

Johnson Tract Project

Reclamation Plan Approval Amendment 1

No. A20243253RPA.01

DEPARTMENT OF NATURAL RESOURCES
Division of Mining, Land and Water

July 2, 2026

The Alaska Department of Natural Resources, Division of Mining, Land and Water (DNR), in accordance with and subject to Alaska Statutes 27.19 (Reclamation) and the Alaska Administrative Code, Title 11 (Natural Resources) and Chapter 97 (Mining Reclamation), approves the Reclamation Plan for the Pogo Mine Project submitted by:

J T Mining Inc.
516 2nd Avenue, Suite 401
Fairbanks, Alaska 99701

Throughout this document, unless otherwise specifically indicated, reference to J T Mining Inc., J T Mining, or “the Permittee” is considered a reference to J T Mining Inc., a subsidiary of Contango Silver and Gold Inc.

Throughout this document, unless otherwise specifically indicated, reference to the State, Department, DNR, DMLW or Division are considered a reference to the State of Alaska Department of Natural Resources – Division of Mining, Land & Water -Mining Section.

Throughout this document, the Reclamation Plan is considered to consist of:

- *Reclamation Plan: Johnson Tract Project, CIRI Lands (March 2024)*
- *Reclamation Estimate-Johnson Tract Project-CIRI Land (2023)*
- *Reclamation Plan Amendment #1: Johnson Tract Critical Metals Project Portal Reclamation, Dewatering Pipeline, and Rapid Infiltration Basin (RIB) (March 2026)*
- *Reclamation Cost Estimate-Johnson Tract Project-CIRI Land (2026)*

Reference to any of the plan, or its appendices, throughout this document are considered to be a reference to the Reclamation Plan. Likewise, any and all stipulations associated with the approval of any supporting documents are considered to be a requirement of the Reclamation Plan Approval.

Effective dates of this plan approval are July 2, 2026 through July 1, 2031 unless sooner revoked; however, J T Mining’s obligations under the terms and conditions of this approval shall continue, unless sooner terminated in accordance with the provisions of this approval, until completion of all requirements under and pursuant to the Reclamation Plan.

This plan approval is for activities upon Cook Inlet Region Incorporated (CIRI) owned lands encompassed by the Johnson Tract Lease boundary.

- Sections 3-10, 15-22, and 29-30, Township 1 South, Range 21 West, Seward Meridian.

This plan approval does not constitute certification of any property right or land status claimed by the applicant.

The Reclamation Plan was found to be complete and is approved with the following conditions:

General Stipulations

Financial Assurance. Operations may not begin under this Reclamation Plan Approval until the Permittee submits a bond in a form and substance approved by DNR. The bond may be released or decreased as allowed per 11 AAC 97.435. Modifications to this Reclamation Plan may, at DNR's discretion, require bond review and update. An increase of \$2,743,000 for the total financial assurance amount of \$3,469,000 has been agreed upon for Johson Tract Project.

Terms of this Plan Approval. The Terms and Conditions contained within the Reclamation Plan, amendments and approvals, are hereby included as stipulations of this plan approval. If there is a difference between the Reclamation Plan as submitted and the terms contained within this plan approval, the terms contained within this plan approval take precedence. Changes to the documents incorporated herein must be approved by DNR if they affect this plan approval. If DNR approves the changes, they become terms of this Reclamation Plan Approval.

Authorized Officer. The Authorized Officer (AO) for DNR is the Director of the Division of Mining, Land and Water or their designee. The designated AO is the Mining Section Chief within the Division of Mining, Land and Water, currently Steve Buckley. The AO may be contacted at 550 West 7th Avenue, Suite 900b, Anchorage, Alaska 99501-3577, Attention: Steve Buckley, telephone (907) 269-8621, and fax (907) 269-8930 or at stephen.buckley@alaska.gov. The Permittee will be notified of changes to the AO as needed.

Reporting. The results of monitoring required by the Reclamation Plan and any other monitoring required by this plan approval obtained during a reporting period, shall be summarized and submitted to the AO or designee quarterly, no later than 60 days after the last day of the first through third calendar quarters, in an electronic format acceptable to DNR. Any other monitoring required by state or federal authorizations shall be provided upon request of the AO or designee.

