

# Palmer Project

## Reclamation Plan Approval

No. J20245690RPA

DEPARTMENT OF NATURAL RESOURCES  
Division of Mining, Land and Water

Month XX, 2024

The Alaska Department of Natural Resources, Division of Mining, Land and Water (DNR), in accordance with and subject to Alaska Statutes 27.19 (Reclamation) and the Alaska Administrative Code, Title 11 (Natural Resources) and Chapter 97 (Mining Reclamation), approves the Reclamation Plan for the Palmer Project submitted by:

Constantine Mining LLC  
800 West Pender St.  
Suite 320  
Vancouver, BC, Canada V6C 2V6

Constantine Mining LLC is a joint venture between Constantine North Inc. and Dowa Metals and Mining Alaska LTD.

Throughout this document, unless otherwise specifically indicated, reference to Palmer Project, Constantine, Constantine North and “the Permittee” are considered a reference to Constantine Mining LLC.

Throughout this document, unless otherwise specifically indicated, reference to the State, Department, DNR, DMLW or Division are considered a reference to the State of Alaska – Department of Natural Resources – Division of Mining, Land & Water.

Throughout this document, the Reclamation Plan is considered to consist of:

- Appendix C: Temporary Closure and Final Reclamation Plans, Plan of Operations Palmer Advanced Exploration Project Haines, Alaska, Phase II – Underground Exploration Upland Mining Lease No. 9100759. Updated April 2024.

Reference to this plan throughout this document is a reference to the Reclamation Plan. Likewise, any and all stipulations associated with the approval of any supporting documents are considered to be a requirement of the Amended Reclamation Plan Approval.

Effective dates of this amended Reclamation Plan Approval is subject to the submission of a bond in a form acceptable by DNR and no sooner than the date of signing (Month XX, 2024) for a period of 5 years (ending on Month XX, 2029), unless sooner revoked; however, Constantine’s obligations under the terms and conditions of this plan approval shall continue, unless sooner terminated in accordance with the provisions of this plan approval, until completion of all requirements under and pursuant to the Reclamation Plan.

This reclamation plan approval is for activities upon Mental Health Trust managed lands encompassed by the Palmer Project as described in the Plan of Operations Palmer Exploration Project (May 2024).

This plan approval does not constitute certification of any property right or land status claimed by the applicant. This Reclamation Plan Approval also does not constitute an approval of the Plan of Operations submitted to the TLO.

The Reclamation Plan was found to be complete and is approved with the following conditions:

## General Stipulations

**Financial Assurance.** This Amended Reclamation Plan Approval does not take effect until the Permittee submits a bond in a form and substance approved by DNR. The bond can be released or decreased as allowed per 11 AAC 97.435. Modifications to this Reclamation Plan may, at DNR's discretion, require bond review and update. The total financial assurance amount of \$1,272,000.00 has been approved for the Palmer Project. This amount shall be adjusted annually to account for inflation based on the Anchorage CPI. The annually adjusted amount shall be submitted by one year from the effective date of this approval, and each year thereafter for the term of this approval.

**Terms of this Plan Approval.** The Terms and Conditions contained within the:

- Appendix C: Reclamation Plans and Cost Estimates, Palmer Advanced Exploration Project, Phase II – Underground Exploration (April 2024) of the Plan of Operations.

are hereby included as stipulations of this plan approval. If there is a difference between the Reclamation Plan as submitted and the terms contained within this plan approval, the terms contained within this plan approval take precedence. Changes to the documents incorporated herein must be approved by DNR if they affect this plan approval. If DNR approves the changes, they become terms of this Reclamation Plan Approval.

**Authorized Officer.** The Authorized Officer for DNR is the Director of the Division of Mining, Land and Water or his designee. The Authorized Officer is designated as the Mining Section Chief within the Division of Mining, Land and Water, currently Steve Buckley. The Authorized Officer may be contacted at 550 West 7<sup>th</sup> Avenue, Suite 900D, Anchorage, Alaska 99501-2577, Attention: Steve Buckley, telephone (907) 269-8621, and fax (907) 269-8930 or at [stephen.buckley@alaska.gov](mailto:stephen.buckley@alaska.gov). The Permittee will be notified of changes to the authorized officer as needed.

