

Project Sign Guidance

This document is intended to assist grant recipients of Historic Preservation Fund grants in designing and printing public notification signage.

The grantee must create public notification of the project in the form of a project sign, website posting, and proper credit for announcements and publications as appropriate. Signage/notification must be submitted by the ATR in advance.

Signage must of reasonable and adequate construction to withstand weather exposure, be readily and easily visible from the public right-of-way, and be maintained in place throughout the project term as stipulated in the Grant Agreement.

All notifications must contain the following statement: "This project is being supported in part by a grant administered by the National Park Service, Department of the Interior." Additional information identifying the grantee or recognizing other contributors is encouraged and permissible. Photo documentation of the sign/notification must be submitted to NPS ATR with the first Performance Report. The cost of fabricating and erecting notification is an eligible cost for this grant.

The recommended dimensions for signage are 48 inches by 36 inches. Signage must follow the approved design above, including font styles and sizes, header and footer, and placement of agency logo and grant program name.