An annual report will be due by March 1 and shall summarize activities (surface disturbance, reclamation, mining, and milling) conducted during the previous calendar year and include fourth quarter monitoring data. The annual report shall also address the adequacy of the financial responsibility, including, but not limited to, inflation, significant changes in reclamation activity costs, concurrent reclamation, expansion or other changes to the operation of the facility. Electronic copies should also be sent to DNR (Adam Daniels at adam.daniels@alaska.gov and dnr.water.reports@alaska.gov, and William Groom at william.groom@alaska.gov), Alaska Department of Fish & Game (Audra Brase at audra.braser@alaska.gov), and Alaska Department of Environmental Conservation (DEC) (Tim Pilon at tim.pilon@alaska.gov). Amendments to this distribution list will be provided to the Permittee as needed.

Alaska Historic Preservation Act. If burials or human remains are discovered as a result of or during the activities authorized by this Reclamation Plan Approval, all activities that would disturb such remains shall be stopped and measures taken to protect the site. The State Historic Preservation Officer (907-269-8704) and the State Troopers (907-269-5038) shall be contacted immediately.

Maps. The Permittee shall submit to DNR an annual set of maps illustrating the current development of all facilities within the project area as described in the Reclamation Plan. The plan maps shall show cleared and grubbed areas; growth medium stockpiles; roads; waste rock dump development; material site development; and facility construction. Maps shall be appropriately scaled, with labeled topography, to review the development of individual facilities.

Environmental Audit. Unless waived by the department, a periodic third-party environmental audit shall be completed during the final year of the permit term or sooner if final closure starts during the permit term. However, the field inspection portion of the audit shall be conducted during the snow free season the year before permit expiration. The audit will include all aspects of this Reclamation Plan Approval. The environmental audit is required to verify the Permittee's compliance with applicable environmental laws associated with this permit. The third-party contractor should be mutually agreed on by the State and the Permittee, but in the event that agreement cannot be reached, the State retains the final contractor selection decision. Costs for the third-party contractor shall be borne by the Permittee. The intent of the audit is to evaluate whether both Permittee management and agency permit administration provide reasonable assurances that the facility and environmental controls are functioning as intended. The environmental audit shall include an evaluation of the adequacy of the approved financial assurance.

Temporary Closure. The Permittee shall notify the AO in writing at least thirty (30) days prior to any planned Temporary Closure of ninety (90) days or longer. The Permittee shall notify the AO of any unanticipated Temporary Closure expected to last ninety (90) days or more within ten (10) days of the first day of the Temporary Closure. The notice shall state the nature and reason for the Temporary Closure, the anticipated duration of the Temporary Closure, what actions will be taken to maintain compliance with project permits and plan approvals, and any event which would reasonably be anticipated to result in the resumption of mining or the permanent cessation of mining. Mining operations must resume for not less than ninety (90) consecutive days in order to terminate the running of the Temporary Closure. If a Temporary Closure extends beyond three (3) years, the Department may deem mining operations to be permanently abandoned or ceased, and whereupon final reclamation must commence unless otherwise agreed by the Department.

The Permittee shall ensure that the project area and facilities are maintained in a safe condition during a Temporary Closure and the Permittee shall not allow the project area or facilities to be degraded / eroded or facilities to fall into a state of disrepair during or as a result of the Temporary Closure. Action shall be taken to prevent or mitigate any impacts to ground or surface waters from project facilities. All collection, treatment,

maintenance, and monitoring activities required under project permits or plan approvals shall be performed under any Temporary Closure.

Abandonment or Cessation of Operations. Not later than thirty (30) days after the permanent cessation or abandonment of mining and milling operations, the Permittee shall notify the AO of the cessation of mining operations.

Within ninety (90) days of the decision to permanently cease operations, an updated final Reclamation Plan, schedule, and Monitoring Plan must be submitted to DNR for approval. The updated plans must address current conditions at the site.

Permanent reclamation of individual facilities must be implemented and completed in accordance with the conditions of this Reclamation Plan Approval.

Permanent reclamation of a facility will be complete when the following criteria are met:

- All terms of the current Reclamation Plan and conditions of this Reclamation Plan Approval have been met; and
- The performance standards under Alaska Administrative Code, Title 11 (Natural Resources) and Chapter 97 (Mining Reclamation) Article 2 (Reclamation Performance Standards) have been achieved.
- A post-closure operating entity will be identified to implement the Long Term Care and Maintenance plan and respective funds will be deposited into a trust fund or other account approved by the Department.

Erosion Standard. Erosion features which form in areas that have been recontoured and covered with topsoil must be stabilized if they affect the long-term stability of the reclaimed area or may result in additional erosion or sedimentation. Actions to stabilize erosion features shall be conducted in a manner that minimizes disturbance to adjacent areas. Subsequent inspections shall be completed to verify that rills and gullies do not persist. If chronic or long-term erosion features are identified, then remediation of the site drainage that is contributing to the formation of the rills and gullies shall be completed.

