Re: Recordable Disclaimer of Interest Application for Two Unnamed Lakes

Dear Mr. Bisson:

Pursuant to 43 CFR §1864, the State of Alaska files this application for a Recordable Disclaimer of Interest for the lands underlying two Unnamed Lakes (hereinafter referred to as Unnamed Lakes #3 and #4).

I. DESCRIPTION OF WATERWAY

This application is submitted for the submerged lands encompassed by the ordinary high water line of two Unnamed Lakes within the following townships, ranges and sections in the Seward Meridian:

Unnamed Lake #3 is located in Township 19 North, Range 63 West, Sections 18-20.

Unnamed Lake #4 is located in Township 19 North, Range 64 West, Sections 13, 23 and 24 and Township 19 North, 63 West, Section 19.

A map highlighting the lakes and legal descriptions of the townships and ranges underlying the lakes are enclosed.

II. WAIVER REQUEST

As previously discussed with the BLM Alaska State Director, the State requests a waiver under §1864.1-2(d) of the requirement of 43 CFR §1864.1-2 (c)(1) for a description based on a public land survey or certified metes and bounds survey because the map and legal description included here clearly identify the land subject to this application.

"Develop, Conserve, and Enhance Natural Resources for Present and Future Alaskans"
III. **Basis for the State’s Request for a Recordable Disclaimer of Interest**

**Navigability of the waterway** - The State’s application for a Recordable Disclaimer of Interest is based on the Equal Footing Doctrine; the Submerged Lands Act of 1953; the Submerged Lands Act of 1988; the Alaska Statehood Act; or any other legally cognizable reason. BLM may disclaim interest in the submerged lands on any of the grounds that apply.

Because these unnamed lakes are navigable, Alaska owns the submerged lands underlying the waterbodies by virtue of the Equal Footing Doctrine and the Submerged Lands Acts. Under the Equal Footing Doctrine, new states created from federal territories are admitted to the Union with all the powers of sovereignty and jurisdiction that pertain to the original states. Upon admission of a state to the Union, the title to lands underlying navigable waters within its boundaries automatically passes to the state as a matter of constitutional grace.

**The State as the upland owner** - Generally, where the State is the owner of the uplands adjacent to these unnamed lakes, the State owns the beds of these waterbodies even in the absence of a navigability determination. In such circumstance, the State took title under the Equal Footing Doctrine if the water is navigable, or if it is non-navigable, the State gained title to the beds of waterways as a result of the intent of the grantor and state law governing riparian rights. In Alaska, where the land bordering a non-navigable body of water is ceded, title to the submerged lands passes to the shoreland owner unless the intent of the grantor is expressly stated to the contrary.

IV. **Reason for the State’s Request for Recordable Disclaimer of Interest**

The lack of any title document or judgment creates a cloud on the state’s title. A recordable disclaimer of interest for this land will help lift the cloud on its title stemming from the lack of any permanent determination of ownership.

V. **Evidence of the Navigability of Two Unnamed Lakes**

In 1983 the Bureau compiled a regional report detailing historical information and documents related to the Kuskokwim Region (hereinafter referred to as the “Regional Report”). This 800 page report provides an extensive description and summary of historic use of the waterways in the region, including these two unnamed lakes, providing information regarding the use of waterways in the region and details about the historic communities and activities such as exploration, mining, hunting, fishing, trapping, water transport and road and trail use.
Subsequent to the Regional Report, on November 8, 1984, the Bureau published a report entitled Navigable Waters of the Kuskokwim Region, Alaska (hereinafter referred to as “1984 Report”). This report provided further information related to the region and made navigability determinations for a number of waterbodies previously identified in the Regional Report. The report specifically addressed what is known as the Kuskokwim-Yukon Portage, which includes these two unnamed lakes, stating that:

The Portage was suitable for a wide range of crafts, including kayaks, canoes, rowboats, and poling boats, which ranged in length from eighteen to thirty-two feet. Prior to 1930 the mail carrier maintained five rowboats on the Portage. These made it possible for him to travel the distance from Bethel to Russian Mission and return in fifteen to twenty days, all the while carrying a minimum of 600 pounds of mail and oftentimes passengers.

The Report further discussed certain improvements made to the Portage over time, and stated that:

All these improvements were designed to accommodate boats as large as the mail carrier’s – a thirty-foot boat with a four-foot beam and a payload capacity of 2,600 pounds. The project evidently was successful, for in 1938 a Bureau of Fisheries agent reported, “The largest boats now that go over the portage do not exceed 30 feet in length, 4 foot beam, and should not draw over a foot or fifteen inches of water at most.” The improvements had no effect on the navigability status of the subject waterbodies, for it is clear that the streams and lakes were navigable for boats similar to those in commercial use in 1959 before the improvements were effected.

In this report, the Bureau deems this section of the portage, including these two unnamed lakes, navigable.

Another report focusing on the portage area entitled “Reconnaissance Report: Yukon-Kuskokwim Portage, Yukon-Kuskokwim Rivers, Alaska” authored by the Alaska District, Corps. of Engineers in January, 1971 discusses commerce on the Portage and states that:

The Yukon and Kuskokwim River area is connected to a major supply and market centers by water and air traffic only. The movement of freight by water, although seasonal, is vital to the sustained economic growth of the area. Large quantities of bulk materials and supplies are moved throughout the two river systems each summer by boat and barge.
The 1984 Report and the Army Corp. report are affixed hereto as support for the State's application. The Regional Report is not affixed to this application due to its voluminous size. It can, however, be accessed through the Alaska Resources Library & Information Services (ARLIS).

VI. OTHER KNOWN INTERESTED PARTIES

The state is not aware of any adverse claimant or occupant of these lands.

VII. CONCLUSION

As evidenced by the Bureau's 1984 Report, the Army Corp. report and the Regional Report and the available historic information included therein, the State of Alaska determines there is sufficient information to conclude that these two unnamed lakes are navigable waterways and ownership of the submerged lands should be disclaimed by the Department of Interior.

The state agency responsible for this application is the Alaska Department of Natural Resources, Division of Mining, Land, and Water, 550 W. 7th Avenue, Anchorage, Alaska 99501, Attention Richard Mylius, (907) 269-8600. The State hereby authorizes BLM to bill the State's account $100 for the application fee required by regulation.

Sincerely,

Michael L. Menge
Commissioner

Legal Description

Unnamed Lake #3 within the State of Alaska, more particularly described as follows:

All submerged lands encompassed by the ordinary high water line of the Unnamed Lake within the following township and range in the Seward Meridian as determined from Alaska USGS 1:63,360 series topographic map Russian Mission C-5 (1952):

Township 19 North, Range 63 West, Sections 18-20.

The precise location may be within other townships due to the ambulatory nature of water bodies.

Unnamed Lake #4 within the State of Alaska, more particularly described as follows:

All submerged lands encompassed by the ordinary high water line of the Unnamed Lake within the following townships and ranges in the Seward Meridian as determined from Alaska USGS 1:63,360 series topographic map Russian Mission C-5 (1952):

Township 19 North, Range 64 West, Sections 13, 23 and 24: and Township 19 North, Range 63 West, Section 19.

The precise location may be within other townships due to the ambulatory nature of water bodies.
