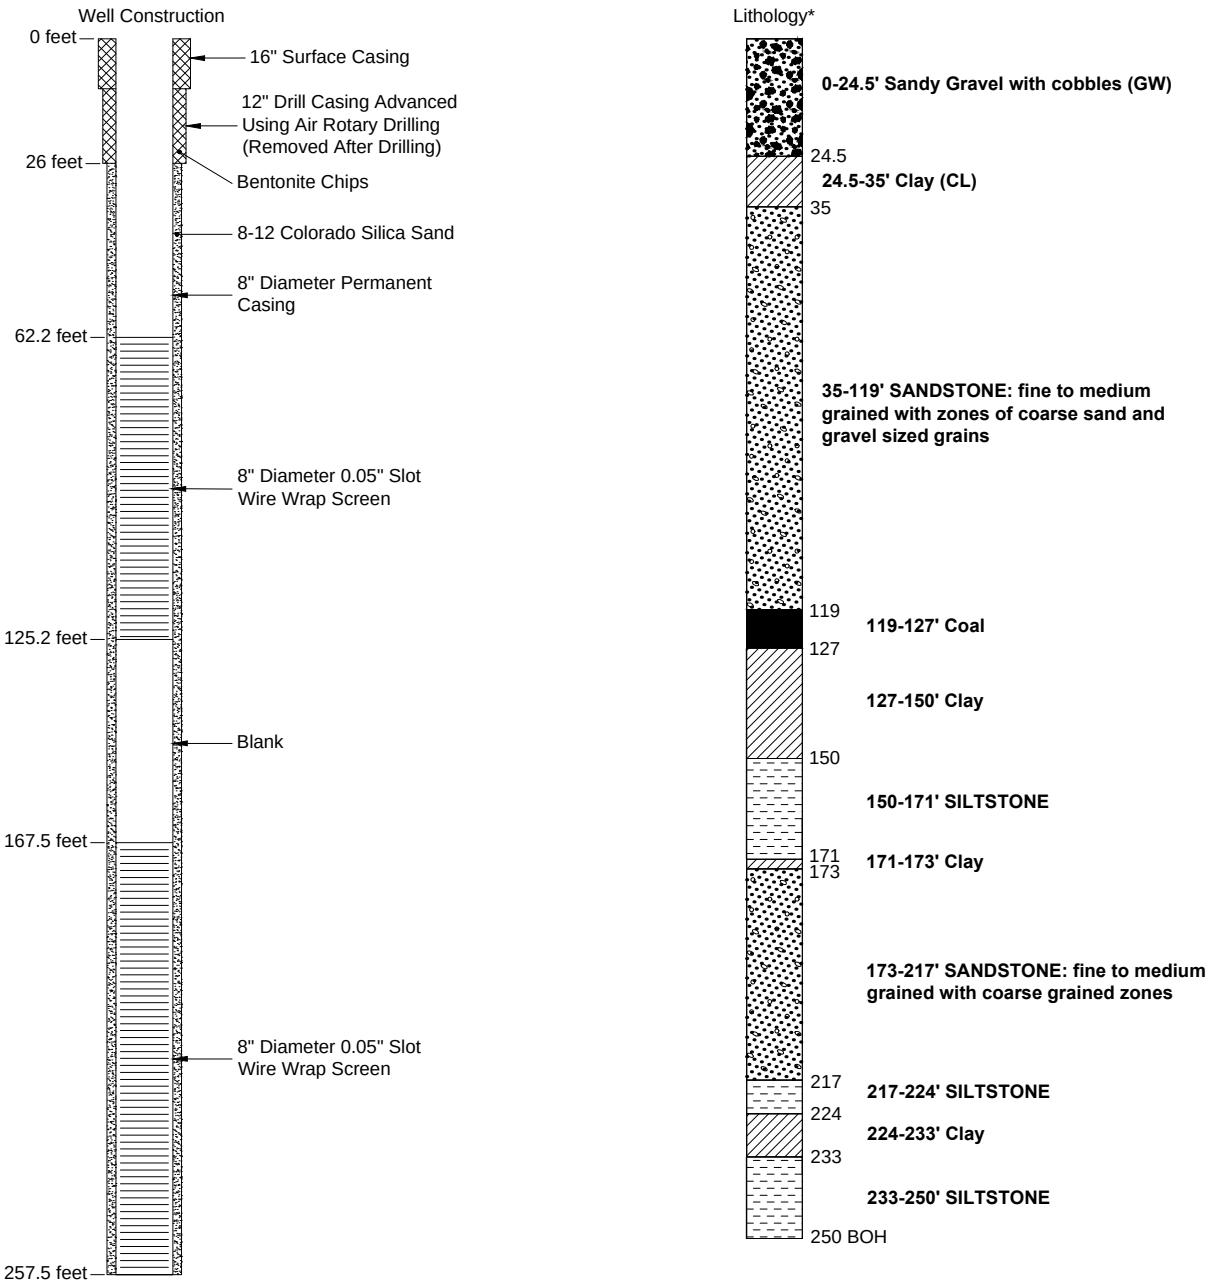
1) Deliver this form to DNR and DEC within 45 days of decommissioning, as per state regulations 11 AAC 93.140.
2) Attach an original water well log, if available. A blank water well log form is available for use if the lithology and well construction details are known but the original water well log is missing.
3) Attach any maintenance or water usage records that may apply to this well and provide an adequate locational description, including maps or sketches. Use additional pages as needed.
4) This form is under development and is subject to change. Please submit suggestions for changes or improvements to either DNR or DEC at the addresses listed above.

Please attach schematics and photos to further document the information provided on this form. This is particularly important for public water supply wells and also any other wells that might impact the public water supply.



This is a summary of Well #4 however the lithology is based on the test well/exploratory boring that was decommissioned.

Vertical Scale in Feet

NOTE

* Lithology based on exploratory boring for Unit 2 on August 10, 2015.

SOURCE NOTES

1. Drawing developed from Kodiak Mapping Inc., Healy Plant Plan and Topo.dwg dated July 2016 and from PDC Inc. Engineers, Topographic Survey, project 14004FB, dated April 2014.
2. Lidar was collected on 05/29/16 at a density of 17ppm (68ppm aggregate) by Kodiak Mapping, Inc., Palmer, Alaska.
3. The horizontal datum is NAD 83 Alaska State Plane Zone 4 (US feet) the vertical datum is based on NAVD 88 elevations (GEOID12B).
4. Monitoring wells 9 and 10 were surveyed by Lounsbury and Associates (June 12, 2017).
5. Former settling pond location from a historical drawing found in the Healy Power Plant's document archive room of Unit 2 ash handling system design.

NOTES

1. Staff Gauge 1 (SG1): Top of road bridge railing. Elevation 1,283.68 Feet.
2. Staff Gauge 2 (SG2): Top of sheet pile wall. Elevation 1,260.48 Feet.