Invasive Weed Control. The Permittee shall inspect revegetated areas to identify invasive plant species and eradicate these species to the extent practicable. If invasive plant species are identified, the Permittee shall notify the AO.

Inspection and Entry. The Permittee shall permit authorized representatives of DNR to enter into and upon the area and facilities covered under this plan approval at all reasonable times without notice for the purpose of inspecting the area and activities covered under this plan approval. Said inspections shall be subject to the safety and security procedures adopted by the Permittee.

At any time upon DNR's written request, the Permittee shall promptly make any and all records, documents, or other information required to be kept or maintained by law, regulation, ordinance or this Reclamation Plan Approval available to DNR for inspection and copying as reasonably required by DNR to determine the Permittee in compliance

with local, state and federal laws applicable to the operations authorized under this plan approval.

Violations. This authorization is revocable immediately upon violation of any of its terms, conditions, stipulations, nonpayment of fees, or upon failure to comply with any other applicable laws, statutes and regulations (federal and state).

Assignment. This plan approval may be transferred or assigned with prior written approval from DNR. DNR will only disapprove a transfer with good cause and will evaluate whether the proposed assignee (1) is qualified to hold interests in state mining rights under AS 38.05.190 and to acquire all other permits and authorizations necessary to conduct operations under the plan; (2) is on notice of default or subject to an enforcement action by any state agency on any lease, reclamation bond, or other permit within the state. Any assignee must commit in writing to be bound by this plan approval to the same extent as the Permittee, and must provide to DNR all proofs of insurance, bonds, or undertakings required by this plan approval. Transfer of this plan approval may, at DNR's discretion, require bond review and update.

Other Authorizations. The issuance of this authorization does not alleviate the necessity of the Permittee to obtain authorizations required by other agencies for this activity.

Change of Address. Any change of address must be submitted in writing to the AO.

Modifications. Any request for modification of the Reclamation Plan and any other affected permits or authorizations must be made by written application to DNR. Amendments to these plans may, at the discretion of DNR, require bond review and update.

Statutes and Regulations. This plan approval is subject to all applicable state and federal statutes, including state, federal, and any local statutes and ordinances in effect on the effective date of this plan approval, new statutes, regulations, and ordinances enacted or promulgated after said effective date, and changes to existing statutes and regulations made after the effective date, to the extent constitutionally permissible.

Severability. If any clause or provision herein contained shall be adjudicated to be invalid, it shall not affect the validity or effect of any other clause or provision of this plan approval, nor constitute any cause of action in favor of either the Permittee or DNR as against the other.

Save Harmless. The recipient of this Reclamation Plan Approval shall indemnify, save harmless, and defend the DNR, its agents and its employees from any and all claims, actions or liabilities for injuries or damages sustained by any person or property arising directly or indirectly from approved activities or the Permittee's performance under this

Reclamation Plan Approval. However, this provision has no effect, if, and only if, the sole proximate cause of the injury is the DNR's negligence.

Project Specific Stipulations

Permit Renewal. At least 120 days before the expiration of this plan approval, the Permittee must submit to the department an updated reclamation plan and cost estimate for approval.

Developmental Rock. Development rock used for construction or stored long term should not have the potential to discharge acid rock drainage. If development rock is determined to have potential to generate acid, it must be stored in a manner that prevents the generation of acid rock drainage or prevents the offsite discharge of acid rock drainage.

Commencement of permitted activities will be considered an acceptance by J T Mining Inc. of these stipulations.

Appeal Right and Procedure

An eligible person affected by this decision may appeal to the DNR Commissioner per AS 44.37.011 and 11 AAC 02. Any appeal must be received within twenty (20) calendar days after issuance of this decision under 11 AAC 02.040. An eligible person must first appeal a decision to the Commissioner before seeking relief in superior court. The Alaska Court System establishes its own rules for timely appealing final administrative orders and decisions of the department.

Appeals may be mailed or hand-delivered to the DNR Commissioner's Office, 550 W. 7th Avenue, Suite 1400, Anchorage, Alaska, 99501; or faxed to (907)-269-8918; or sent by electronic mail to dnr.appeals@alaska.gov. Appeals must be accompanied by the fee established in 11 AAC 05.160(d)(1)(F), which has been set at \$200 under the provisions of 11 AAC 05.160 (a)-(b). A copy of 11 AAC 02 is available on the department's website at <https://dnr.alaska.gov/mlw/pdf/DNR-11-AAC-02.pdf>.