**Reporting.** An annual report will be due by March 1<sup>st</sup> and shall summarize activities (surface disturbance, reclamation, mining, and milling) conducted during the previous calendar year and include any monitoring data if applicable. The annual report shall also address the adequacy of the financial responsibility, including, but not limited to, inflation, significant changes in reclamation activity costs, concurrent reclamation, expansion or other changes to the operation of the facility. Electronic

copies should also be sent to DNR (Adam Daniels at adam.daniels@alaska.gov), and (William Groom at william.groom@alaska.gov), Alaska Department of Fish & Game (ADFG) (Kate Kanouse at kate.kanouse@alaska.gov), and Alaska Department of Environmental Conservation (ADEC) (Tim Pilon at tim.pilon@alaska.gov and David Khan at david.khan@alaska.gov).

Amendments to this distribution list will be provided to the Permittee as needed.

**Maps.** The Permittee shall submit to DNR an annual set of maps illustrating the current development of all facilities within the project area as described in the Reclamation Plan. The plan maps shall show cleared and grubbed areas, growth medium stockpiles, roads, waste rock dump development, material site development and facility construction. Maps shall be appropriately scaled, with labeled topography, to review the development of individual facilities.

**Environmental Audit.** A periodic third-party environmental audit may be required by the State during the final year of the permit term or sooner if final closure starts during the permit term. If an audit is required, the following will apply: The field inspection portion of the audit shall be conducted during the snow free season the year before permit expiration. The audit will include all aspects of this Reclamation Plan Approval. The environmental audit is intended to verify the Permittee's compliance with applicable environmental laws associated with this permit. The third-party contractor should be mutually agreed on by the State and the Permittee, but in the event that agreement cannot be reached, the State retains the final contractor selection decision. Costs for the third-party contractor shall be borne by the Permittee. The intent of the audit is to evaluate whether both Permittee management and agency permit administration provide reasonable assurances that the facility and environmental controls are functioning as intended. The environmental audit shall include an evaluation of the adequacy of the approved financial assurance.

**Temporary Closure.** The Permittee shall notify the Authorized Officer in writing at least thirty (30) days prior to any planned Temporary Closure longer than the typical seasonal period of inactivity or one year. The notice shall state the nature and reason for the Temporary Closure, the anticipated duration of the Temporary Closure, what actions will be taken to maintain compliance with project permits and plan approvals, and any event which would reasonably be anticipated to result in the resumption of activities or the permanent cessation of activities. Operations must resume for not less than ninety (90) consecutive days in order to terminate the running of the Temporary Closure. If a Temporary Closure extends beyond three (3) years, the Department may deem mining operations to be permanently abandoned or ceased, and whereupon final reclamation must commence unless otherwise agreed by the Department.

The Permittee shall ensure that the project area and facilities are maintained in a safe condition during a Temporary Closure and the Permittee shall not allow the project area or facilities to be degraded / eroded or facilities to fall into a state of disrepair during or as a result of the Temporary Closure. Action shall be taken to prevent or mitigate any impacts to ground or surface waters from project facilities. All collection, treatment,

maintenance, and monitoring activities required under project permits or plan approvals shall be performed under any Temporary Closure.

**Abandonment or Cessation of Operations.** Not later than thirty (30) days after the permanent cessation or abandonment of mining and milling operations, the Permittee shall notify the Authorized Officer of the cessation of mining operations.

Within ninety (90) days of the decision to permanently cease operations, an updated final Reclamation Plan, schedule, and Monitoring Plan must be submitted to DNR for approval. The updated plans must address current conditions at the site.

Permanent reclamation of individual facilities must be implemented and completed in accordance with the conditions of this Reclamation Plan Approval.

Permanent reclamation of a facility will be complete when the following criteria are met:

- All terms of the current Reclamation Plan and conditions of this Reclamation Plan Approval have been met; and
- The performance standards under Alaska Administrative Code, Title 11 (Natural Resources) and Chapter 97 (Mining Reclamation) Article 2 (Reclamation Performance Standards) have been achieved.

**Erosion Standard.** Erosion features which form in areas that have been recontoured and covered with topsoil must be stabilized if they affect the long-term stability of the reclaimed area or may result in additional erosion or sedimentation. Actions to stabilize erosion features shall be conducted in a manner that minimizes disturbance to adjacent areas. Subsequent inspections shall be completed to verify that rills and gullies do not persist. If chronic or long-term erosion features are identified that are beyond the pre-mining level of erosion for the area, then remediation of the site drainage that is contributing to the formation of the rills and gullies shall be completed.

