

Chuitna Coal Project Status Update for October 2008

Status of the Chuitna Coal Project

At this time a complete permit application package for the Chuitna Coal Project has not been submitted to the Division of Mining, Land and Water and no formal review under AS 27.21 and 11 AAC 90 has been initiated. Once the entire permit application package has been submitted an evaluation of the completeness of the application and of the cumulative impacts of the project can be undertaken.

During the month of October, no additional project components were received from PacRim.
