by the State of Alaska, located within 50.00 feet of, or bisected by a surveyed or protracted section line, are subject to a 50 foot (50') easement, each side of the section line, which is reserved to the State of Alaska for public highways under A.S. 19.10.010.
- 4) The line between protracted Sections 9 and 16 intersects ADL 418021 as shown hereon. The computation of the position of this protracted section line utilized the basis of coordinates and the basis of bearings as described on Sheet 1 and the protracted position for the corner of Sections 8, 9, 16, and 17 and the protracted position for the corner of Sections 9, 10, 15, and 16. It is not intended to represent the official section line location.