**Inspection and Entry.** The Permittee shall permit authorized representatives of DNR to enter into and upon the area and facilities covered under this plan approval at all reasonable times without notice for the purpose of inspecting the area and activities covered under this plan approval. Said inspections shall be subject to such safety and security procedures as the Permittee may from time to time adopt.

At any time upon DNR's written request, the Permittee shall promptly make any and all records, documents, or other information required to be kept or maintained by law, regulation, ordinance or this Reclamation Plan Approval available to DNR for inspection and copying as reasonably required by DNR to determine the Permittee in compliance with local, state and federal laws applicable to the operations authorized under this plan approval.

**Violations.** This authorization is revocable immediately upon violation of any of its terms, conditions, stipulations, nonpayment of fees, or upon failure to comply with any other applicable laws, statutes and regulations (federal and state).

**Assignment.** This plan approval may be transferred or assigned with prior written approval from DNR. DNR will only disapprove a transfer with good cause and will evaluate whether the proposed assignee (1) is qualified to acquire all permits and authorizations necessary to conduct operations under the plan; (2) is on notice of default or subject to an enforcement action by any state agency on any lease, reclamation bond, or other permit within the state. Any assignee must commit in writing to be bound by this plan approval to the same extent as the Permittee, and must provide to DNR all proofs of insurance, bonds, or undertakings required by this plan approval. Transfer of this plan approval may, at DNR's discretion, require bond review and update.

**Other Authorizations.** The issuance of this authorization does not alleviate the necessity of the Permittee to obtain authorizations required by other agencies for this activity. The issuance of this authorizations does **not** constitute the issuance of a Plan of Operations Approval.

**Change of Address.** Any change of address must be submitted in writing to the Authorized Officer.

**Modifications.** Any request for modification of the Reclamation Plan and any other affected permits or authorizations must be made by written application to DNR. Amendments to these plans may, at the discretion of DNR, require bond review and update.

**Statutes and Regulations.** This plan approval is subject to all applicable state and federal statutes, including state, federal, and any local statutes and ordinances in effect on the effective date of this plan approval, new statutes, regulations, and ordinances enacted or promulgated after said effective date, and changes to existing statutes and regulations made after the effective date, to the extent constitutionally permissible.

**Severability.** If any clause or provision herein contained shall be adjudicated to be invalid, it shall not affect the validity or effect of any other clause or provision of this plan approval, nor constitute any cause of action in favor of either the Permittee or DNR as against the other.

**Save Harmless.** The recipient of this Reclamation Plan Approval shall indemnify, save harmless, and defend the DNR, its agents and its employees from any and all claims, actions or liabilities for injuries or damages sustained by any person or property arising directly or indirectly from approved activities or the Permittee's performance under this Reclamation Plan Approval.

# Project Specific Stipulations

**Permit Renewal.** At least one hundred and twenty (120) days before the expiration of this plan approval, the Permittee must submit to the department an updated reclamation plan and cost estimate for approval.

**Commencement of permitted activities will be considered an acceptance by Constantine of these stipulations.**

Alaska Department of Natural Resources

## Appeal Right and Procedure

An eligible person affected by this decision may appeal to the DNR Commissioner per AS 44.37.011 and 11 AAC 02. Any appeal must be received within twenty (20) calendar days after issuance of this decision under 11 AAC 02.040. An eligible person must first appeal a decision to the Commissioner before seeking relief in superior court. The Alaska Court System establishes its own rules for timely appealing final administrative orders and decisions of the department.

Appeals may be mailed or hand-delivered to the DNR Commissioner's Office, 550 W. 7th Avenue, Suite 1400, Anchorage, Alaska, 99501; or faxed to (907)-269-8918; or sent by electronic mail to [dnr.appeals@alaska.gov](mailto:dnr.appeals@alaska.gov). Appeals must be accompanied by the fee established in 11 AAC 05.160(d)(1)(F), which has been set at \$200 under the provisions of 11 AAC 05.160 (a)-(b). A copy of 11 AAC 02 is available on the department's website at <https://dnr.alaska.gov/mlw/pdf/DNR-11-AAC-02.pdf>.
